performance on the posttest CINS and end of semester interviews suggesting that the CINS is a useful classroom tool The CINS was used as both a pretest and posttest to determine relative difficulty of the concepts among college students The three most challenging concepts were random origin of variation how populations change over time due to changing proportions of alleles and how new species originate Many students chose distractors including need as a driving force Results support the use of non traditional methods as only students in such classes demonstrated any improvement on the CINS posttest Pre and posttesting with the CINS was also used to assess relative effectiveness of using two types of supplemental reading materials selections from narrative non textbook sources or from other general biology textbooks in a general biology course These results suggest that specific content of readings was more important than style of the readings Implications for teaching both students and pre service teachers are described *Annot Inst Edit Lab Man Biol 3e* /Campbell Benjamin-Cummings Publishing Company,Judith Giles Morgan,1994-02 Laboratory Protocols in Fungal Biology Vijai Kumar Gupta,Maria Tuohy,2022-02-03 Mycology has an integral role to play in the development of the biotechnology and biomedical sectors It has become a subject of increasing importance as new fungi and their associated biomolecules are identified As this discipline comes to the forefront of research in these sectors the requirement for a consolidation of available research approaches is required The First Edition of this book has a few basic and applied protocols With the Second Edition this book provides consolidated information on recent developments and the most widely used mycological methods available in the fields of biochemistry biotechnology and microbiology The methods outlined offer clear and concise directions to the reader and covers both standard protocols and more applied mycological methods This book provides useful information for undergraduates post graduates and specialists and researchers studying fungal biology **Catalog of Copyright Entries.
