BIOLOGY FINAL REVIEW SHEET ANSWERS

* Although the biology final is not considered cumulative, topics covered the second semester require the knowledge and understanding of concepts from the first semester.

** This review sheet is not intended to substitute for studying. It is in no way comprehensive. The review sheet is to be used as a *supplementary resource* to help you review for your upcoming exam. It is highly recommended that you review previous quizzes, tests, labs, homework, and review sheets.

Topics Covered:

**italicized topics were covered during semester I.*

Scientific Method

Organic Compounds

Cell Structure and Function

Osmosis and Diffusion

Cell Energy

Photosynthesis

Cell Respiration

DNA

RNA

Protein Synthesis

Mitosis

Meiosis

Myxobacteria are ubiquitous Gram negative soil bacteria with a complex multicellular population behavior They are highly social microbes that move hunt and develop to build fruiting bodies which are associated with feeding on a diverse range of bacteria and fungi for nutrition Therefore myxobacteria are classified as keystone taxa in the microbial food web and are key players in determining community organization with potential applications in the biocontrol of plant diseases wastewater treatment and bioconversion In addition myxobacteria are regarded as natural pharmaceutical and functional enzyme

factories due to their diversity and the unique properties of their secondary metabolites and enzymes making them highly attractive for resource discovery However the difficulty in purifying and cultivating many types of myxobacteria limits the in depth study of myxobacteria Otherwise key factors involved in the biological interaction and bioconversion of myxobacteria taxa remain largely unexplored hindering their practical applications

Jaswal ,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM
