Beyond The Crisis The Future Of Capitalism:

Crises of Global Economy and the Future of Capitalism Kiichiro Yagi, Nobuharu Yokokawa, Hagiwara Shinjiro, Gary Dymski, 2013-01-04 Recent events in the global financial markets and macro economies have served as a strong reminder for a need of a coherent theory of capitalist crisis and analysis This book helps to fill the gap with well grounded alternative articulations of the forces which move today s economic dynamics how they interact and how ideas of foundational figures in economic theory can be used to make sense of the current predicament The book presents a comprehensive collection of reflections on the origins dynamics and implications of the interlinked crises of the U S and global economies The book is a thoughtful collaboration between Japanese heterodox economists of the Japan Society of Political Economy JSPE and non Japanese scholars It provides a unique immersion in different sophisticated approaches to political economy and to the crisis The book illustrates with the understanding of Marx s crisis theory and how it can serve as a powerful framework for analyzing the contemporary sub prime world crisis The book explains the subprime loan crisis as a crisis in a specific phase of the capitalist world system and concludes that it is a structural one which destroys the existing capital accumulation regime It pays attention to structural changes and to how these changes beget profound and controversial consequences The result is a must read one which truly contributes to the resurgence of radical analyses of the political economy free from the market optimism of the main stream economics

Beyond the Crisis Adjiedj Bakas, 2009 The Current Deep Economic Crisis Marks a Great Transition The Chinese phrase for crisis consists of two words danger and opportunity In *Beyond the Crisis The Future of Capitalism* renowned futurologist Adjiedj Bakas leads you through and then out of the New Great Depression of the 21st century The current economic crisis marks the end of an era and the start of a new one It is the 5th major crisis in 200 years time All of them occurred at the transition from one era to the next The 1930s may have been a time of deep economic crisis and mass unemployment yet in those days the Kennedys made their fortunes art deco was born and the radio car and telephone grew to be so much in demand that great new industries emerged out of the ashes of the crisis During the major economic crisis of the 1980s the personal computer mobile phone and Internet were born and developed into major new industries During the current crisis we finally say goodbye to the 20th century and transit into the new post material economy with new economic pillars and the mixture with digital collaboration powered by cloud computing the next generation Internet We say hello to a new era with China as the new global powerhouse instead of the U S with globalization turning into slowbalization with less wealth and more focus on the Economy of Happiness Bakas looks behind today s headlines and uses knowledge and wisdom from different fields economics technology philosophy and spirituality in order to grasp what is really going on in our world and the real changes in our global economy I truly recommend this book because it may change your future and that of your children Professor Jianmao Wang Economist at the China Europe International Business School

The Future of Capitalism After the Financial Crisis Richard Westra, Dennis Badeen, Robert

Albritton,2014-12-17 *The Future of Capitalism After the Financial Crisis* The Varieties of Capitalism Debate in the Age of Austerity contains thirteen world leading political economists writing from within eight different countries who critically analyze the current crisis tendencies of capitalism both globally and in particular countries Given the likelihood of an increasingly crisis prone future for capitalism it is important not only to rethink capitalism in its current manifestations or varieties It is also important to rethink research methods and conceptual frameworks in preparation for understanding an increasingly rocky future in which capitalism itself could go the way of the many species that in the past were endangered only to become extinct More and more titles of books and articles are suggesting that capitalism or perhaps civilization itself is endangered if we do not make radical changes in the near future This book breaks with academic path dependency and attempts to open new vistas of political economy and of multidisciplinary analysis that are crucially important if our thought processes are to be effective in a world in jeopardy The varieties of capitalism VoC debate itself came into being as the Soviet Union unraveled It drew in scholarship from a cross section of Marxian and heterodox political economy The key argument of VoC was that if capitalism was the only global option then those on the Left must get involved in policy discussions on how capitalist economies can be fashioned to become competitive as well as progressive However the financial crisis has seen policy across the advanced economies veer toward competitiveness coupled with austerity The lesson for the Left is that alternatives to capitalism must be sought in the here and now *Beyond the Global Capitalist Crisis* Berch

Berberoglu,2016-04-15 The deep economic recession that has occurred in all major sectors of the U S and global economy is a manifestation of the underlying contradictions of the capitalist system that has resulted in the accumulation of vast fortunes on one side and impoverishment debt and destitution on the other In short the crisis of global capitalism is the result of the immense disparities in wealth and income and a consequent widening gap between capital and labor This ground breaking book brings together a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level with all its fundamental internal dynamics and contradictions operating on a world scale It will make an important contribution to understanding the underlying causes of the current global economic crisis and show the way out of this crisis by way of a powerful critique of the global capitalist system that will ultimately go through a major economic political and social transformation Analysis of the global capitalist crisis raises questions regarding the process of capitalist globalization especially now that neoliberal economic policies have failed Does this signal the end of capitalist globalization and the collapse of the global capitalist system This book will take up these questions and entertain the possibility of a new beginning in the global political economy through an analysis of the next period of post capitalist developments worldwide that may set the stage for the rise of socialism across the globe *Beyond Capitalism?* Simon Hardy,Luke Cooper,2013-03-11 An in depth examination into the social nature of the austerity crisis and

how we can move Beyond Capitalism **Beyond Crisis** John Holloway, Katerina Nasioka, Panagiotis Doulos, 2020-02-15 The government led by Syriza in Greece elected in January 2015 at first seemed to be the most radical European government in recent history It proclaimed itself the Government of Hope and throughout the world symbolized the hope that radical change could be achieved through institutional politics The referendum of July 2015 rejected the austerity imposed by the banks and the European Union but was followed by a complete reversal of the government's position and its acceptance of that austerity The collapse of hope that accompanied the failure of the institutional Left opened the way to the return of the right wing New Democracy Party with a more aggressive program than ever The essays collected in *Beyond Crisis* among other things form a case study of the Greek experiment that points to deeper implications concerning the global upsurge of disillusioned anger that has spurred the rise of far right populism and support for strong leaders exclusion of ethnic minorities and greater racial purity The Syriza government's dramatic crash showed the limits of institutional politics a lesson apparently overlooked by the enthusiastic followers of Jeremy Corbyn and Bernie Sanders But it also poses profound questions for those who reject state centered politics The anarchist or autonomist movement in Greece has been one of the strongest in the world yet it has failed to have a significant impact in opening up alternative perspectives So how do we pick up the pieces What direction should we follow from now on How do we understand what happened and learn from it The essays in this collection do not point to a single conclusion or path forward but rather raise questions that remain open about how to move beyond the current crisis amid a darkening sky of seeming impossibility *Capitalism's Future*, 2016-05-30 Capitalism's Future Alienation Emancipation and Critique frames 21st century economic and social possibilities in a dialogue between two forms of critical social theory Marx's critique of political economy that analyzes capitalism and the critique of political psychology that analyzes authoritarianism Contributions from social theorists in sociology philosophy and cultural studies are brought together to dissect and critique capitalist crises left liberalism left Thatcherism resistance to risk pooling idealist philosophy undemocratic social character status wages and authoritarian spectacles Throughout Marx's centrality to critical social theory is confirmed both alone and in in powerful combination with Adorno Durkheim Dubois Lacan Veblen Weber and others This book outlines conjoined critiques of commodity fetishism and authority fetishism as the emancipatory agenda of 21st century critical theory Contributors are Kevin S Amidon Graham Cassano Tony A Feldmann Daniel Krier Christian Lotz Patrick Murray David Norman Smith Tony Smith William J Swart and Mark P Worrell **Tipping Point for Advanced Capitalism** D.W. Livingstone, 2023-09-07T00:00:00Z *Tipping Point for Advanced Capitalism* is a pathbreaking study of the changing class makeup of the Canadian other G7 and Nordic labour forces since the 1980s documenting especially the rise of non managerial professional employees The book provides unprecedented tracking of the links between employment classes and higher levels of class consciousness including the often hidden political consciousness of corporate capitalists as well as the extent of oppositional and revolutionary consciousness among non managerial workers The large

differences exposed between class conscious capitalists and these non managerial workers on issues of poverty reduction and global warming reveal the strategic roles these key class agents play in actions to defend or transform advanced capitalism The most concerted evidence based study to bring class back into grasping the intimately linked ecological economic and political crises we now face Crises at Work Steve Williams,Mark Erickson,2024-09-06 It is impossible to view the news at present without hearing talk of crisis This timely book looks at how three major crises the economy pandemic and climate are related to the crisis of work making it more precarious intense and unequal Providing an original and critical synthesis of recent trends in the field expert scholars offer a programme for transcending the crisis of work Offering a timely contribution to understanding the important issues facing the world this book presents an important new way of thinking about work in contemporary societies Young People, Radical Democracy and Community Development Janet Batsleer,Harriet Rowley,Demet Lüküslü,2022-11-16 Young people are often at the forefront of democratic activism whether self organised or supported by youth workers and community development professionals Focusing on youth activism for greater equality liberty and mutual care radical democracy this timely collection explores the movement s impacts on community organisations and workers Essays from the Global North and Global South cover the Black Lives Matter movement environmental activism and the struggles of refugees At a time of huge global challenges youth participation is a dynamic lens through which all community development scholars and participants can rethink their approaches Does Capitalism Have a Future? Immanuel Maurice Wallerstein,Randall Collins,Michael Mann,Georgi Derleugian,Craig Calhoun,2013 The Great Recession has prompted many reassessments of the finance driven economic order that achieved world dominance in the era of globalization Yet just about every observer has focused on only two issues why things went wrong and what we need to do in order to return the system to stability Virtually no one has questioned whether the system as such can continue In Does Capitalism Have a Future a quintet of globally eminent scholars Immanuel Wallerstein Randall Collins Michael Mann Georgi Derluguian and Craig Calhoun survey the current global landscape and cut their way through to the most crucial issue of all whether our capitalist system can survive in the medium run Despite all its current gloom conventional wisdom still assumes that capitalism cannot break down permanently because there is no alternative The authors shatter this assumption arguing that this generalization is not supported by theory but is rather an outgrowth of the optimistic nineteenth century claim that human history ascends through stages to an enlightened equilibrium of liberal capitalism Yet as they point out all major historical systems from the Roman Empire to the Qing dynasty in China have broken down in the end In the modern epoch there have been several cataclysmic events notably the French revolution World War I and the collapse of the Soviet bloc that came to pass mainly because contemporary political elites had spectacularly failed to calculate the consequences of the processes they presumed to govern At present none of our governing elites and very few intellectuals can fathom an ending to our current reigning system How possible is a systemic collapse in the medium run of coming

decades is the central question of this debate While the contributors arrive at different conclusions they are in constant dialogue with one another and therefore able to construct a relatively seamless if open ended whole Written by five of world s most eminent scholars of global historical trends this ambitious book asks the biggest of questions are we on the cusp of a radical world historical shift or not

Capitalism Paul Bowles,2023-09-29 Exploring the life of the world shaping system of capitalism and the writings of leading thinkers this book gives an account of recent developments of capitalism including the impact of the global Climate Crisis questions around democracy and capitalism and the impact of COVID 19 Capitalism stands unrivalled as the most enduring economic system of our times Since the collapse of the Soviet bloc the world has become a new stage for capital and yet despite this dominance capitalism is still not widely understood In this volume Paul Bowles addresses some of the key questions around the history of capitalism What are the central unchanging features of capitalism How does capitalism vary from place to place and over time Does capitalism improve our lives Is capitalism a system which is natural and free Or is it unjust and unstable What about today s global capitalism Will capitalism destroy or liberate us This third edition of a classic text includes updates to all chapters with the inclusion of more global material as well as a new chapter focussing on the future of capitalism the clash of different capitalisms including neoliberal versus state capitalism and whether we are seeing the end of capitalism and if so what post capitalism might look like

Future of Liberation Theology Ivan Petrella,2006-06-28 There is a notion amongst some academics that Latin American Liberation Theology has had its day a dream killed off by the Nicaraguan and Salvadoran revolutions the 1989 demise of socialism and the end of history claims of the champions of capitalism However in this book Petrella proves this to be an ill conceived notion and shows that this theology can be reinvented to bring its preferential option for the poor into the real world The actualisation of historical projects is possible by adopting the methods developed by the Brazilian champion of critical legal studies Robert Unger Doing so will entail the rejection of these theologians unitary concepts of a despised and rejected capitalism and a canonized and accepted socialism Petrella argues for a reconstruction of these concepts and those of democracy and property too He closely analyses the differences in democracy and capitalism as practised across the USA and Europe in support for the reconstruction of these concepts bringing about far reaching suggestions for the future of liberation theology

Postcapitalist Futures Adam Fishwick, Nicholas Kiersey, 2021-05-20 This book critically engages with the proliferation of literature on postcapitalism which is rapidly becoming an urgent area of inquiry both in academic scholarship and in public life It collects the insights

from scholars working across the field of Critical International Political Economy to interrogate how we might begin to envisage a political economy of postcapitalism. The authors foreground the agency of workers and other capitalist subjects and their desire to engage in a range of radical experiments in decommodification and democratisation both in the workplace and in their daily lives. It includes a broad range of ideas including the future of social reproduction, human capital circulation, political Islam, the political economy of exclusion and eco communities. Rather than focusing on the ending of capitalism as an implosion of the value money form, this book focuses on the dream of equal participation in the determination of people's shared collective destiny.

The Politics of Time in China and Japan Viren Murthy, 2022-06-24. Drawing on a wide range of texts and using an interdisciplinary approach, this volume shows how Chinese and Japanese intellectuals mobilized the past to create a better future. It is especially significant today given a world where amidst tensions within Asia and the rise of China, East Asian intellectuals and governments constantly find new political meanings in their traditions. The essays illuminate how throughout Chinese and Japanese history, thinkers constantly weaved together nationalism, internationalism, and a politics of time. This volume explores a broad range of subjects such as premodern and early modern attempts to conjure a politics of Confucianism, twentieth-century Japanese Marxist interpretations of Buddhism, and Japanese and Chinese endeavors to imagine a new world order. In sum, this book shows us why understanding East Asian pasts are essential to making sense of ideological trends in contemporary China and Japan. For example, without understanding Confucianism and how modern intellectuals in China grappled with this body of thought, we would be unable to make sense of the Chinese government's current promotion of the Chinese classics. This book will interest students and scholars of political science, history, Asian studies, sociology, and philosophy.

Utopia Beyond Capitalism in Contemporary Literature Raphael Kabo, 2023-06-15. Featuring readings of contemporary utopian poetry and fiction from authors such as Juliana Spahr, Mohsin Hamid, Bong Joon-ho, Kim Stanley Robinson, Lidia Yukavitch, and Cory Doctorow, this book investigates the commons, a form of organisation based on collectivity, communalism, and sharing, as a type of transition between capitalist precarity and crisis and anti-capitalist futures. Each of the texts under examination was written in opposition to a particular crisis of the capitalist present: inequality, political representation, mobility, and climate change, and develops a particular mode of utopian commoning. Through its examination of these writers' crises and texts, this book reaffirms the use of utopianism as a tool for generating and representing alternative futures for a world in the midst of ongoing planetary crisis.
