**Living with Bipolar Disorder**

Karen R. Brock, M.D., 2014-07-14 Bipolar means more than mood swings and chemical imbalances. It is a genetic brain regulation malfunction causing not only mood but behavioral symptoms. Severity and symptoms vary along a spectrum of disease presentations from a happy positive personality to a moody temperament to chronic and recurrent depressions to classic manic depressive illness. It is a chronic disease with periods of illness as well as remission. Keeping the disease under control requires daily maintenance and vigilance for emerging symptoms. The goal of this book is to help the bipolar person successfully manage his or her illness and live a full and meaningful life. First the reader will learn all about bipolar disorder: how it presents, how it is diagnosed, how it is passed down in families, and how it affects women as compared to men. Next the various types of treatment and the logistics of daily maintenance are discussed in detail. Finally the advantages and disadvantages of bipolar disorder are explored, and the lives of interesting and outstanding historical and current bipolar individuals are examined.

**Oxford Textbook of Community Mental Health** Graham Thornicroft, Robert E. Drake, Oye Gureje, Kim T.

Mueser, George Szmukler, 2025-01-03 Community mental health has evolved as a field of practice and as a research discipline during the last 50 years. Now newer concepts such as shared decision making, the recovery approach, evidence-based practice, implementation science, telemedicine, and mobile device technology are adding layers of texture to this domain. These developments require an ever more sophisticated understanding of the very latest evidence and experience in community mental health care to respond to the values, goals, needs, and preferences of people with lived experience of mental health conditions. This second edition of the Oxford Textbook of Community Mental Health addresses recent changes and achievements, current controversies, and future challenges while emphasizing areas of convergence where social values, health, medical sciences, and policy formation converge and meet. This edition also features a new section on global mental health to emphasise what is known about the mental health gap in low and middle income countries and the evidence of how to respond to these huge global challenges. Like community mental health care itself, the authors are multidisciplinary, international, and bring both clinical and scientific perspectives to this volume. This textbook will be an invaluable and authoritative source of reference for all mental health specialists, for people with mental health conditions, for staff in non-governmental and governmental organisations, and indeed for all who are dedicated to creating better mental health services and systems.
