Viñuales, 2018-07-03 In The Organisation of the Anthropocene J E Viñuales explores the legal dimensions of the currently advocated new geological epoch called the Anthropocene in which humans are the defining force He examines in this context two basic propositions First law as a technology of social organisation has been neglected in the otherwise highly technology focused accounts by natural and social scientists of the drivers of the Anthropocene Secondly in those rare instances where law has been discussed there is a tendency to assume that the role of law is to tackle the negative externalities of transactions e.g. their environmental or social implications rather than the core of the underlying transactions i.e. the organisation of production and consumption processes

Such focus on externalities fails to unveil the role of law in prompting sustaining and potentially managing the processes that have led to the Anthropocene
