Jain, Rainer Schmidt, 2021-05-28 This book highlights new trends and challenges in intelligent systems which play an essential part in the digital transformation of many areas of science and practice It includes papers offering a deeper understanding of the human centred perspective on artificial intelligence of intelligent value co creation ethics value oriented digital models transparency and intelligent digital architectures and engineering to support digital services and intelligent systems the transformation of structures in digital business and intelligent systems based on human practices as well as the study of interaction and co adaptation of humans and systems All papers were originally presented at the International KES Conference on Human Centred Intelligent Systems 2021 KES HCIS 2021 held on June 14 16 2021 in the KES Virtual Conference Centre LTE Self-Organising Networks (SON) Seppo Hämmäläinen, Henning Sanneck, Cinzia Sartori, 2012-01-30 Covering the key functional areas of LTE Self Organising Networks SON this book introduces the topic at an advanced level before examining the state of the art concepts The required background on LTE network scenarios technologies and general SON concepts is first given to allow readers with basic knowledge of mobile networks to understand the detailed discussion of key SON functional areas self configuration optimisation healing Later the book provides details and references for advanced readers familiar with LTE and SON including the latest status of 3GPP standardisation Based on the defined next generation mobile networks NGMN and 3GPP SON use cases the book elaborates to give the full picture of a SON enabled system including its enabling technologies architecture and operation Heterogeneous networks including different cell hierarchy levels and multiple radio access technologies as a new driver for SON are also discussed Introduces the functional areas of LTE SON self optimisation configuration and healing and its standardisation also giving NGMN and 3GPP use cases Explains the drivers requirements challenges enabling technologies and architectures for a SON enabled system Covers multi technology 2G 3G aspects as well as core network and end to end operational aspects Written by experts who have been contributing to the development and standardisation of the LTE self organising networks concept since its inception Examines the impact of new network architectures Heterogeneous Networks to network operation for example multiple cell layers and radio access technologies

Software Maintenance - A Management Perspective Phaneendra Nath Vellanky, 2007-10-23 Computer systems play an important role in our society Software drives those systems Massive investments of time and resources are made in developing and implementing these systems Maintenance is inevitable It is hard and costly Considerable resources are required to keep the systems active and dependable We cannot maintain software unless maintainability characters are built into the products and processes There is an urgent need to reinforce software development practices based on quality and

reliability principles Though maintenance is a mini development lifecycle it has its own problems Maintenance issues need corresponding tools and techniques to address them Software professionals are key players in maintenance While development is an art and science maintenance is a craft We need to develop maintenance personnel to master this craft Technology impact is very high in systems world today We can no longer conduct business in the way we did before That calls for reengineering systems and software Even reengineered software needs maintenance soon after its implementation We have to take business knowledge procedures and data into the newly reengineered world Software maintenance people can play an important role in this migration process Software technology is moving into global and distributed networking environments Client server systems and object orientation are on their way Massively parallel processing systems and networking resources are changing database services into corporate data warehouses Software engineering environments rapid application development tools are changing the way we used to develop and maintain software Software maintenance is moving from code maintenance to design maintenance even onto specification maintenance Modifications today are made at specification level regenerating the software components testing and integrating them with the system Eventually software maintenance has to manage the evolution and evolutionary characteristics of software systems Software professionals have to maintain not only the software but the momentum of change in systems and software In this study we observe various issues tools and techniques and the emerging trends in software technology with particular reference to maintenance We are not searching for specific solutions We are identifying issues and finding ways to manage them live with them and control their negative impact

Principles and Practice of Constraint Programming Peter J. Stuckey, 2008-08-28 This volume contains the proceedings of the 14th International Conference on Principles and Practice of Constraint Programming CP 2008 held in Sydney Australia September 14 18 2008 The conference was held in conjunction with the International Conference on Automated Planning and Scheduling ICAPS 2008 and the International Conference on Knowledge Representation and Reasoning KR 2008 Information about the conference can be found at the w site <http://www.unimelb.edu.au/cp2008> Held annually the CP conference series is the premier international conference on constraint programming The conference focuses on all

aspects of computing with constraints The CP conference series is organized by the Association for Constraint Programming ACP Information about the conferences in the series can be found on the Web at <http://www.cs.ualberta.ca/aicp/> Information about ACP can be found at <http://www.a4cp.org/> CP 2008 included two calls for contributions a call for research papers describing novel contributions in the field and a call for application papers describing applications of constraint technology For the first time authors could directly submit short papers for consideration by the committee The research track received 84 long submissions and 21 short submissions and the application track received 15 long submissions Each paper received at least three reviews which the authors had the opportunity to see and to react to before the papers and their reviews were discussed extensively by the members of the Program Committee

NASA SP-7500 United States. National Aeronautics and Space Administration, **IP Address Management** Timothy Rooney, 2011-01-11 This book will be the first covering the subject of IP address management IPAM The practice of IPAM includes the application of network management disciplines to IP address space and associated network services namely DHCP Dynamic Host Configuration Protocol and DNS Domain Name System The consequence of inaccurately configuring DHCP is that end users may not be able to obtain IP addresses to access the network Without proper DNS configuration usability of the network will greatly suffer as the name to address lookup process may fail Imagine having to navigate to a website or send an email or an instant message by IP address instead of by name It is equally important that these DHCP and DNS configurations be based on a common IP address plan which maps out the IP address hierarchy subnets address pools and domains IPAM applies management disciplines to these core services including configuration change control auditing reporting and so on and they are necessary given the absolute requirement for properly managing IP space and DHCP and DNS servers The linkages among an IP address plan DHCP server configuration and DNS server configuration are inseparable a change of an IP address will affect DNS information and perhaps DHCP as well These functions provide the foundation for today's converged services IP networks so they need to be managed using a rigorous approach Today there is no single book that covers the management of these linkages and services they provide IP Address Management Principles and Practice will fill that gap While several books are available for leading vendors DHCP and DNS services implementations few exist for IP address planning and none exist that unifies these three topics To obtain a free copy of the IPAM Configuration Guide please send an email to ieeeproposals@wiley.com
