Beyond The Firmament Understanding Science And The Theology Of Creation:

Beyond the Firmament Gordon J. Glover, 2007 As debates within the Church over the scientific details of creation become more frequent the experts seem to grow more entrenched while the rest of us only become more confused Somewhere between the endless arguments over distant starlight and Carbon 14 dating calculating the mathematical improbabilities of things that already exist and parsing ancient Hebrew and Greek somebody needs to ask the simple question If 3 500 years of scientific progress can't help modern Christians figure out Genesis then how could the ancient Israelites possibly have understood it so well What secret did this newly liberated gaggle of Hebrew nomads take with them out of Egypt that holds the key to understanding God's telling of His own creation story Beyond the Firmament challenges all creationist camps whether Young Earth Old Earth or Theistic Evolutionist to step outside of traditional paradigms and recognize how our modern Western post Enlightenment scientific worldview actually blinds us from seeing the simple truth of Creation as it was originally intended and how our failure to grasp the theological significance of the Biblical creation model puts science and faith on a collision course

Thoughts on the Genesis of the Universe, Science, and the Divine Spiritual World Thomas Bridge, 2022-08-01 This is a partial summary of the ongoing quest by mankind to understand who he is where he came from how he relates to what his senses tell him about his physical and social environment Does the continuum of change he experiences have a purpose other than what he gives it His methods of inquiry and observations using created instruments and experimentation have allowed him to discover some of the history of the universe since the beginning of space time Also the interpretation of the earth's history recorded in the rocks and rock structures the history of life recorded as fossils in time rock sequences and their relation to present day living forms and associated environments has become more clear as to man's place in the history of space time All these studies have led to a better understanding of how energy drives the forces at work that produce the ever changing present What are changes in the future that are believed by some to be even more remarkable than the amazing physical changes and processes that have been observed in the history of space time

How the World Was Made K B Napier, 2018-09-24 This book could have been ten times longer but it serves the purpose of introducing Christians to the truth concerning the beginning of the world and the universe The first three chapters of Genesis describe historical facts not myths as the Hebrew texts prove Most quotes are by scientists Evolutionists jealously guard their failed hypothesis because as they say they cannot let God get a foothold in science In itself this is an admission of anxiety that truth will one day be shown and it is NOT found in scientism which is the fake version of science There are absolutely NO proofs for evolution But how many know this Evolutionists are so scared of this truth getting out they will resort to legal restraints They are so afraid they enforce evolution only in schools by intimidation and false science and denigrate students in universities for daring to question evolutionary orthodoxy Yet genuine scientists KNOW evolution is fake They hate God That's it

The Evolution of Adam Peter Enns, 2021-10-19 Can Christianity and evolution coexist

Traditional Christian teaching presents Jesus as reversing the effects of the fall of Adam But an evolutionary view of human origins doesn't allow for a literal Adam making evolution seemingly incompatible with what Genesis and the apostle Paul say about him For Christians who both accept evolution and want to take the Bible seriously this can present a faith shaking tension Popular Old Testament scholar Peter Enns offers a way forward by explaining how this tension is caused not by the discoveries of science but by false expectations about the biblical texts In this 10th anniversary edition Enns updates readers on developments in the historical Adam debate helping them reconcile Genesis and Paul with current views on evolution and human origins This edition includes an afterword that explains Enns's own theological evolution since the first edition released

Judgment and Salvation Dustin G. Burlet, 2022-11-03 This book contends the text of the Noachian deluge narrative categorically underscores all God did to preserve life in spite of the disaster Despite the picture of devastation that the narrative depicts the prominent emphasis of the text is on deliverance and redemption i.e. salvation not judgment The focus of the Genesis flood is acutely bent towards God's salvific rather than punitive purposes The arc of salvation within the flood narrative can be broken down into two main ideas Firstly God's intention for creation is not thwarted and secondly God commits himself to his intentions of creation God's intention for creation can be stated thus the establishment of order via covenant showing the sanctity of human life and the upholding of all life This involves in particular humanity as his image bearers including the lex talionis life for life principle

The Species Problem Igor Ya. Pavlinov, 2023-02-24 The general notion of species is one of the most fundamental in biology But an idea of species is also one of the most persistent unresolved obsessions of biologists philosophers and theoreticians This new book investigates the multifaceted problem species as a conceptual envelope of that notion Contemporary conceptualists and evolutionary epistemology allow for a fresh look by analyzing the framework of history viewed as changes ordered by changing philosophical scientific contexts In this analysis the species problem is characterized in a pluralistic non-trivial manner in contrast to a more monistic accepted view

Key Features Provides new insights into the persistent species problem Focuses on conceptual history and identifies pivotal landmarks in the history of the concept of species Argues for a scientific consistency of species pluralism Discusses the evolving species hood in the context of new essentialism

The Christian Delusion John W. Loftus, 2010-04-20 In this anthology of recent criticisms aimed at the reasonableness of Christian belief a former evangelical minister and apologist author of the critically acclaimed *Why I Became an Atheist* has assembled fifteen outstanding articles by leading skeptics expanding on themes introduced in his first book Central is a defense of his outsider test of faith arguing that believers should test their faith with the same skeptical standards they use to evaluate the other faiths they reject as if

they were outsiders Experts in medicine psychology and anthropology join Loftus to show why when this test is applied to Christianity it becomes very difficult to rationally defend Collectively these articles reveal that popular Christian beliefs tend to rely on ignorance of the facts Drawing together experts in diverse fields including Hector Avalos Richard Carrier David Eller and Robert Price this book deals a powerful blow against Christian faith Science and Religion Nancy Morvillo,2010-03-18 From the heliocentric controversy and evolution to debates on biotechnology and the environment this book offers a balanced introduction to the key issues in science and religion A balanced introductory textbook which fully spans the interface between science and religion and includes illustrations of scientific concepts throughout Explores key historical issues including the heliocentric controversy and evolution but also topics of current importance such as biotechnology and environmental issues Appendices include a wide range of biblical readings excerpts from early philosophers theologians and scientists including Aristotle Aquinas Hume Kant Galileo Newton and Darwin and short works from twentieth and twenty first century scientists and theologians Accessibly structured in to sections covering cosmology evolution and ethics in a scientific age Provides significant coverage of scientific information and balanced explanations of the key debates for introductory students **Perspectives on Science and Christian Faith** ,2007 *Origins* Paul Copan,Douglas Jacoby,2018-08-28 An excellent introduction to the challenges and benefits of reading Genesis 1 11 as a genuinely ancient specifically ancient Near Eastern text Iain Provon author of Seriously Dangerous Religion Origins turns much of what Christians learned in Sunday School on its head in a revealing comparison of the Genesis narrative to the competing pagan narrative of the day Relatively few Bible readers are familiar with the world of the ancient Near East centered in Mesopotamia and its most prominent city Babylon The culture literature religions geography etc of the early biblical period dramatically influenced what was written and why and without an understanding of these elements the purposes meanings and structure of the text are easily misread by modern readers and reduces the primeval narrative to a collection of Sunday School stories Origins while acknowledging the agendas of modern readers remains on track in expounding on the ancient agenda Paul Copan and Douglas Jacoby address the doubts of those who find stumbling blocks in early Genesis facing the tough questions head on and providing biblical solution to many of the problem passages Origins surprises and amazes all seekers new believers and veterans of Scripture alike as it devastates the polytheistic pagan assumptions and proclaims the true God A fine addition to the ever increasing library of books concerning Genesis One also hopes that this volume might be leveraged as an apologetics tool to help those looking for theistic viewpoints on Creation Dustin Burlet Conspectus This book can be a helpful apologetic and alternative view for those in the church who have only heard a literal approach to Genesis 1 11 and are looking for something different Renew org **Systematic Theology** Augustus Hopkins Strong,1893 **Church And Grace Age: Theological Explanation of State of Church, Nations, and the Cosmos at End Times** Plammoottil V. Cherian Ph. D,2024-06-05 From a thorough understanding of the human history

from a Biblical perspective and knowledge in science and theology author Plammoottil Cherian elucidates a vivid picture of the current state of the Christendom under the power of secularism atheism and apostasy in a confused and chaotic world The Church is at the crossroads of confusion losing its power in spreading the Gospel at a time when it is most needed The Book in five separate parts describes Who is true God the foundation of Church and God s religion What the mission of the Church is Church and nations are living in an Age of Delusion and a generation of compromised Christians Apostasy is on the rise and Church without Christ like in Laodicea Global Unhappiness because God is on the sidelines There is perfect harmony between science and Christian faith The world has been experiencing the bowls of wrath of God Nations morally deteriorate by the spiritual blindness of leaders of Church and State Humanity has been experiencing the hoofbeats of the four horses in the Book of Revelation The nations and Church are in the state of Mene Mene Tekel Upharsin The Babylons of the world nations are about to fall unless aligned with God The Grace Age is ending soon as scientific evidence proves the Biblical prophecies The pressing need of the Church is to prepare believers for Christ s Second Coming As a scientists and theologian Dr Cherian analyzes the present world culture and explains the Biblical prophecies that we are at the threshold of Church that lost the faith and calls church and nation s leaders to realign with God for his guidance and continued blessings

Systematic Theology Strong,1886 *Echoes of Coinherence* W. Ross Hastings,2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology **A History of the Warfare of Science with Theology in Christendom** Andrew Dickson
