Stuart Croft, Terry Terriff

Beyond 1995 The Future Of The Npt Regime Issues In International Security:

Beyond 1995 R.E. Pendley, J.F. Pilat, 2012-12-06 There is almost universal support for the view that the world would be an even more dangerous place if there were to be more nuclear weapon states There would be more fingers on more triggers and probably a greater risk that a trigger might be pulled with incalculable consequences It is easy to see therefore that there is a collective interest in avoiding the spread of nuclear weapons to further countries Nations do not however normally undertake or refrain from actions because of such a collective interest they do so because of their individual interests This is especially true in the field of national security A nation perceiving that it has a real interest in developing nuclear weapons is not very likely to refrain from doing so merely because it is told such development would be bad for the world community If the global interest in avoiding the spread of nuclear weapons to more countries is to succeed conditions that make it in the interest of each individual nation to renounce nuclear weapons need to be created or maintained Fortunately conditions have prevailed in which the vast majority of nations have seen an advantage in making legally binding nonproliferation commitments An important rationale for many of these countries has been that these commitments would facilitate the transfer of desired civil nuclear technology

The Future of the International Nuclear Non-Proliferation Regime Marianne van Leeuwen, 2023-10-20 The 1995 conference on the review and extension of the Nuclear Non Proliferation Treaty may well mark an important turning point The treaty itself but also the wider international regime built around it are at stake The Future of the International Nuclear Non Proliferation Regime deals with various aspects of the problems of nuclear proliferation and the international struggle against it Authors from Europe the United States and Australia have contributed to this book which was produced under the auspices of the Netherlands Institute of International Relations Clingendael The reader is first offered regional case studies on North Korea South Asia the Middle East and the former Soviet Union followed by chapters on nuclear safeguards and export controls systems and contributions on a Comprehensive Test Ban Treaty and security guarantees The two concluding chapters evaluate and propose policies to strengthen the non proliferation regime beyond 1995 It will be of interest to policy makers students of international relations and journalists

Nuclear Weapons in the Changing World Patrick J. Garrity, Steven A. Maaranen, 2012-12-06 Lawrence Freedman One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead This appeared as the ultimate question in the great nuclear debate of the early 1980s When put so starkly the answer appeared obvious better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike There were a number of points to be made against this Communist regimes had demonstrated the possibility of being both red and dead while the West had managed successfully to avoid the choice If we allowed nuclear disarmament to become an overriding priority this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow a point not lost on those in Eastern Europe who were then struggling against

repression and could not see why disarmament should be given a higher priority than freedom Now that the old communist states have liberated themselves and the West no longer risks conspiring in their enslavement there is a correspondingly reduced danger of mass death As a result and with so much else of immediate Lawrence Freedman Department of War Studies King s College University of London London WC2R 2LS England Nuclear Weapons in the Changing World Perspectives from Europe Asia and North America

Challenges to American National Security in the 1990s M. Nacht,A. Nichols,G.H. Quester,J.J. Weltman,2012-12-06 The decade of the 1990s offers a chance to build a new and better international order What policy choices will this decade pose for the United States This wide ranging volume of essays imaginatively addresses these crucial issues The peaceful revolutions of 1989 1990 in the Soviet Union and Eastern Europe have swept away the foundations of the Cold War The Eastern European nations are free Europe is no longer divided Germany is united The Soviet threat to Western Europe is ending with the collapse of the Warsaw Pact and the withdrawals and asymmetrical cuts of Soviet forces And U S Soviet rivalry in the Third World is giving way to cooperation in handling conflicts as in Iraq and elsewhere Much of course remains uncertain and unsettled What sort of Soviet Union will emerge from the ongoing turmoil with what political and economic system and what state structure How far and how soon will the Eastern Euro pean states succeed in developing pluralist democracies and market economies Are the changes irreversible Certainly there will be turmoil backsliding and failures but a return to the Cold War hardly seems likely

European Security in the 1990s W. Laqueur,L. Sloss,2013-11-11 Rarely if ever have the political economic and military foundations of the Western Alliance been in such a state of flux Walter Laqueur and Leon Sloss therefore deserve credit not just for the quality of the analysis in this superb book but also for the timeliness of its appearance As Laqueur says in his chapter Touring the Western European Defense Hori zon if the likely development of European defense policies is not particularly reassuring at least it gives no grounds for despair The list of problems we face is a daunting one First there is the spiralling cost of defense expenditures particularly in the absence of significant NATO or inter European cooperation This is particu larly serious in light of the reluctance to increase or even maintain current expen ditures in the midst of Mikhail Gorbachev s peace offensive and the extraordinary changes in Eastern Europe both of which have had a dramatic impact on Western public opinion There is also a problem in the perceived relative economic decline of the United States vis a vis Western Europe and Japan which only exacerbates calls to reduce the number of American troops in Europe Other dangers to the political cohesion and military credibility of the alliance include demographic trends that threaten current manpower levels transatlantic acrimony over the burden sharing issue and political pressures particularly in West Germany toward denucleariza tion and even neutralism

Critical Reflections on Security and Change Stuart Croft,Terry Terriff,2013-02-01 The contributors reflect critically on security studies since the 1980s They conclude that analysts and policy makers have not been able to respond well to the changes that have occurred and that they must revise their approach if they are to meet the challenges of the future

Nuclear Disarmament in International Law Haralambos Athanasopoulos, 2000-02-01 When German physicists Otto Hahn and Fritz Strassman first split the uranium atom in 1938 they might have little imagined the potential power their experiments had unleashed Since the United States successfully detonated the first atomic weapons in 1945 the entire world has lived in fear of annihilation Technological advances in weaponry and importantly their delivery systems have only heightened the sense of dread Yet since the end of World War II world governments have been unable to agree on a strategy for nuclear disarmament This led first to the Cold War and ultimately to the proliferation of nuclear weapons throughout the world This work examines the nuclear question within the framework of international law The advent of the nuclear age and its impact on postwar peace and law is first covered This is followed by analyses of the initial United Nations disarmament initiatives and the reasons they were doomed from the start The globalization of the Cold War the expansion of the nuclear arms race and the START treaties and the legacy of 1970s era detente efforts in the years leading up to the end of the Cold War are then detailed How the United Nations reacted to the end of the Cold War and the prospects for disarmament in the 21st century are the subjects of the concluding section

Networked Nonproliferation Michal Onderco, 2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty was extended indefinitely and without a vote *Networked Nonproliferation* offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With *Networked Nonproliferation* Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power

Regional Pathways to Nuclear Nonproliferation Wilfred Wan, 2018 This book makes a case for a reorientation of the nuclear nonproliferation regime posing an alternative conceptualization of nuclear order centered on the regional level It draws on an array of theoretical tools from the literatures on regionalism security governance and international institutions developing a framework that analyzes the conditions that would allow for more robust regional nuclear cooperation These include the presence of 1 institutional architecture 2 political economic and military relations among states and 3 fundamental regional awareness and identity Wan then deploys this theoretical approach to several case studies including Northeast Asia Southeast Asia and the Middle East focusing on two interrelated questions First what is the viability of a stronger regional

nuclear order in the region Second what form would such an order most likely take In the process the book identifies the magnitude and character of the proliferation challenge specific to each region It also considers the existing character of nuclear cooperation at the regional level Wan presents the historical development of regional nuclear order in Latin America as a model for the rest of the world In this area regional institutions ranging from organizations to dialogues to ad hoc arrangements gradually became more involved across economic environmental and human security domains providing the foundation for multilateral cooperation in the nuclear arena As his analysis shows in light of the contemporary proliferation landscape the establishment and strengthening of such regional nuclear orders is essential

Legal Resolution of Nuclear Non-Proliferation Disputes James D. Fry, 2013-12-19 James Fry explores the use of international courts and tribunals to settle disputes over nuclear weapons and nuclear material

Foreign Affairs, 1992

The Future: Warfare, military forces and technology, 1993

World Politics and the Evolution of War John J. Weltman, 1995 In this comprehensive study international relations scholar John Weltman explores the many roles of war in world politics With topics ranging from the development of strategic thought to the effects on war of political and technological change from the uses of force and threats of force to the uses of arms control from the prominence of war in history to its likely fate in the post Cold War world Weltman s analysis offers a detailed thoroughgoing and rigorous overview of the subject Throughout Weltman questions a number of widely held assumptions To the conventional argument that the number of players in the international system determines the incidence and character of war he responds with evidence that suggesting that the social material and intellectual context within which conflicts occur is far more influential Weltman also questions the prevailing wisdom that democracies are inherently peaceful and autocracies inherently warlike arguing instead that the propensity to wage war and the effects of war are largely the products of prevailing expectations whether or not war offers a means for the cheap easy and decisive accomplishment of a government s objectives And he criticizes the dominant view that conflict even violent conflict is psychologically abnormal Drawing upon the traditional distinction between wars of attrition and wars of annihilation Weltman sees the trend toward the former despite the anomalous Persian Gulf conflict as likely to continue While this trend does not suggest the end of warfare much less the end of history it does imply the localization of conflict and the minimization of the danger of global conflagration The new world order Weltman concludes will be far from peaceful but the conflicts that do arise will be slow burning and difficult to spread Outside intervention in these conflicts will be costly

The Future of the Non-Proliferation Treaty Darryl Howlett, John Simpson, 2016-07-27 In 1995 a Conference is to be convened to review and extend the Treaty on the Non-Proliferation of Nuclear Weapons NPT The Future of the NPT brings together a distinguished group of individuals including the elected President of the 1995 NPT Conference to analyse four crucial agenda areas relevant to the Conference the preConference activities to be undertaken by both States Parties and the Conference Secretariat those security issues that relate to a review of the treaty such as nuclear disarmament and security

assurances peaceful uses and verification questions and regional issues With nuclear nonproliferation currently occupying a prominent position on the international security agenda the 1995 Conference offers a unique opportunity for a constructive discussion on these areas and it is hoped that this volume will provide a contribution to that end

Constructing the World Polity John Gerard Ruggie,2002-09-11 Ruggie is one of the most important and influential International Relations theorists of the last twenty years Brings together in one volume Ruggie s most influential theoretical ideas Includes extensive introduction and material covered by essays is contextualised throughout the book Controversial includes an extended critique of mainstream theorizing

The Nuclear Non-Proliferation Regime Raju G.C. Thomas,2016-07-27 Leading international security scholars and policy advisors from universities think tanks and nuclear weapons laboratories in the United States analyze the future of nuclear weapons proliferation In April 1995 the earlier 1970 Nuclear Non Proliferation Treaty was renewed indefinitely and without change to the original clauses of the treaty The authors examine the continuing relevance or irrelevance of the old treaty the role of coercive sanctions in enforcing restraint and the impact of biological chemical and missile proliferation on the nuclear motives and ambitions of various states Attention is given to proliferation conditions in the former Soviet republics East and South Asia and the Middle East

European Security without the Soviet Union Stuart Croft,Phil Williams,2021-01-26 This book first published in 1992 examines the changing post Cold War changing patterns of security in Europe by analysing the major themes the primary security organisations and the policies of countries at the forefront of the security debate Leading experts discuss the problems of nationalism the difficulties of peacekeeping in Europe and the future of NATO

Legal Issues of Inter-Korean Economic Cooperation under the Armistice System Eric Yong-Joong Lee,2002-09-01 This unique work examines the highly topical national and international legal issues of economic cooperation between North and South Korea under the current divided situation In recent years the relationship between the two Koreas has been generating more concern than in earlier times This new interest has been followed by two epoch making developments over the past decade the conclusion of the Basic Agreement of 1991 and the Declaration of the North South Summit of 2000 These events have caused remarkable changes in political as well as economic relations between the north and the south This book reviews the current legal regime and the setting up of a positive legal framework for inter Korean economic cooperation beginning to be regulated by international law This research provides two ultimate outcomes One is to resolve the legal problems for transnational economic cooperation relating to North and South Korea the other is to develop a juridical model of south north cooperation as a new world economic framework for the 21st century Three interrelated areas are involved in this work The first part describes the external environmental factors regarding inter Korean economic cooperation from an international legal perspective The second part deals with the legal framework of inter Korean economic cooperation examining concrete issues arising from practical economic exchanges and cooperation between the two Koreas The last part discusses the legal foundations for inter Korean

economic integration beyond economic cooperation This book clarifies the significance of the legal environment as an indispensable servant for the parts of a divided country to recover their relationship offering both a normative and practical framework **The New Europe** ,1992 *Five Minutes Past Midnight* Guy B. Roberts,1996 Growing stockpiles of nuclear weapons grade fissile materials plutonium and highly enriched uranium are a clear and present danger to international security Much of this material is uncontrolled and unsecured in the former Soviet Union FSU Access to these materials is the primary technical barrier to a nuclear weapons capability since the technology know how for a bomb making is available in the world scientific community Strategies to convince proliferators to give up their nuclear ambitions are problematic since those ambitions are a part of largest regional security There is no national material control and accounting in Russia No one knows exactly how much fissile materials they have and if any is missing A bankrupt atomic energy industry unpaid employees and little or no security has created a climate in which more and more fissile materials will likely be sold in black markets or diverted to clandestine nuclear weapons programs or transnational terrorist groups Control over these materials will ultimately rely on the continuous and simultaneous exercise of several measures While there is little one can do now to stop a determined proliferator over time international consensus and a strengthened non proliferation regime will convince proliferators that the costs outweigh the gains
