Beyond the Line Georg Berkemer,Derek L. Elliot,Ute Fendler,Margret Frenz,Michael Mann,Ineke Phaf-Rheinberger,Sebastian R. Prange,Ana Sobral,Frank Schulze-Engler,2014-04-23 The title of Beyond the Line refers to the

imaginary Line drawn between North and South a division established by the Peace Treaty of Cateau Cambr sis in 1559 This is an early modern time and Eurocentric construction according to which the southern oceanic world has long been taken as symbol of expansionist philosophies and practices An obvious motivation for changing this Line division is the growing influence of the Global South in the contemporary economic and political setting However another motivation for changing opinions in regard to the Line is equally important We observe an emergent consciousness of the pivotal role of the oceanic world for human life This requires the reformulation of former views and raises numerous questions A diversity of connections comes to the mind which demands the composition of a catalogue of case studies with an oceanic horizon Through this operation different problems are being linked together Which problems encounter historians with their research on fishes in the archives How to trace records about pirates of non European descent in the Indian Ocean Which role play the Oceans as mediators for labor migrations not only of the Black Atlantic but also of people moving from Asia to Africa and vice versa What do we know about workers on the oceans and their routes When considering oceans as contact zones with which criteria can their influence in different literary texts be analyzed Is it possible to study nationalisms taking into account these transoceanic relationships And how do artists address these questions in their use of the media Against the background of this catalogue of oceanic questions old stories are told anew Sometimes their cultural stereotypes are recycled to criticize political and social situations Or in other cases they are adopted for elaborating alternative options In this sense the contributions concentrate on countries like India Kenya Angola or Brazil and cover different academic fields A variety of objects and situations are explored which have been and still are determinant for the construction of cultural narratives in view of the modified relationship with the geographically southern oceanic regions

Beyond Algorithms James Luke, David Porter, Padmanabhan Santhanam, 2022-05-29 With so much artificial intelligence AI in the headlines it is no surprise that businesses are scrambling to exploit this exciting and transformative technology Clearly those who are the first to deliver business relevant AI will gain significant advantage However there is a problem Our perception of AI success in society is primarily based on our experiences with consumer applications from the big web companies The adoption of AI in the enterprise has been slow due to various challenges Business applications address far more complex problems and the data needed to address them is

less plentiful There is also the critical need for alignment of AI with relevant business processes In addition the use of AI requires new engineering practices for application maintenance and trust So how do you deliver working AI applications in the enterprise Beyond Algorithms Delivering AI for Business answers this question Written by three engineers with decades of experience in AI and all the scars that come with that this book explains what it takes to define manage engineer and deliver end to end AI applications that work This book presents Core conceptual differences between AI and traditional business applications A new methodology that helps to prioritise AI projects and manage risks Practical case studies and examples with a focus on business impact and solution delivery Technical Deep Dives and Thought Experiments designed to challenge your brain and destroy your weekends

Beyond the Genre Stefano Calzati, 2018-11-26 What is the cultural value of travel writing today How is the genre affected by instant communication and digital technologies This volume provides answers to these questions through adopting a transmedial perspective by comparing printed travel books and travel blogs Notably it explores how different editorial and medial choices impact on the cultural practices of travelling and writing Methodologically an ethnography is proposed via the discussion of a number of original interviews collected over three years with contemporary travel authors and bloggers who journeyed around and wrote about China These writers are from both the West the UK the USA Italy France New Zealand and China Hong Kong and the Mainland As such the volume not only deconstructs the English centredness and ethnocentrism that often affect travel writing as a genre as well as many studies on it but it also renews the academic debate on the politics behind the genre connecting the texts with their spheres of production and reception The study shows the interdependence between medial and literary features on the one hand and the ways of journeying and writing about the experience which largely depend upon the biography of each writer on the other

Economics and Politics in the Robotic Age Qing-Ping Ma, 2024-01-03 This book shows that the rapid development of artificial intelligence AI and robotics is a natural consequence of the development of human society It examines the history of production from the Stone Age to the present progressing from the manual age to the machine age and then to the robotic age From the perspective of economics and human physiology this book explains how AI and robotics will reshape the economy and society and how individuals firms and governments should prepare for the advent of the robotic age
