EBUSINESS: ELECTRONIC BUSINESS VALUE

3

CHAPTER

One-hour film processing and digital cameras both contributed to the demise of Polaroid, a solid company that had an innovative technology and a captive customer base. The dilemma that faced Polaroid is a dilemma that most organizations face – the criteria an organization uses to make business decisions for its present business could possibly create issues for its future business. Essentially, what is best for the current business could ruin it in the long term.

In the past few years, ebusiness seems to have permeated every aspect of daily life. In just a short time, both individuals and organizations have embraced Internet technologies to enhance productivity, maximize convenience, and improve communications globally. This chapter focuses on the disruptive technology, the Internet, and ebusiness processes that are changing the nature of the buyer-seller relationship, the role of information technology (IT), and organizational structures and tasks. The chapter also discusses the opportunities and advantages found with developing ebusinesses. Specific relationships have been developed in the chapter between disruptive technologies and ebusinesses.
