## **Balance Of Power Theory And Practice In The 21st Century:**

*Balance of Power* T. V. Paul, James J. Wirtz, Michel Fortmann, 2004 Since the sudden disappearance of the Soviet Union many scholars have argued that the balance of power theory is losing its relevance This text examines this viewpoint as well as looking at systematic factors that may hinder or favour the return of balance of power politics 21st Century Political Science: A Reference Handbook

Kucukdegirmenci, 2024-10-31 This book examines how and where Japan's multi tiered security approach which was put forward as a policy that emphasizes Japan's more active role in shaping the regional security order in the light of the changing geopolitical balances in the East Asia Pacific in the post Cold War period has evolved in the context of China's rise in the 2000s 2010s and present This book categorizes Japan's foreign and security policy into three tiers bilateralism multilateralism and minilateralism The book offers valuable insights into Japan's foreign and security policies within East Asia and the broader Asia Pacific region including the region's geopolitical landscape and Japan's relationships with major stakeholders It also contributes to understanding inter regional dynamics and the application of balance of power theory The book targets policymakers involved in foreign and security policy decisions as well as academics researchers journalists and international relations students interested in Japan and the East Asia Indo Pacific region **The Realism Reader** Colin

Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism's engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism's engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism The Institutionalization of the International Criminal Court Salla

Huikuri, 2018-08-21 This book explores the institution of the International Criminal Court ICC as a policy instrument It argues

that after the Cold War the European Union started challenging the unilateral policies of the United States by promoting new norms and institutions such as the ICC This development flies in the face of traditional explanations for cooperation which would theorize institutionalization as the result of hegemonic preponderance rational calculations or common identities The book explains the dynamics behind the emergence of the ICC with a novel theoretical concept of normative binding Normative binding is a strategy that provides middle powers with the means to tie down the unilateral policies of powerful actors that prefer not to cooperate The idea is to promote new multilateral norms and deposit them in institutions which have the potential to become binding even on unilateralist actors if the majority of states adhere to them

**NATO and the War in Ukraine** Jan Eichler, 2024-10-29 This book presents a fresh perspective on the geopolitical landscape surrounding NATO's enlargement aptly termed expansion by invitation Looking beyond conventional narratives it unravels the multifaceted outcomes of this process extending beyond the initial optimism While acknowledging the merits of NATO's expansion the book scrutinizes its contentious side effects notably the escalating militarization of the Baltic and Black Sea regions heightened military expenditure shifts toward offensive doctrines and the surge in military exercises and incidents between NATO and Russia In a world witnessing a renewed bipolarization akin to the Cold War era the book underscores the need for NATO and Russia to de-escalate tensions and strive towards a transition from contemporary negative peace to a more constructive positive peace Devoid of bias this book refrains from condemning the expansion process but rather calls for an acknowledgment of its consequences It is an indispensable resource for academics seeking a nuanced understanding of NATO's expansion challenging prevailing terminologies and offering insights into the complex dynamics of international security in Europe

**Chinese Regionalism in Asia** Tiang Boon Hoo, Jared Morgan McKinney, 2022-07-29 With globalization on the wane in a world fractured by growing great power competition Hoo and McKinney argue that regionalism is likely to re-emerge as a focal area of significance and interest in the coming years In Asia

how regionalism evolves is inescapably linked to China's part in this story. Hoo McKinney and their contributors will help readers better understand regionalism as it is approached, conceived and practiced by China. Looking past the conventional attention on the Belt Road Initiative, the contributors examine the evolving perspectives on regionalism within China, the forms which this regionalism has taken and the implications for the strategic order in Asia. This includes a focus on newer architecture such as the Regional Comprehensive Economic Partnership (RCEP) and the Asian Infrastructure Investment Bank (AIIB), lesser known mechanisms such as the Conference on Interaction and Confidence Building Measures in Asia (CICA) and the Lancang Mekong Cooperation (LMC) and more traditional ones such as the Shanghai Cooperation Organization (SCO). A valuable resource for scholars and students of China's foreign relations and of Asian regionalism and strategic order.

Also available as Open Access. **The Limits of Alignment** John D. Ciorciari, 2010-08-16 The Limits of Alignment is an engaging and accessible study that explores how small states and middle powers of Southeast Asia ensure their security in a world where they are overshadowed by greater powers. John D. Ciorciari

challenges a central concept in international relations theory that states respond to insecurity by either balancing against their principal foes bandwagoning with them or declaring themselves neutral Instead he shows that developing countries prefer limited alignments that steer between strict neutrality and formal alliances to obtain the fruits of security cooperation without the perils of undue dependency Ciorciari also shows how structural and normative shifts following the end of the Cold War and the advent of U S primacy have increased the prevalence of limited alignments in the developing world and that these can often place constraints on U S foreign policy Finally he discusses how limited alignments in the developing world may affect the future course of international security as China and other rising powers gather influence on the world stage

**China, the US and the Power-Transition Theory** Steve Chan, 2007-09-12 China's recent growth has called attention to the power transition theory which contends that the danger of a major war is the greatest when a rising dissatisfied challenger threatens to overtake a declining satisfied hegemon Steve Chan questions this prevailing view by analyzing the extent of ongoing power shifts among the leading powers exploring the portents for their future growth and seeking indicators of their relative commitment to the existing international order To better understand the strategic motivations of ascending and declining states insights are drawn from prospect theory and past episodes of peaceful and violent transition such as the end of the Cold War and the outbreak of the First and Second World Wars He concludes that China is unlikely to instigate a confrontation with the US and that whilst military conflict over the Taiwan Strait is possible this is more likely to be due to China's inability to prevent US involvement than its willingness to provoke the US This book places China in a comparative and historical context in which inquiry is informed by the experiences of other major powers and pertinent theories in international relations such as those on extended deterrence preventive war and democratic peace Its comparative and theoretical orientation and its contrarian perspective will be of great interest not only to students and scholars of international relations and Chinese politics but also to policy makers and professionals
