Virgiliu Pop, 2008-11-16 This work investigates the permissibility and viability of property rights on the celestial bodies particularly the extraterrestrial aspects of land and mineral resources ownership In lay terms it aims to find an answer to the question Who owns the Moon The first chapter critically analyses and dismantles with legal arguments the issue of sale of extraterrestrial real estate after having perused some of the trivial claims of celestial bodies ownership The only consequence these claims have on the plane of space law is to highlight the need for a better regulation of extraterrestrial landed property rights Next the book addresses the apparent silence of the law in the field of extraterrestrial landed property scrutinizing whether the factual situation on the extraterrestrial realms calls for legal regulations The sources of law are examined in their dual dimension that is the facts that have caused and shaped the law of extraterrestrial real estate and the norms which express this law It is found that the norms and rules regarding property rights in the celestial realms are rather limited failing to define basic concepts such as celestial body **Contemporary Authors New Revision Series**, 2001-08 In response to the escalating need for up to date information on writers Contemporary Authors New Revision Series brings researchers the most recent data on the world's most popular authors These exciting and unique author profiles are essential to your holdings because sketches are entirely revised and up to date and completely replace the original Contemporary Authors entries For your convenience a soft cover cumulative index is sent biannually While Gale strives to replicate print content some content may not be available due to rights restrictions Call your Sales Rep for details **Mind Over Matter** Ronald J. **Bibliographie Internationale de Science Politique** ,1999 *Do Think Tanks Matter?*

Donald E. Abelson,2009 Assessing the evolution and influence of public policy institutes **Do Think Tanks Matter?, Second Edition** Donald E. Abelson,2009-09-01 It is often assumed that think tanks carry enormous weight with lawmakers In Do Think Tanks Matter Donald Abelson argues that the basic question of how think tanks have evolved and under what conditions they can and do have an effect is consistently ignored Think tank directors often credit their institutes with influencing major policy debates and government legislation and many journalists and scholars believe the explosion of think tanks in the latter part of the twentieth century indicates their growing importance in the policy making process Abelson goes beyond assumptions identifying the influence and relevance of public policy institutes in today s political arena in the

United States where they've become an integral feature of the political landscape and in Canada where despite recent growth in numbers they enjoy less prominence than their US counterparts. By focusing on the policy cycle, issue articulation, policy formation and implementation, Abelson argues that individual think tanks have sometimes played an important role in shaping the political dialogue and the policy preferences and choices of decision makers but often in different ways and at different stages of the policy cycle. This revised and updated edition of the book includes up to date data 2000-08 on the growing visibility and policy relevance of think tanks in Canada and the United States. *Liberating Black Theology* Anthony B. Bradley, 2010-02-03 When the beliefs of Barack Obama's former pastor Rev. Jeremiah Wright assumed the spotlight during the 2008 presidential campaign, the influence of black liberation theology became hotly debated not just within theological circles but across cultural lines. How many of today's African American congregations and how many Americans in general have been shaped by its view of blacks as perpetual victims of white oppression? In this interdisciplinary biblical critique of the black experience in America, Anthony Bradley introduces audiences to black liberation theology and its spiritual and social impact. He starts with James Cone's proposition that the victim mind set is inherent within black consciousness. Bradley then explores how such biblical misinterpretation has historically hindered black churches in addressing the diverse issues of their communities and prevented adherents from experiencing the freedoms of the gospel. Yet *Liberating Black Theology* does more than consider the ramifications of this belief system; it suggests an alternate approach to the black experience that can truly liberate all Christ followers. *Freefall of the American University* Jim Nelson Black, 2012-12-03 It's happening in colleges all across the country. Instead of being educational institutions designed to encourage the free discussion of ideas, universities have become prisons of propaganda, indoctrinating students with politically correct and often morally repugnant ideas about American life and culture. This book exposes the liberal bias in today's universities, providing hard evidence in clear and unimpeachable terms that shows how today's colleges are covertly and overtly proselytizing with leftist slants on sexuality, politics and lifestyles. By naming names and providing specific and credible insights from faculty members, administrators, professional observers and analysts who have witnessed and chronicled the intellectual and ethical collapse taking place within the academy, this book offers a broad overview of the issues, the history of the problems, analysis from a broad range of academics and professionals and also observations of the university students themselves in their own words from schools all across the nation. *Applied Wisdom* Alexander Ineichen, 2021-11-16 Applying wisdom and avoiding foolishness are two sides of the same coin. Slipping away from either can lead to risky and uncertain situations. Luckily, author Alexander Ineichen has been collecting witticisms for thirty-five years that have made him successful in his career and life. In *Applied Wisdom*, he collects an anthology of wit and wisdom containing over 700 quotations from sources as wide-ranging as Thomas Aquinas and Frank Zappa. He provides entertaining food for thought for businesspeople and the general audience alike and enables readers to think outside the box to find wisdom. These nuggets along with his commentary for each are the

valuable words needed for those facing risk and uncertainty The witticisms provide a full range of being level headed truth seeking brutally heretical wonderfully insightful refreshingly politically incorrect and other intellectual treats and provocations The advice blending economics politics history philosophy psychology risk management and much more provides a winning mix of humor intellectual heft and economic survival tips Do Think Tanks Matter?, First Edition Donald E. Abelson, 2002-03-08 Do Think Tanks Matter evaluates the influence and relevance of public policy institutes in today's political arena Many journalists and scholars believe the explosion of think tanks in the latter part of the twentieth century indicates their growing importance in the policy making process This perception has been reinforced by directors of think tanks who often credit their institutes with influencing major policy debates and government legislation Yet the basic question of how and in what way they influence public policy has Donald Abelson contends frequently been ignored Abelson studies the experiences of think tanks in the United States where they have become an integral feature of the political landscape and in Canada where their numbers have grown considerably in recent years but where compared to their U S counterparts they enjoy less prominence in policy making By focusing on the policy cycle issue articulation that is getting issues on the political agenda and policy formation and implementation actually affecting the outcome of policies already on the political agenda he argues that think tanks have sometimes played an important role in shaping the political dialogue and the policy preferences and choices of decision makers but often in different ways and at different stages of the policy cycle
