Memory Rudolf Steiner,2020-05-07 What is the meaning of memory in the information age When all knowledge is seemingly digitised and available for reference at any time do we actually need human memory One consequence of the proliferation of digitization is the deterioration of our capacity to remember a symptom that is apparent in a steady increase in dementia within contemporary society Rudolf Steiner indicates that memory is the determining factor in awareness of oneself Even a partial loss of memory leads to loss of self consciousness and the sense of our I Thus memory is crucial for the development of I consciousness not only for the individual but for humanity as a whole Rudolf Steiner's research on memory recollection and forgetting has many implications for the way we learn for inner development and spiritual growth This unique selection of passages from his works offers insights into how consciousness can remain autonomous and creative in a digital environment It also provides ideas for improving education and emphasizes the importance of life long learning Chapters include The Development of Memory Throughout Human History The Formation of Memory Remembering and Forgetting in the Human Individual Remembering and Forgetting in Connection with Education How Remembering and Forgetting are Transformed by the Schooling Path Imagination and Inspiration Remembering Backwards R eckschau and Memory Exercises Subconscious Memories of the Pre birth Period and of Life Between Death and a New Birth Memory and Remembering after Death The Development of Memory in the Future The Politics of Dementia Irmela Marei Krüger-Fürhoff,Nina Schmidt,Sue Vice,2021-11-22 Memory loss is not always viewed purely as a contingent neurobiological process present in an ageing population rather it is frequently related to larger societal issues and political debates This edited volume examines how different media and genres novels auto biographical writings documentary as well as fictional

'Tricia Williams,2021-01-25 What happens to faith when Christians get dementia Here the unique voices of Christians who live with this illness bring insight and prompt theological reflection on the profound questions that dementia asks of faith Within the boundaries of a biblical agenda these

questions are explored using a model of orientation disorientation and reorientation reminiscent of Brueggemann's scheme to seek deeper understanding of faith experience and practice. Arising from the research, fresh theological insights and challenges for the church call for new creative practices to enable the faith nurture of disciples of Jesus living with this disease.
