**Sense of Wonder** Leigh Grossman,2011-12-20 A survey of the last 100 years of science fiction with representative stories and illuminating essays by the top writers poets and scholars from Edgar Rice Burroughs and Samuel Butler to Robert A Heinlein and and Jack Vance from E E Doc Smith and Clifford D Simak to Ted Chiang and Charles Stross and everyone in between More than one million words of classic fiction and essays

*The Mechanics of Wonder* Gary Westfahl,1998-01-01 This is a sustained argument about the idea of science fiction by a renowned critic Overturning many received opinions it is both controversial and stimulating Much of the controversy arises from Westfahl s resurrection of Hugo Gernsback for decades a largely derided figure as the true creator of science fiction Following an initial demolition of earlier critics Westfahl argues for Gernsback s importance His argument is fully documented showing a much greater familiarity with early American science fiction particularly magazine fiction than previous academic critics or historians After his initial chapters on Gernsback he examines the way in which the Gernsback tradition was adopted and modified by later magazine editors and early critics This involves a re evaluation of the importance

of John W Campbell to the history of science fiction as well as a very interesting critique of Robert Heinlein's *Beyond the Horizon* one of the seminal texts of American science fiction. In conclusion Westfahl uses the theories of Gernsback and Campbell to develop a descriptive definition of science fiction and he explores the ramifications of that definition. *The Mechanics of Wonder* will arouse debate and force the questioning of presuppositions. No other book so closely examines the origins and development of the idea of science fiction and it will stand among a small number of crucial texts with which every science fiction scholar or prospective science fiction scholar will have to read.

**Science Fiction Literature through History** Gary Westfahl, 2021-07-19 This book provides students and other interested readers with a comprehensive survey of science fiction history and numerous essays addressing major science fiction topics, authors' works and subgenres written by a distinguished scholar. This encyclopedia deals with written science fiction in all of its forms, not only novels and short stories but also mediums often ignored in other reference books such as plays, poems, comic books and graphic novels. Some science fiction films, television programs and video games are also mentioned, particularly when they are relevant to written texts. Its focus is on science fiction in the English language, though due attention is given to international authors whose works have been frequently translated into English. Since science fiction became a recognized genre and greatly expanded in the 20th century, works published in the 20th and 21st centuries are most frequently discussed, though important earlier works are not neglected. The texts are designed to be helpful to numerous readers ranging from students first encountering science fiction to experienced scholars in the field.

**The Oxford Handbook of Science Fiction** Rob Latham, 2014 The *Oxford Handbook of Science Fiction* attempts to describe the historical and cultural contours of SF in the wake of technoculture studies. Rather than treating the genre as an isolated aesthetic formation, it examines SF's many lines of cross-pollination with technocultural realities since its inception in the nineteenth century, showing how SF's unique history and subcultural identity has been constructed in ongoing dialogue with popular discourses of science and technology. The volume consists of four broadly themed sections, each divided into eleven chapters. Section I, *Science Fiction as Genre*, considers the internal history of SF literature, examining its characteristic aesthetic and ideological modalities, its animating social and commercial institutions, and its relationship to other fantastic genres. Section II, *Science Fiction as Medium*, presents a more diverse and ramified understanding of what constitutes the field as a mode of artistic and pop cultural expression, canvassing extra-literary manifestations of SF ranging from film and television to videogames and hypertext to music and theme parks. Section III, *Science Fiction as Culture*, examines the genre in relation to cultural issues and contexts that have influenced it and been influenced by it, in turn the goal being to see how SF has helped to constitute and define important sub-cultural groupings, social movements and historical developments during the nineteenth, twentieth and twenty-first centuries. Finally

Section IV Science Fiction as Worldview explores SF as a mode of thought and its intersection with other philosophies and large scale perspectives on the world from the Enlightenment to the present day

**Pseudoscience and Science Fiction** Andrew May, 2016-09-13 Aliens flying saucers ESP the Bermuda Triangle antigravity are we talking about science fiction or pseudoscience Sometimes it is difficult to tell the difference Both pseudoscience and science fiction SF are creative endeavours that have little in common with academic science beyond the superficial trappings of jargon and subject matter The most obvious difference between the two is that pseudoscience is presented as fact not fiction Yet like SF and unlike real science pseudoscience is driven by a desire to please an audience in this case people who want to believe This has led to significant cross fertilization between the two disciplines SF authors often draw on real pseudoscientific theories to add verisimilitude to their stories while on other occasions pseudoscience takes its cue from SF the symbiotic relationship between ufology and Hollywood being a prime example of this This engagingly written well researched and richly illustrated text explores a wide range of intriguing similarities and differences between pseudoscience and the fictional science found in SF Andrew May has a degree in Natural Sciences from Cambridge University and a PhD in astrophysics from Manchester University After many years in academia and the private sector he now works as a freelance writer and scientific consultant He has written pocket biographies of Newton and Einstein as well as contributing to a number of popular science books He has a lifelong interest in science fiction and has had several articles published in Fortean Times magazine
