Between Globalization and Integration Sebastian Vaduva, 2016-02-23 This volume focuses on the integration and globalization of Romania a prominent emerging market in South Eastern Europe and one of the major players in the securitization of the Black Sea and the Eastern European border as both a part of NATO since 2004 and a fully integrated EU Member State since 2007 It will examine the challenges the country has faced in its progression from totalitarianism to democracy through several waves of reform intended to update and streamline its political and economic processes for success in the free market capitalist arena Having learned the hard way about some of the key aspects of public administration Romania has learned a place for itself among the diverse global players of Europe and beyond The first section reviews current perspectives on globalization and its impact in the late 20th century It has flattened the Earth generating better communication and exchanges than ever before but also gathering a fair amount of criticisms from commentators seeing it as little else than neo colonialism Cooperative administrative strategies are being suggested instead in order for new public administration patterns to smoothly run in coordination with the globalized world In the second section the European Union is described as a complex multi level socio political entity itself historically in turmoil over its own style of rule e g hierarchy vs coordination integration vs centralization etc or even its own existence as the European dream seemed to be losing steam with the general population of Europe several times in the previous century Powers and responsibilities of the European institutions and agencies are also discussed Thirdly the recent history of Romania is approached from the Europeanization context starting from its post 1989 days of confusion and of attempting to jumpstart democracy Eventually it has to undergo a series of reforms and internalize some principles fundamental to the EU in order for the much awaited accession to occur and its multiple effects to start taking place A country with a rich cultural heritage and straddling multiple socio political axes Romania has plenty more to offer in the new geostrategic security and development contexts of the 21st century Europe As such this volume provides inspiration for further research and practical application opportunities on topics of local European and global significance Integration and Globalization Ion Iliescu, 2003 *Romanian Management Theory and Practice* Ovidiu Nicolescu, Constantin Oprean, Aurel Mihail Titu, Sebastian Vaduva, 2024-09-19 This open access book provides the current research on the features of Romanian management theory and practices It explores Romania s position in the global supply chain Romanian firm s contributions to the new global economy and the processes and effect of internationalization and digitization on the Romanian economy Romanian management practices similar with other Eastern European nations has a unique development In the late 19th and early 20th century they were an integral part of western management thinking However with the forced adoption of a communist political system and the nationalization of the Romanian economy the managerial systems were recalibrated to replace profit maximizing objectives with social objectives yielding mixed results Since the revolution of 1989 and the

integration into NATO and the European Union Romanian management systems are once again an integral part of the global economy As the COVID 19 crisis revealed the limitations of globalization and the overreliance on Asian suppliers Romania along with the rest of Eastern Europe will continue to be integrated into the global economy and become a dependable alternative to Asian suppliers This is an open access book      **Romania and The European Union** Dimitris

Economic Integration Niculae Gh Niculescu,Ioan D. Adumitrăcesei,2001      **Romania in the Context of Globalization, Regionalization and Convergence** Elena Pelinescu,2007 The economic convergence is an instrument of harmonization in areas with high degree of economic integration For Romania it is important to know the degree of fulfillment of the convergence criteria and the impact of the policies which sustain their achievement because few studies had as object the analysis of the degree of fulfillment in countries like Romania and Bulgaria which were included in the latest EU extension wave We use different methods in order to show the cointegration process and the results The techniques applied to the statistical data regarding the nominal convergence the consolidated budget deficit as a share of GDP the share of public debt in GDP the rate of inflation the interest rate and the exchange rate have revealed some results which appear in others studies too namely that Romania integrates in the fixed target Maastricht criteria the budget deficit as a share of GDP the share of public debt in GDP and follows a pattern of convergence for the other criteria      **Economics of Global and Regional**

**Romania in the European Union** Bogdan N. Glavan, 2007 Although highly beneficial from a pragmatic point of view Romania's accession in the European Union is problematic especially in the long run and from a theoretical perspective In the short run adoption of European model emphasizes the advantages of economic integration In the long run however political considerations can dominate economic liberties

Real Economy at a Historical Crossing Niculae Niculescu, Ioan D. Adumitrăcesei, 2003

Inside the European Union Constantin Zaman, 2009 Romania joined the European Union after many years of uneven efforts and uncertainty about the effective date of integration In this paper we try to evaluate the economic situation of Romania at the moment of joining the European Union We try to identify the main macroeconomic developments over the last years prior to integration which will show the extent to which the country has prepared this integration from an economic point of view This diagnosis will serve as a basis for inquiring about the possible future consequences of membership as well as about the perspectives of the Romanian economy after the integration The regional characteristics in terms of development are equally analyzed Economic growth has resumed since 2000 but its drivers have gradually shifted

from investment towards private consumption while the level of development is still significantly lower than the EU average. Most of Romania's social indicators lag behind EU ones. Persistent macroeconomic imbalances have slowed down the real and nominal convergence process. The economy is still affected by low competitiveness, incomplete restructuring, modest productivity in agriculture, a high level of employment in subsistence agriculture, and slow disinflation. *Romania's Accession to the European Union* Ioan Horga, 2014. People see the integration process as an opportunity for Romania to overcome this difficult economic situation as a way out of the decline of an extremely complicated transition process. If the Romanians look at the Member States of the European Union, they see their closeness as an opportunity. As far as the costs are concerned, integration does cost, but non-integration costs even more. Integration processes such as globalisation do exist; we cannot ignore them, and we have no interest to avoid them. Whatever the integration costs, it would be more dangerous to stay outside this process.
