PROF. DR. CAPT. BİLAL KILIÇ, 2020-11-03

Aircraft Accident Investigation Learning from Human and Organizational Factors provides a complete overview of the contributing factors to accidents and incidents in aviation and fundamentals of aircraft accident investigation. While the book in your hands may be used in the form of a reference source at universities in terms of its contents it may also be used in the recurrent trainings of airlines as a supplementary source. It is also a source of reference that may be individually used by those who are interested in aviation for the purpose of learning about the investigation methods and causes of accidents that have been experienced. The accidents covered in the book are as follows: British Airways Flight 38, Birgenair Flight 301, Korean Air Flight 801, Helios Airways Flight 552, Avianca Flight 052, Asiana Airlines Flight 214, Qantas Flight 32, Air France Flight 447, Air Florida Flight 90, Air France Flight 358, Colgan Air Flight 3407, Air Canada Flight 143. Code of Federal Regulations, 2000. **Text and Context** Susan Jones, 2012-12-06. Text and Context Document Storage and Processing describes information processing techniques including those which do not appear in conventional textbooks on database systems. It focuses on the input, storage, retrieval, and presentation of primarily textual information together with auxiliary material about graphic and video data. There are chapters on text analysis as a basis for lexicography, full text databases, and information retrieval, the use of optical storage for both ASCII text and scanned document images, hypertext and multi media systems, abstract document definition and document formatting and imaging. The material is treated in an informal way with an emphasis on real applications and software. There are among others case studies from Reuters, British Airways, St Bartholomew's Hospital, Sony, and HMSO. Relevant industry standards are discussed including ISO 9660 for CD-ROM file storage, CCITT Group 4 data compression, the Standard Generalised Markup Language, and Office Document Architecture and the Postscript language. Readers will benefit from the way Susan Jones has brought together this information in a logical sequence to highlight the connections between related topics. This book will be of interest to second and third year undergraduates and MSc students in computer science, to BTEC HTD final year computing and information science students either specialising in IT or taking an IT option, and to students taking courses in IT and in business computing systems.
