Reshaping Norms Weltbank, 2022 South Asia's growth rate has returned to pre-pandemic levels. However, the uneven recovery from the pandemic has left countries in South Asia with multiple policy challenges which are exacerbated by the impact of the war in Ukraine. While several countries are navigating rising inflation and growing difficulties to finance fiscal deficits and trade deficits, the region must also chart a new way forward to address rising inequality, unleash new growth potential, and accommodate an energy transition. To reshape their economies, the region cannot avoid redesigning tax systems, increasing competition, and challenging vested interests and existing gender norms. This issue of the South Asia Economic Focus describes recent economic developments, analyzes the economic impact on South Asia of the war in Ukraine, presents growth forecasts, provides risk scenarios, and concludes that reshaping economies goes hand in hand with reshaping norms.

The Polish Climate in the European Context: An Historical Overview Rajmund Przybylak, Jacek Majorowicz, Rudolf Brázdil, Marek Kejan, 2009-12-03

Reconstruction of the climate variability of the past 500 years is a topic of great scientific interest not only in global terms but also at regional and local levels. This period is interesting on account of the increasing influence of anthropogenic forcing and its overlap with natural factors. The Polish Climate in the European Context: An Historical Overview summarises the results of research into climate variability based on a combination of instrumental, documentary, dendrochronological, and borehole data from Poland. The first part of the book provides a Central European perspective of research in these fields which forms the general background for a presentation of the state of the art of climatic change studies in Poland during the past 500 years. Part 2 This is followed by a selection of papers dealing mainly with different aspects of climate variability in Poland and Central Europe. Part 3 This book is a valuable tool integrating Polish Central and Eastern European climate research into the global context. It is as such a must for climate researchers worldwide.
