Beyond Description Ryan Bishop, John Phillips, Wei-Wei Yeo, 2004-08-02 Treated from a range of disciplinary perspectives this book addresses and challenges issues of space historicity architecture and textuality by focusing on Singapore's singular position in the region and as a global city

Constructing Singapore Public Space Limin Hee, 2016-09-21 This book presents possible alternatives and interpretations to the well established notion in the mostly western discourse on public space The discourse on public space as understood in the democratic rationalist tradition when applied to the Singaporean public space would offer much criticism but would not be adequate in identifying alternative processes that allow for transformative potentials in public space Thus said the objectives of this book are 1 To develop a conceptual frame of reference to construct the discourse on Singapore public space 2 To form a preliminary model of Singapore public space through analyzing case studies 3 To understand the modes methods of production and representation of these public spaces within the rapidly changing urban context 4 To situate these constructions of public space and its possible trajectories within the larger discourse on public space and to examine the viability of such a construction and interpretive model of public space

Earthquake Nation Greg Clancey, 2006-05-01 Accelerating seismic activity in late Meiji Japan climaxed in the legendary Great Nobi Earthquake of 1891 which rocked the main island from Tokyo to Osaka killing thousands Ironically the earthquake brought down many modern structures built on the advice of foreign architects and engineers while leaving certain traditional wooden ones standing This book the first English language history of modern Japanese earthquakes and earthquake science considers the cultural and political ramifications of this and other catastrophic events on Japan's relationship with the West with modern science and with itself Gregory Clancey argues that seismicity was both the Achilles heel of Japan's nation building project revealing the state's western style infrastructure to be surprisingly fragile and a new focus for nativizing discourses which credited traditional Japanese architecture with unique abilities to ride out seismic waves Tracing his subject from the Meiji Restoration to the Great Kant Earthquake of 1923 which destroyed Tokyo Clancey shows earthquakes to have been a continual though mercurial agent in Japan's self fashioning a catastrophic undercurrent to Japanese modernity This innovative and absorbing study not only moves earthquakes nearer the center of modern Japan change both materially and symbolically but shows how fundamentally Japan shaped the global art science and culture of natural disaster

A Genealogy of Tropical Architecture Jiat-Hwee Chang, 2016-04-28 A Genealogy of Tropical Architecture traces the origins of tropical architecture to nineteenth century British colonial architectural knowledge and practices It uncovers how systematic knowledge and practices on building and environmental technologies in the tropics were linked to military technologies medical theories and sanitary practices and were manifested in colonial building types such as military barracks hospitals and housing It also explores the various ways these colonial knowledge and practices shaped post war techno scientific research and education in climatic design and modern tropical architecture Drawing on the interdisciplinary

scholarships on postcolonial studies science studies and environmental history Jiat Hwee Chang argues that tropical architecture was inextricably entangled with the socio cultural constructions of tropical nature and the politics of colonial governance and postcolonial development in the British colonial and post colonial networks By bringing to light new historical materials through formidable research and tracing the history of tropical architecture beyond what is widely considered today as its founding moment in the mid twentieth century this important and original book revises our understanding of colonial built environment It also provides a new historical framework that significantly bears upon contemporary concerns with climatic design and sustainable architecture This book is an essential resource for understanding tropical architecture and its various contemporary manifestations Its in depth discussion and path breaking insights will be invaluable to specialists academics students and practitioners Moderns Abroad Mia Fuller,2007-01-24 This volume studies the architecture and urbanism of modern era Italian colonialism 1869 1943 as it sought to build colonies in North and East Africa and the eastern Mediterranean Mia Fuller follows not only the design of the physical architecture but also the development of colonial design theory based on the assumptions made about the colonized and also the application of modernist theory to both Italian architecture and that of its colonies Moderns Abroad is the first book to present an overview of Italian colonial architecture and city planning In chronicling Italian architects attempts to define a distinctly Italian colonial architecture that would set Italy apart from Britain and France it provides a uniquely comparative study of Italian colonialism and architecture that will be of interest to specialists in modern architecture colonial studies and Italian studies alike Ethno-Architecture and the Politics of Migration Mirjana Lozanovska,2015-12-22 Ethno Architecture and the Politics of Migration explores the interface between migration and architecture Cities have been substantially affected by transnational migration but the physical manifestations of migration in architecture and its effect on streetscape neighbourhood and city have so far been understudied This contributed volume examines how migrants interact with adapt and construct new architecture Looking at the physical urban and cultural impact of these changes on a variety of sites the authors explore architecture as an identity category and investigate what buildings and places associated with migration tell us about central questions of belonging culture community and home in regions such as North America Australia and the UK An important contribution to debates on place identity and the transformation of places as a result of mobility and globalised economies in the 21st century *Drifting - Architecture and Migrancy* Stephen Cairns,2003-11-27 This book is an exploration of the often complex and unorthodox modes of dwelling that are emerging precisely from within the ruins of the idea of place **City Halls and Civic Materialism** Swati Chattopadhyay,Jeremy White,2014-03-14 The town hall or city hall as a place of local governance is historically related to the founding of cities in medieval Europe As the space of representative civic authority it aimed to set the terms of public space and engagement with the citizenry In subsequent centuries as the idea and built form travelled beyond Europe to become an established institution across the globe the

parameters of civic representation changed and the town hall was forced to negotiate new notions of urbanism and public space City Halls and Civic Materialism Towards a Global History of Urban Public Space utilizes the town hall in its global historical incarnations as bases to probe these changing ideas of urban public space The essays in this volume provide an analysis of the architecture iconography and spatial relations that constitute the town hall to explore its historical ability to accommodate the public in different political and social contexts in Europe Asia Australia Africa and the Americas as the relation between citizens and civic authority had to be revisited with the universal franchise under fascism after the devastation of the world wars decolonization and most recently with the neo liberal restructuring of cities As a global phenomenon the town hall challenges the idea that nationalism imperialism democracy the idea of citizenship concepts that frame the relation between the individual and the body politic travel the globe in modular forms or in predictable trajectories from the West to East North to South Collectively the essays argue that if the town hall has historically been connected with the articulation of bourgeois civil society then the town hall as a global spatial type architectural space urban monument and space of governance holds a mirror to the promise and limits of civil society **Framing Places** Kim Dovey,2014-04-23 Framing Places is an account of the nexus between place and power investigating how the built forms of architecture and urban design act as mediators of social practices of power Explored through a range of theories and case studies this examination shows how lives are framed within the clusters of rooms buildings streets and cities These silent framings of everyday life also mediate practices of coercion seduction and authorization as architects and urban designers engage with the articulation of dreams imagining and constructing a better future in someone s interest This second edition has been thoroughly revised and updated to include a look at the recent Grollo Tower development in Melbourne and a critique on Euralille a new quarter development in Northern France The book draws from a broad range of methodology including analysis of spatial structure discourse analysis phenomenology These approaches are woven together through a series of narratives on specific cities Berlin Beijing and Bangkok and global building types including the corporate tower shopping mall domestic house and enclave *Colonial Modernities* Peter Scriver,Vikramaditya Prakash,2007-03-12 International experts present an illustrated collection of essays exploring the societal impact of colonial architecture and engineering on the colonized and the colonizers Spaces of Global Cultures Anthony King,2004-08-02 SDraws on social cultural and postcolonial writings and architectural evidence from various cities around the world to examine existing theories of globalization and also develop new ones Desire Lines Noëleen Murray,Nick Shepherd,Martin Hall,2007-08-07 Ground breaking multi disciplinary new study of heritage practice in South Africa from native practitioners and scholars following the implementation of the National Heritage Resources Act *Re-shaping Cities* Michael Guggenheim,Ola Söderström,2009-12-04 How are building types such as skyscrapers mosques or living history museums imported adapted and contested in different societies Our urban landscapes are reshaped by the global circulation of models drawn from

elsewhere This original collection examines how architectural ideas social models and building forms circulate round the world and become adapted to local conditions

Stadium Worlds Sybille Frank,Silke Steets,2010-07-02 Analyzing football as a cultural practice this book investigates the connection between the sport and its built environment An international multi disciplinary range of perspectives are set in four thematic sections bring together with particular focus on the stadium Texts and case studies make this a useful book for lecturers and researchers in sociology cultural studies geography architecture sport and environment
