**The Dilemmas of Social Democracies** Howard Richards, Joanna Swanger, 2008-01-01 The Dilemmas of Social Democracies seeks to advance the eradication of poverty and the ethical construction of social democracy and sustainable peace Howard Richards and Joanna Swanger argue that the reason that capitalism resists transformation and that social democracy is so hard to achieve is because of the philosophical and institutional underpinnings\_ the constitutive rules\_ of capitalism the book therefore explores the historical origins of these rules their implications for blocking progress toward social justice and how they can be improved *Dare to Care* Louis Bohrtlingk, 2011-11-01 Dare to Care a collection of ideas and initiatives to change finance as we know it is a platform for global citizens to work together and maneuver through the world economic and financial crisis The ideas presented within of changing our mindset from a money first to a care first attitude are meant to stimulate thoughts about our current monetary system and economy and how we truly want them to function Author Louis B htlingk presents a workable method for us to change the way we think and feel about money using it instead to support our fellow man the Earth and the gifts we all receive through each other and our planet Dare to Care stresses that with a care first approach money can support our efforts to create a better world without greed or fear of going without B htlingk shares his vision for a love based economy and a care first world using examples of businesses organizations communities and individuals who have made this approach work for them and those they serve Dare to Care encourages readers to approach finance and economics from a new perspective one which urges them to reorganize their own approach to money and empowers them to act and achieve a care first worldview In my 25 years as an entrepreneur there has been a rule to keep one s heart out of business decisions Dare to Care boldly disrupts this rule with a vision of finance and economics that integrates heart and mind left and right brain and weaves hard economic facts with lyrical poetry It highlights thriving businesses banks and non profits which employ Care First vs Money First as a long overdue pathway to true sustainability for all people of the world Leslie Danziger Co founder and former Chairman of Solaria Corporation USA Louis B htlingk has given us a clear way to create a renewed sense of how to assess the tools we have and our needs The poetry of Dare to Care is a personal policy that should become the basis of a newly defined economic policy for all How do we turn it into a new course book for candidates seeking Economic PhD degrees Michaela Walsh President Founder of Women s World Banking USA LOUIS B HTLINGK is a visionary who has worked as a counselor for more than 30 years With his wife Sandra he has created multiple platforms with which to address the money issues that individuals and companies experience Louis is also the creator of the Meeting the Mystery of Money workshop which has been held throughout the U S the U K and the Netherlands and helps individuals to reorganize their finances and lives with a care first approach You can learn more

Korten, 2010-05-07 From the bestselling author of *When Corporations Rule the World* An extensively researched powerfully argued eye opening critique of how today's corporate capitalism is destroying the things of real value in the world like cancer destroys life Portrays a hopeful future alternatives to a corporate dominated and money ruled world in showing how to restore health to markets democracy and every day life Offers practical suggestions for individuals who want to contribute to the process of change Co published with Kumarian Press There is a deep chasm between the promises of the new global capitalism and the reality of social breakdown spiritual emptiness and environmental destruction it is leaving in its wake In this important book David Korten makes a compelling and well documented case that capitalism is actually delivering a fatal blow not only to life but also to democracy and the market Among his startling ideas Capitalism is a pathology that commonly afflicts market economies in the absence of vigilant public oversight Since the economy internal to a corporation is a planned economy the current consolidation of economic control

under a handful of global corporations is a victory for central planning not the market economy The alternative to the new global capitalism is a global system of thriving healthy market economies that function as extensions of healthy local ecosystems to meet the livelihood needs of people and communities Radical as such proposals may seem they actually reflect processes that are steadily gaining momentum around the world The Post Corporate World provides a vision of what's needed and what's possible as well as a detailed agenda for change Korten shows that to have a just sustainable and compassionate society concentrated absentee ownership and footloose speculative capital as embodied in the global for profit public corporation must be eliminated in favor of enterprises based on patient rooted stakeholder ownership limited to those who have a stake in the firm as a worker supplier customer or member of the community in which it is located Korten outlines numerous specific actions to free the creative powers of individuals and societies through the realization of real democracy the local rooting of capital through stakeholder ownership and a restructuring of the rules of commerce to create mindful market economies that combine market principles with a culture that nurtures social bonding and responsibility Like Korten's previous bestseller When Corporations Rule the World this provocative book is sure to stimulate national dialogue and debate and inspire a bevy of grassroots discussions and initiatives The Post Corporate World presents readers with a profound challenge and an empowering sense of hope
