Beyond A Western Bioethics Voices From The Developing World Clinical Medical Ethics:

Beyond a Western Bioethics Angeles Tan Alora, Josephine M. Lumitao, 2001-07-20 In *Beyond a Western Bioethics* physicians Angeles Tan Alora and Josephine M Lumitao join eight other contributors to provide a comprehensive exploration of bioethical issues outside of the dominant American and western European model Using the Philippines as a case study they address how a developing country's economy religion and culture affect the bioethical landscape for doctors patients families and the society as a whole American principles of medical ethics assume the primacy of individual autonomy the importance of truth telling and secular standards of justice and morality In the Philippines these standards are often at odds with a culture in which family relationships take precedence over individualism and ideas of community friendship and religion can deeply influence personal behavior Pervasive poverty further complicates the equation Contributors move from a general discussion of the moral vision informing health care decisions in the Philippines to an exploration of a wide range of specific cases family planning care of the elderly organ transplants death and dying medical research AIDS care doctor patient relationships informed consent and the allocation of scarce health care resources Written for both students and professionals the book provides a much needed perspective on how medical ethics are practiced in a developing nation and it successfully challenges the wisdom of global bioethical standards that do not account for local cultural and economic differences *Beyond a Western Bioethics* Angeles Tan Alora, 2010

Beyond a Western Bioethics Angeles Tan-Alora, Josephine M. Lumitao, 2001 American principles of medical ethics assume the primacy of individual autonomy the importance of truth telling and secular standards of justice and morality In the Philippines these standards are often at odds with a culture in which family relationships take precedence over individualism and ideas of community friendship and religion can deeply influence personal behavior flyleaf [The Hackett Introduction to Medical Ethics](#) Matthew Altman, Cynthia Coe, 2025-08-18 [The Hackett Introduction to Medical Ethics](#) addresses key debates and analyzes prominent ethical perspectives on clinical medicine healthcare policy and human experimentation Using numerous examples and case studies Altman and Coe apply value theory to contemporary medical practice and trace the repercussions for such philosophical issues as autonomy death and justice The book invites a range of readers to investigate urgent moral questions at the intersection of the body and social institutions Free online resources to support [The Hackett Introduction to Medical Ethics](#) will be available on the book title page at www.hackettpublishing.com in early fall 2025 Resources will include PowerPoint lecture slides a sample syllabus links to case studies to help facilitate small group discussion and apply theoretical concepts and more

Bioethics Critically Reconsidered H. Tristram Engelhardt, 2011-11-19 Bioethics developed as an academic and clinical discipline during the later part of the 20th century due to a variety of factors Crucial to this development was the increased secularization of American culture as well as the dissolution of medicine as a quasi guild with its own professional ethics In the context of this moral vacuum bioethics came into existence Its raison d'être was

opposition to the alleged paternalism of the medical community and traditional moral frameworks yet at the same time it set itself up as a source of moral authority with respect to biomedical decision making Bioethics serves as biopolitics in so far as it attempts to make determinations about how individuals ought to make medical decisions and then attempts to codify that in law Progressivism and secularism are ultimately the ideology of bioethics An African Research Ethics Reader, 2024-06-11 Cultural research ethics is in a nascent phase within the field of research ethics as a whole and requires more attention and in depth articulation With specific case studies this vital volume provides unique perspectives on topics such as social autonomy vis a vis interests of individuals This volume assembles needed resources and case studies in cultural research ethics practices providing insight into current developments and future research directions It is a valuable contribution to cultural research ethics given the dearth of published literature available in this emerging field It is designed with two broad audiences in mind 1 African researchers and research organizations that want homegrown guidance about research ethics and 2 research ethicists worldwide who can use it to learn about cultural research ethics especially with respect to Africa **Ethics for International Medicine** Anji E. Wall, 2012 A handy guide to identifying analyzing and resolving ethical issues that arise in international medicine **Allocating Scarce Medical Resources** H. Tristram Engelhardt Jr., Mark J. Cherry, 2002-05-20 Roman Catholic moral theology is the point of departure for this multifaceted exploration of the challenge of allocating scarce medical resources The volume begins its exploration of discerning moral limits to modern high technology medicine with a consensus statement born of the conversations among its contributors The seventeen essays use the example of critical care because it offers one of the few areas in medicine where there are good clinical predictive measures regarding the likelihood of survival As a result the health care industry can with increasing accuracy predict the probability of saving lives and at what cost Because critical care involves hard choices in the face of finitude it invites profound questions about the meaning of life the nature of a good death and distributive justice For those who identify the prize of human life as immortality the question arises as to how much effort should be invested in marginally postponing death In a secular culture that presumes that individuals live only once and briefly there is an often unacknowledged moral imperative to employ any means necessary to postpone death The conflict between the free choice of individuals and various aspirations to equality compounds the challenge of controlling medical costs while also offering high tech care to those who want its possible benefits It forces society to confront anew notions of ordinary versus extraordinary and proportionate versus disproportionate treatment in a highly technologically structured social context This cluster of discussions is enriched by five essays from Jewish Orthodox Christian and Protestant perspectives Written by premier scholars from the United States and abroad these essays will be valuable reading for students and scholars of bioethics and Christian moral theology *The Bristol Law Journal* Nasrul Ismail, LLB Hons (Bristol 2007), Visiting Research Fellow, School of Law, University of Bristol, Michael Boulton, LLB Hons (Reading, 2000), LLM Candidate (Bristol, 2013), Mike Blitz,

LLB Hons (Bristol, 2011), LLM (Bristol, 2013), 2013-12-31 The Bristol Law Journal is composed of academic articles written by either current or alumni students of the University of Bristol Contributors were asked to submit articles on Law Reform in any area of their choice and this broad mandate has produced a richly diverse range of reading

Bioethics Education in a Global Perspective Henk A.M.J. ten Have, 2014-09-25 This book critically analyses experiences with bioethics education in various countries across the world and identifies common challenges and interests It presents ethics teaching experiences in nine different countries and the basic question of the goals of bioethics education It addresses bioethics education in resource poor countries as the conditions and facilities are widely different and set limits and provide challenges to bioethics educators Further the question of how bioethics education can be improved is explored by the contributors Despite the volume of journal publications agreement on bioethics education is rather limited There are only few examples of core curricula demonstrating consensus on the contents goals methods and assessment of teaching programs We need ask How can agreement on the best modalities of bioethics education be promoted

Community Genetics and Genetic Alliances Aviad E. Raz, 2009-09-10 The social and bioethical aspects of carrier testing and its assimilation by specific groups are examined through several qualitative case studies in traditional religious ethnic as well as modern secular consumerist communities in Israel and the U S Comparing the views of community members and health professionals the analysis offers a new look on the relations between eugenics and genetic responsibility

Radiology in Global Health Daniel J. Mollura, Anne-Marie Lugossy, Lauren Fuller Kulinski, 2025-07-14 This third edition provides a definitive comprehensive and multidisciplinary reference for a diverse healthcare audience to navigate the complexities of radiology service planning implementation and diagnostics in low and middle income countries LMICs and resource limited medically underserved regions This book integrates clinical approaches with concepts of project planning to assist radiology professionals public health specialists and students to implement medical imaging in under served and resource constrained contexts to improve global health outcomes and optimize the use of radiologic technologies The first section of the book introduces the general role of radiology in international public health to help readers i understand the impact of medical imaging on health disparity ii learn how to assess radiologic service infrastructure in low resource environments and iii learn how to plan projects aiming to address health care shortages The second section of the book presents clinical contexts for deploying radiology such as pediatrics trauma infectious disease and cancer control Themes from the two sections are interwoven so that the learner can integrate concepts of project development with clinical objectives For example the chapter on information technology IT reinforces the chapter on cancer control by addressing IT solutions applicable to cancer management in medically underserved areas All chapters have been fully updated and this edition adds chapters on artificial intelligence COVID and breast imaging as well as others This is an ideal guide for radiologists and medical professionals working in LMICs and resource limited medically underserved regions

Kidney for Sale by Owner Mark J. Cherry, 2015-12-28 If most

Americans accept the notion that the market is the most efficient means to distribute resources why should body parts be excluded Each year thousands of people die waiting for organ transplants Many of these deaths could have been prevented were it not for the almost universal moral hand wringing over the concept of selling human organs Kidney for Sale by Owner now with a new preface boldly deconstructs the roadblocks that are standing in the way of restoring health to thousands of people Author and bioethicist Mark Cherry reasserts the case that health care could be improved and lives saved by introducing a regulated transplant organs market rather than by well meant but misguided prohibitions Bioethics Across Borders Chikezie Onuoha,2007 *Medical Humanities Review* ,1998 MHR ,1987 Excellence In Dementia Care: Research Into Practice Downs, Murna,Bowers, Barbara,2014-09-01 A comprehensive text on dementia care drawn from research evidence practice and the experience of people with dementia Handbook of Psychiatry in Palliative Medicine Harvey Max Chochinov,William Breitbart,2009 Eight years has passed since the first edition of The Handbook of Psychiatry in Palliative Medicine was published In that time psychiatric or psychosocial palliative care has evolved the net effect on palliative medicine has been transformative Palliation that neglects psychosocial dimensions of patient and family experience de facto fails to meet contemporary standards of comprehensive palliative care While a focus on somatic issues has sometimes overshadowed attention to psychological existential and spiritual end of life challenges the past decade has seen an all encompassing multi disciplinary approach to care for the dying beginning to take hold The first comprehensive textbook of psychiatric palliative care this new edition has been fully updated reorganized and expanded to include eleven new chapters Written by 67 internationally known psychiatry and palliative care experts the book is truly an essential reference for all providers of palliative care including psychiatrists psychologists mental health counselors oncologists hospice workers and social workers Each chapter has been updated to address new therapeutic modalities and approaches as well as new research trends and opportunities for each topic *Choice* ,2001 **Globalization and Responsibility** Zlatan Delic,2012-06-29 The book Globalization and Responsibility consists of 8 chapters The chapters in the book offer a decentered and dynamic terminology They show that globalization consists of not only an objective process but also of a lot of statements that define describe and analyze the different experiences of the process The chapters are written by authors and researchers from different academic disciplines cultures and social contexts therefore different experiences and scientific analyses on the consequences of globalization have been unified starting from the multicultural and social epistemology to ethics of responsibility Each chapter can be read separately but in a complex interconnected global universe of intertextuality of our world
