Programming Using Scala Mark C. Lewis,2012-11-05 With its flexibility for programming both small and large projects Scala is an ideal language for teaching beginning programming Yet there are no textbooks on Scala currently available for the CS1 CS2 levels *Introduction to the Art of Programming Using Scala* presents many concepts from CS1 and CS2 using a modern JVM based language that works well for both programming in the small and programming in the large The book progresses from true programming in the small to more significant projects later leveraging the full benefits of object orientation It first focuses on fundamental problem solving and programming in the small using the REPL and scripting environments It covers basic logic and problem decomposition and explains how to use GUIs and graphics in programs The text then illustrates the benefits of object oriented design and presents a large collection of basic data structures showing different implementations of key ADTs along with more atypical data structures It also introduces multithreading and networking to provide further motivating examples By using Scala as the language for both CS1 and CS2 topics this textbook gives students an easy entry into programming small projects as well as a firm foundation for taking on larger scale projects Many student and instructor resources are available at www.programmingusingscala.net **Oxford IB Diploma**

Programme: Chemistry Course Companion Brian Murphy,Gary Horner,David Tarcy,Sergey Bylikin,2014-03-06 The only DP Chemistry resource developed with the IB to accurately match the new 2014 syllabus for both SL and HL this revised edition gives you unrivalled support for the new concept based approach to learning the Nature of science Understanding applications and skills are integrated in every topic alongside TOK links and real world connections to truly drive independent inquiry Assessment support straight from the IB includes practice questions and worked examples in each topic alongside support for the Internal Assessment Truly aligned with the IB philosophy this Course Book gives unparalleled insight and support at every stage Accurately cover the new syllabus the most comprehensive match with support directly from the IB on the core AHL and all the options Fully integrate the new concept based approach holistically addressing understanding applications skills and the Nature of science Tangibly build assessment potential with assessment support straight from the IB Writte *Science Units for Grades 9-12* Randy L.
