Performance Drivers Nils-Göran Olve, Jan Roy, Magnus Wetter, 2001-05-08 A Practical Guide to Using the Balanced Scorecard performance drivers Nils Goran Olve Jan Roy and Magnus Wetter Since the groundbreaking work of Robert S Kaplan and David P Norton the concept of the Balanced Scorecard has achieved increasing popularity in the business world Previously many organizations had built their business objectives around financial targets and goals that bore little relation to a long term strategic vision Typically this leaves a gap between the development of a company's strategy and its implementation The business scorecard however provides a more balanced view by looking at not just financial concerns but also customers internal business processes and learning and growth But it is not just a system of performance measurement by focusing on future potential success it can be used as a dynamic management system that reinforces implements and drives corporate strategy forward In this book the authors draw on their extensive experience with scorecard projects to provide a step by step method for introducing the Balanced Scorecard into an organization This is done through the use of some of the most important practical examples in existence with case studies from ABB Coca Cola Electrolux British Telecom Nat West Skandia and Volvo The desired strategic control system using scorecards that is presented focuses on creating and communicating a total comprehensive picture to all members of the organization from the top down a long term view of what the company's strategic objectives really are how to make use of knowledge gained through experience and the required flexibility of such a system to cope with the fast changing business environment This book will provide senior and operational managers consultants and business academics with a comprehensive view of emerging Balanced Scorecard practice supported by both business advice and a theoretical foundation Reflections on the relations between the Balanced Scorecard and other areas such as TQM information systems and intellectual capital and knowledge management are also made

Business Strategy **Performance Measurement** Luca Quagini, Stefano Tonchia, 2010-08-24 Business Intelligence BI and Performance Management PM the development and delivery of business insight for users and the management of execution based on that insight are two solution types that promise to bring great value to enterprises Yet most organizations haven't yet realized the elusive benefits of these two important disciplines The reasons for this are manifold However the primary causes are the culture of the organization and its leadership This is a topic which I've addressed at length in my latest book

Pro les in Performance Business Intelligence Journeys and the Roadmap for Change The culture and leadership of the organization determines the importance and strategic intent surrounding the use of BI and PM Sadly most organizations lack the motivation to embrace transparency and accountability or to align with the strategy of the organization enabling execution and coordination in unison with the mission However once an organization and its leadership are ready to take a step towards real change creating an environment of openness sharing and alignment with BI and PM as its centerpiece the next question then becomes one of how and where to begin Even with great strategic intent missteps in the development and deployment of BI and PM and can cause disillusionment and disappointment lending support to the naysayers of the organization and leading to failure and abandonment of these critical programs Balanced Scorecard Ade Asefeso MCIPS MBA,2013-06-18 The balanced scorecard is a strategic planning and management system that is used extensively in business and industry government and non profit organizations worldwide to align business activities to the vision and strategy of the organization improve internal and external communications and monitor organization performance against strategic goals The key problem identified in business is that many companies tended to manage their businesses based solely on financial measures While that may have worked well in the past the pace of business in today s world requires more comprehensive measures Though financial measures are necessary they can only report what has happened in the past where a business has been but not where it is headed It is like driving a car by looking in the rear view mirror Balanced Scorecard Nils-Göran Olve,Anna Sjöstrand,2006-04-24 The fast track route to understanding and implementing the balanced scorecard in your business It covers the key aspects of the balanced scorecard from using it to develop the company s strategy and relating it to existing control systems to setting goals and monitoring progress It gives examples and lessons from some of the worlds most successful businesses including Ricoh Xerox and Ericsson Enterprise and ideas from the smartest thinkers including Robert S Kaplan and David P Norton It includes and glossary of key concepts and a comprehensive resources guide The Trainer's Balanced Scorecard Ajay Pangarkar,Teresa Kirkwood,2012-06-29 The balanced scorecard BSC is increasingly the strategic business tool of choice for many organizations One of the four components of the BSC learning and growth is largely misunderstood underutilized and ineffectively applied The BSC framework provides an opportunity for management and workplace learning and performance professionals to communicate through a common language establish realistic and measurable targets and align and support the rest of the organization in a strategic way This book provides proven guidance and customizable tools to measure the role of learning and performance link it to organizational objectives and communicate to management results in a common language **Making Scorecards Actionable** Nils-Göran Olve,Carl-Johan Petri,Jan Roy,Sofie Roy,2003-02-28 The concept of the Balanced Scorecard has become increasingly popular in the global business world as a tool for balancing business strategy with financial concerns customer care internal business processes and learning and growth This book focuses on the hands on experiences of companies across a broad range of organizations at

both operational and board level Drawn from cases in the UK Europe the United States and Japan the book shows that though Balanced Scorecard has been adopted widely it is practiced in different forms and with varying degrees of success Making Scorecards Actionable helps in creating and communicating a total comprehensive strategy to all organizational members from the top down Provides a long term view of what the company s strategic objectives really are Shows how to make use of knowledge gained through experience Demonstrates the required flexibility of such a system to cope with the fast changing business environment This book provides a practice based follow on from the successful Performance Drivers by Olve Roy and Welter 0471 986232 Readership Operational managers consultants and business students A

Practitioner's Guide to the Balanced Scorecard Allan Mackay,2005 *Creating a Balanced Scorecard for a Financial Services Organization* Naresh Makhijani,James Creelman,2011-07-20 How to tap the power of the balanced scorecard for financial services organizations Designed to help financial services organizations build and implement the strategic management framework known as the balanced scorecard Creating a Balanced Scorecard for a Financial Services Organization is the book you need to ensure accountability transparency and risk management in your enterprise The financial crisis revealed the many shortcomings of the industry but with this book in hand you can make the most of the mistakes of the past to build a better stronger business that balances both short and long term goals Rich in the latest theoretical thinking and incorporating case studies that show the balanced scorecard system in action the book covers both financial and non financial performance perspectives in one comprehensive volume Written by two leading practitioners with years of real life experience the book is the definitive step by step guide to implementing the balanced scorecard throughout your organization aligning your whole business with your strategic goals Includes everything you need to improve performance transparency accountability governance procedures risk management and more for financial services organizations of any kind Packed with expert advice and case studies that show the ideas presented in action Written by leading experts who have successfully implemented the balanced scorecard system in their own companies Accessible and in depth Creating a Balanced Scorecard for a Financial Services Organization is the book you need to improve your business

The Balanced Scorecard Robert S. Kaplan,David P. Norton,1996 Here is the book by the recognized architects of the Balanced Scorecard that shows how managers can use this revolutionary tool to mobilize their people to fulfill the company s mission More than just a measurement system the Balanced Scorecard is a management system that can channel the energies abilities and specific knowledge held by people throughout the organization toward achieving long term strategic goals Kaplan and Norton demonstrate how senior executives in industries such as banking oil insurance and retailing are using the Balanced Scorecard both to guide current performance and to target future performance They show how to use measures in four categories financial performance customer knowledge internal business processes and learning and growth to align individual organizational and cross departmental initiatives and to identify entirely new processes for meeting

customer and shareholder objectives The authors also reveal how to use the Balanced Scorecard as a robust learning system for testing gaining feedback on and updating the organization s strategy Finally they walk through the steps that managers in any company can use to build their own Balanced Scorecard The Balanced Scorecard provides the management system for companies to invest in the long term in customers in employees in new product development and in systems rather than managing the bottom line to pump up short term earnings It will change the way you measure and manage your business
