Janet Bohlen explores the wider issues that are ultimately responsible for the success or failure of conservation efforts. In the course of her travels she came to appreciate the complex interaction of local and global needs and the reality of the political and social context in which all such efforts take place. In describing the scientists, their lives and their work, she effectively conveys the fundamental importance and ever-present challenge of a life devoted to protecting the environment. **Rio Grande National Forest (N.F.), Application for Transportation and Utility Systems and Facilities for the Village at Wolf Creek**, 2006      General Technical Report SRS, 1999      **Forestry Impacts on Freshwater Habitat of Anadromous Salmonids in the Pacific Northwest and Alaska** Michael L. Murphy, 1995. Presents a science overview of the major forest management issues involved in the recovery of anadromous salmonids affected by timber harvest in the Pacific Northwest and Alaska. The synthesis reviews salmonid habitat requirements and potential effects of logging, describes the technical foundation of forest practices and restoration, analyzes current federal and non-federal forest practices and recommends required elements of comprehensive watershed management for recovery of anadromous salmonids.
