**The Parks Belong to the People** Joe Weber, Selima Sultana, 2024-04-01 In examining the 424 units of the U S national park system geographers Joe Weber and Selima Sultana focus attention on the historical geography of the system as well as its present distribution covering the diversity of places under the control of the National Park Service NPS This includes the famous national parks such as the Grand Canyon Yellowstone and Yosemite and the lesser known national monuments memorials lakeshores seashores rivers recreation areas preserves reserves parkways historic sites historic parks and a range of battlefields as well as more than twenty additional sites not fitting into any of these categories such as the White House The geographic view of The Parks Belong to the People sets it apart from others that have taken a solely historical approach Where parks are located what they are near where their visitors come from and how land use and activities are organized within parks are some of the fundamental issues discussed The majority of units in the NPS are devoted to recreation areas or historic sites such as battlefields archaeological sites or sites devoted to a specific person and this is reflected in the authors approach What we think of as a national park has changed over the years and will continue to change Weber and Sultana emphasize changing social and political environments in which NPS units were created and the roles they serve such as protecting scenery providing wildlife habitats preserving history and serving as scientific laboratories and places for outdoor recreation The authors also focus on parks as public facilities and sites of economic activities National parks were created by people for people to enjoy at great cost and with great benefit They cannot be understood without taking this human context into account

**Between Two Rivers** Joseph P. Sanchez, 2014-10-20 How an Hispano community maintained its identity over four centuries Located in Albuquerque s south valley Atrisco is a vibrant community that predates the city harking back to a land grant awarded in 1692 Joseph P S nchez explores the evolution of this parcel over the four centuries since the first Spanish settlers arrived He tracks its transformation from an individual to a community grant peeling away the layers of historical events that have made Atrisco the last piece of undeveloped real estate in a growing metropolitan area S nchez examines the creation of Atrisco as a frontier community during the Spanish and Mexican periods and shows how it maintained its identity and land ownership into the American era He describes the historical processes of colonization land tenures and transfers and social and economic activity He also assesses the transfer of the land grant to a private corporation and its subsequent fate and considers Atrisco s role in the future of Albuquerque Today more than 30 000 New Mexicans are descended from the early settlers of Atrisco and because few places in the United States have retained their Spanish and Mexican influences as have the New Mexican land grants the history of Atrisco offers a unique perspective S nchez s study

preserves Atrisco's origins as part of that area's Hispano heritage depicting people who learned to defend their culture against outside challenges and embedding local history in a larger regional saga *Coronado National Memorial (N.M.), General Management Plan*, 2003
