Balance Of Power Legion:

Ethnic Identity and Imperial Power Nico Roymans, 2004 This study explores the theme of Batavian ethnicity and ethnogenesis in the context of the Early Roman empire Its starting point is the current view in the social and historical sciences of ethnicity as a culturally determined subjective construct that is shaped through interaction with an ethnic other The study analyses literary epigraphic and archaeological sources relating to the Batavian image and self image against the backdrop of Batavian integration into the Roman world The Batavians were intensively exploited by the Roman authorities for the recruitment of auxiliary soldiers with the result that their society developed into a full blown military community Jacket

Crisis and War Patrick James, 1988-03-01 His analysis suggests that certain explanations have not been sufficiently considered in previous works For example prior domestic strife can be linked to the escalation of foreign conflict in an impressive number of cases a discovery which runs counter to the consensus which has emerged over the last two decades among political scientists Prior research on causes of war has often lacked rigour James has tried to remedy this through a long term comparative approach to the subject matter While Crisis and War follows the tradition of aggregate research statistical analysis is always connected to particular events through discussions of situations and leaders in both diplomatic history and contemporary world politics James comprehensive and original approach to past theories both clarifies and critiques them

Ideology and Foreign Policy in Early Modern Europe (1650-1750) Gijs Rommelse, 2016-05-13 The years 1650 to 1750 sandwiched between an age of wars of religion and an age of revolutionary wars have often been characterized as a de ideologized period However the essays in this collection contend that this is a mistaken assumption For whilst international relations during this time may lack the obvious polarization between Catholic and Protestant visible in the proceeding hundred years or the highly charged contest between monarchies and republics of the late eighteenth century it is forcibly argued that ideology had a fundamental part to play in this crucial transformative stage of European history Many early modernists have paid little attention to international relations theory often taking a Realist approach that emphasizes the anarchism materialism and power political nature of international relations In contrast this volume provides alternative perspectives viewing international relations as socially constructed and influenced by ideas ideology and identities Building on such theoretical developments allows international relations after 1648 to be fundamentally reconsidered by putting political and economic ideology firmly back into the picture By engaging with and building upon recent theoretical developments this collection treads new terrain Not only does it integrate cultural history with high politics and foreign policy it also engages directly with themes discussed by political scientists and international relations theorists As such it offers a fresh and genuinely interdisciplinary approach to this complex and fundamental period in Europe s development

Empires, Systems and States Michael Cox, Timothy Dunne, Ken Booth, 2001 This volume brings together a collection of leading scholars to consider various dimensions of the turn to history in International Relations The scope of this volume is

broad It includes conventional accounts of the development of the European states system but is not limited by it Other essays consider the non European experience a number of path breaking essays on how other cultures and continents have ordered their political communities in particular the question how and why a states system triumphed over other forms of political organisation The theme of the subtitle great transformations is pursued by each author The essays consider one of the biggest questions of our time namely how did we arrive at this historical and institutional expression of political community And what alternative future world orders exist The volume will be of interest to scholars of International Relations and History interested in great transformations in world politics **Governance in the 21st Century**

OECD,2001-04-27 This book explores some of the opportunities and risks economic social and technological that decision makers will have to address and outlines what needs to be done to foster society s capacity to manage its future more flexibly and with broader participation of its citizens **"The Transformation of European Politics, 1763-1848"** Peter

Krüger,Paul W. Schroeder (Eds.), in cooperation with Katja Wüstenbecker, This book takes up a question raised about the nature of the European international system in the late eighteenth early nineteenth centuries by Paul W Schroeder s pathbreaking and controversial work *The Transformation of European Politics 1763 1848* 1994 Schroeder s central claim was that the European states system underwent a fundamental transformation in the revolutionary Napoleonic and Vienna eras from a system of competitive conflictual power politics based purely on a shifting balance of power to a more consensual stable and peaceful set of relations based on legality acknowledged rights and obligations and shared norms The contributors to this volume while examining this claim primarily extend the debate to the entire history of European and world international politics from the early seventeenth century to the present If this transformation was real they ask was it only a temporary episode or does it represent an example of other transformations or structural changes in international politics over the centuries down to the present day and a possible model for change in the future **The Great Powers and the**

International System Bear F. Braumoeller,2013-02-11 Do great leaders make history Or are they compelled to act by historical circumstance This debate has remained unresolved since Thomas Carlyle and Karl Marx framed it in the mid nineteenth century yet implicit answers inform our policies and our views of history In this book Professor Bear F Braumoeller argues persuasively that both perspectives are correct leaders shape the main material and ideological forces of history that subsequently constrain and compel them His studies of the Congress of Vienna the interwar period and the end of the Cold War illustrate this dynamic and the data he marshals provide systematic evidence that leaders both shape and are constrained by the structure of the international system *Land and Power: The Zionist Resort to Force, 1881-1948* Anita Shapira,2023-06-07 The book traces the history of attitudes toward power and the use of armed force within the Zionist movement from an early period in which most leaders espoused an ideal of peaceful settlement in Palestine to the acceptance of force as a legitimate tool for achieving a sovereign Jewish state A classic This brilliant intellectual history by a

distinguished Tel Aviv University scholar shows how the exilic Jewish aversion to Machtpolitik shriveled in the crucible of state building Mainstream Zionism which never saw itself as a movement of European usurpers evolved what Shapira calls a defensive ethos under British rule that skirted both compromise and confrontation with the Arabs It hoped to dull enmity by offering Palestine s Arabs everything as individuals but nothing as a people But when the proto intifada of the Arab Revolt erupted in 1936 a new offensive ethos recognizing the inevitability of an Arab Jewish clash and the legitimacy of the sword gained ground among Mandate Palestine s Jews Shapira s lucid searching book a model of historical curiosity and craft is indispensable for anyone seeking to understand modern Israel whose sense of its own power coexists painfully alongside a sense of fearful victimhood Foreign Affairs Shapira succeeds in presenting more than a one dimensional intellectual history of the Zionist movement Displaying her skills as a serious historian and a fine writer Shapira offers a nuanced and even handed examination of a variety of elements within the Jewish community based on a rich selection of original sources The Historical Journal A rich and sophisticated work that nicely complements more conventional political historical studies of the Arab Israeli conflict Shapira sifts through a vast body of material ranging from essays poems and memoir literature to the unpublished minutes of political party and youth group meetings Shapira interprets these sources with sensitivity and insight Shapira writes with power compassion and warmth a landmark book that is an outstanding contribution to the history of Zionist political thought and culture American Historical Review This is a superb book It is a well researched detailed and scholarly account that provides new and valuable insights into the dilemma posed by the formation and elaboration of a more forceful Israeli military posture The Historian Shapira s powerful well written lucid intellectual history of a segment of the Zionist movement is fascinating and easy to read highly educational Journal of Economic History Anita Shapira provides an excellent analysis of the different debates within Zionism during the pre state period Altogether this is an intellectual history of the Zionist Movement well worth reading It is meticulously researched and analysed incomparable in terms of depth and essential for anyone with an interest in the Arab Israeli conflict Zionism and contemporary Jewish history The English Historical Review A comprehensive political history of pre 1948 Palestine The book is lucidly written well researched based on extensive primary and secondary resources The translation from the Hebrew edition by William Templer is outstanding this is perhaps the most conceptually sophisticated and thematically integrated work on the Yishuv recently written Land and Power is a significant and an excellent contribution to our understanding of Zionism and the Yishuv Shofar *Order and Security in Southeast Asia* Ralf Emmers, Joseph Liow, 2006-04-07 Michael Leifer who died in 2001 was one of the leading scholars of Southeast Asian international relations He was hugely influential through his extensive writings and his contacts with people in government and business in the region In this book many of Leifer s students colleagues and friends come together to explore the key themes of his work on Southeast Asia including the notion of order security maritime law and foreign policy The book concludes with an overall assessment of Leifer s background worldview and impact on his field A

scholarly and personal volume devoted to Leifer's vast contributions to the discipline of international relations this text is a must read for students and scholars specializing in the region **Militarization and State Power in the Arab-Israeli Conflict** Eligar Sadeh, 1997-08 A set of propositions and an accompanying theoretical framework that explains the cause effect linkages between intrastate and interstate power realization that are characterized by militarization are developed This model establishes the foundation for an explanation of how such power is used to deal with the state's Janus faced security dilemma To this end the model provides the tools needed for such an inquiry from a conceptual and typological standpoint The goal is to explain how the internal aspect of state power shapes the external one It was determined that Israel and the primary Arab confrontation states provide important test cases based on the intense interplay prevalent between militarization processes and state power *The Agrarian Revolt in Western Canada* Paul Frederick Sharp, University of Regina.
