Beyond The Limits A Planet In Crisis:

Beyond the Limits Tom Jagtenberg, 2015-12-20 No matter how hard politicians try to broker agreements about curbing greenhouse gas emissions there are deeper obstacles that would seem to guarantee Planet Earth's ecological decline *Beyond the Limits* is a hard hitting and probing analysis of the underlying problems that define the possibilities of any response to the problem of climate change If you have wondered how humanity has managed to reach a point of no return this is a book for you Our problems stem from an unwavering commitment to the growth of economies populations and improved standards of living Unpalatable as this diagnosis may be the underlying issues involve cultural prejudice inertia outmoded political programs and an overwhelming faith in technological innovation and social progress Further insufficiently analysed optimism may blind us to the obvious there still are limits to growth The author is able to combine evidence based scientific analysis with the best of contemporary social and cultural theory to provide a compelling interdisciplinary analysis His appeal for a genuinely eco centric approach to politics will definitely rattle a number of philosophical cages

Crisis of Global Sustainability Tapio Kanninen, 2013-01-04 This concise and informative text provides a critical history of the concept of sustainability and the various institutional measures taken to promote implement and enforce sustainable development proposing new organizational solutions to deal with the crisis of sustainability *Crisis of Global Sustainability* provides for the first time a compact insider description of the evolution and impact of the Club of Rome a global think tank that produced a groundbreaking 1972 study *The Limits to Growth* which highlighted the dangers of unrestrained economic growth and possible collapse of global economy during the first decades of the 21st century With recent research confirming the validity of these concerns Kanninen asks whether our overarching concept of thinking on

world development today should continue to be global sustainability which implies that we still have enough time to make adjustments in our future policies and action Or should the main paradigm of our thinking shift to global survivability a concept that stresses the absolute necessity of immediate and drastic change both in institutions and policies Many environmentalists green politicians and think tanks are speaking today more loudly than ever about the necessity for a major policy institutional and paradigm change and this work is essential reading for students and scholars alike

Dark Night, Early Dawn Christopher M. Bache, 2000-05-26 Combining philosophical reflections with deep self exploration to delve into the ancient mystery of death and rebirth this book emphasizes collective rather than individual transformation Drawing upon twenty years of experience working with nonordinary states the author argues that when the deep psyche is hyper simulated using Stanislaw Grof s powerful therapeutic methods the healing that results sometimes extends beyond the individual to the collective unconscious of humanity itself

Museums and the Climate Crisis Nick Merriman, 2023-12-22 Museums and the Climate Crisis shows how museums can respond to the interrelated global climate biodiversity and pollution crises They have a unique role because they take a long term perspective and their scholarship and independence mean that they remain trusted by the public Providing insights and international case studies from a range of museum and gallery professionals academics and consultants this book explores how museums can use this unique perspective to engage the public as active citizens and how they are exemplars of good practice in areas such as emissions reduction and encouraging biodiversity It shows how museums can combat climate exhaustion by drawing on understandings about positive motivation and how to develop exhibitions events and activities that motivate visitors to take action Taking a broad approach beyond purely climate issues the contributions touch on the use of renewables environmental controls and standards travel including virtual couriering waste management including recycling plastic reduction and composting reducing pollution and increasing biodiversity within museums Museums and the Climate Crisis will be important reading to those studying in the fields of Museum Studies Heritage Studies and Conservation Taking a practical approach it will also be beneficial to museum gallery and heritage professionals who are grappling with the challenges of the climate crisis

Beyond Capitalist Dystopia Davor Džalto, 2022-07-01 This provocative book interrogates the ideology of capitalism as the default narrative underpinning various mainstream ideologies in the contemporary world The book explores the genesis structure and functioning of this ideological narrative provides its critical assessment and outlines a possible alternative beyond the logic of capitalism and toward a truly free and democratic society The book takes a broad view of the major global challenges including the COVID 19 pandemic and persuasively argue that in order to resolve any of the major global problems from the ongoing ecological crisis to economic and geopolitical issues we need to confront the capitalist system To unpack the logic of contemporary capitalist ideology and the way it structures our inter personal and political relations the book gives an analysis of the end of ideology narrative and offers a critical assessment of the ideas behind the widely used but fundamentally flawed concept of

Liberal democracy The book revisits metaphysical foundations behind the ideology of capitalism exposing their secular religious dimension and their immanent oppressiveness Based on this deconstruction of the metaphysical foundations implicit in Neo Liberalism and capitalism the book offers a way in which alternative metaphysical foundations can be constructed to allow for different socio political and economic models that would be based on a radical affirmation of freedom and democracy as well as human responsibility for the natural environment Beyond Capitalist Dystopia Reclaiming Freedom and Democracy in the Age of Global Crises will be of great interest to anyone searching for alternatives to the pervasive ideology of capitalism as well as students and researchers active in various fields in the humanities and social sciences **Climate**

Change and the Crisis of Capitalism Mark Pelling, David Manuel-Navarrete, Michael Redclift, 2012-08-21 Are established economic social and political practices capable of dealing with the combined crises of climate change and the global economic system Will falling back on the wisdoms that contributed to the crisis help us to find ways forward or simply reconfigure risk in another guise This volume argues that the combination of global environmental change and global economic restructuring require a re thinking of the priorities processes and underlying values that shape contemporary development aspirations and policy This volume brings together leading scholars to address these questions from several disciplinary perspectives environmental sociology human geography international development systems thinking political sciences philosophy economics and policy management science The book is divided into four sections that examine contemporary development discourses and practices It bridges geographical and disciplinary divides and includes chapters on innovative governance that confront unsustainable economic and environmental relations in both developing and developed contexts It emphasises the ways in which dominant development paths have necessarily forced a separation of individuals from nature but also from society and even from self These three levels of alienation each form a thread that runs through the book There are different levels and opportunities for a transition towards resilience raising questions surrounding identity governance and ecological management This places resilience at the heart of the contemporary crisis of capitalism and speaks to the relationship between the increasingly global forms of economic development and the difficulties in framing solutions to the environmental problems that carbon based development brings in its wake Existing social science can help in not only identifying the challenges but also potential pathways for making change locally and in wider political economic and cultural systems but it must do so by identifying transitions out of carbon dependency and the kind of political challenges they imply for reflexive individuals and alternative community approaches to human security and wellbeing Climate Change and the Crisis of Capitalism contains contributions from leading scholars to produce a rich and cohesive set of arguments from a range of theoretical and empirical viewpoints It analyses the problem of resilience under existing circumstances but also goes beyond this to seek ways in which resilience can provide a better pathway and template for a more sustainable future This volume will be of interest to both undergraduate and postgraduate students studying Human

Geography Environmental Policy and Politics *The Meaning of Growth* Richard McNeill Douglas, 2025-09-30 Since the Limits to Growth report was published in 1972 it has been widely known that a commitment to endless growth was putting us on course for environmental disaster so why have we failed to take decisive political action in the half century since then In *The Meaning of Growth* Richard McNeill Douglas uses interpretive social science to uncover the cultural roots of political resistance to environmental science and policy Through a close reading of anti environmentalist rhetoric the book identifies its idolisation of growth as a defence of a modern Western European world view focusing on values of freedom power and immortality The significance of these findings is drawn out by applying the secularisation thesis a theoretical account of the development of a modern understanding of reality from a theological world view to which it is ostensibly opposed This framework is used to offer a deep interpretation of what is at stake in environmental debate that to accept there are limits to growth means abandoning crucial elements of a faith in a theodicy of progress that makes life meaningful in a secular age Douglas concludes by suggesting that the precondition for political action on the environment is a change of philosophical perspective that provides for a sense of meaning in a world of limits This book should be of interest to academics in the fields of environmental sociology and communications studies as well as activists interested in understanding the motivations of anti environmentalist campaigners and how to counter their influence

Beyond the Frontiers of Political Science: Is Good Governance Possible in Cataclysmic Times? Daniele Conversi, Lorenzo Posocco, Iarfhlaith Watson, 2024-04-04 Over the last 10 years political science has produced a vast amount of research on the impact of climate change and related existential disasters on existing political institutions Hundreds of articles and books have been written on the environmental state the green state environmental governance sustainable institutions and so on However no research in this field can prosper without a strong input from other disciplinary areas particularly the natural sciences Climate change is a complex and challenging set of interlinked events phenomena and resulting problems and so it defies the usual disciplinary boundaries The only way to progress and tackle these is by harnessing the entire apparatus of human knowledge and going beyond the frontiers of what we already know while envisioning new scenarios and institutional forms

Global Capitalism and the Crisis of Humanity William I. Robinson, 2014-07-28 This exciting new study provides an original and provocative expos of the crisis of global capitalism in its multiple dimensions economic political social ecological military and cultural Building on his earlier works on globalization William I Robinson discusses the nature of the new global capitalism the rise of a globalized production and financial system a transnational capitalist class and a transnational state and warns of the rise of a global police state to contain the explosive contradictions of a global capitalist system that is crisis ridden and out of control Robinson concludes with an exploration of how diverse social and political forces are responding to the crisis and alternative scenarios for the future

Fiduciary Duty and the Atmospheric Trust Charles Sampford, Ken Coghill, Tim Smith, 2016-04-15 This book explores the application of concepts of fiduciary duty or public trust in responding to the policy and governance challenges posed by policy problems that extend over multiple terms of government or even as in the case of climate change human generations The volume brings together a range of perspectives including leading international thinkers on questions of fiduciary duty and public trust Australia's most prominent judicial advocate for the application of fiduciary duty top law scholars from several major universities expert commentary from an influential climate policy think tank and the views of long serving highly respected past and present parliamentarians The book presents a detailed examination of the nature and extent of fiduciary duty looking at the example of Australia and having regard to developments in comparable jurisdictions It identifies principles that could improve the accountability of political actors for their responses to major problems that may extend over multiple electoral cycles

The Planetary Subaltern Somasree Sarkar, Agnibha Maity, 2025-09-30 This book initiates a dialogue between two discursive fields of study the Anthropocene and the Subaltern Studies It highlights communities that bear the brunt of climate precarity and planetary crises and examines critiques of the Anthropocene discourse for grossly overlooking the subaltern communities and failing to integrate their historiography The essays in the volume retrieve and amplify voices of subaltern communities amid planetary crises especially in India to set up new paradigms to engage and tackle the climate crises that confront our times This volume will be of great interest to scholars and researchers of South Asian studies literary criticism especially ecocriticism environmental studies and climate action

Games and Play in the Creative, Smart and Ecological City Dale Leorke, Marcus Owens, 2020-12-30 This book explores what games and play can tell us about contemporary processes of urbanization and examines how the dynamics of gaming can help us understand the interurban competition that underpins the entrepreneurialism of the smart and creative city Games and Play in the Creative Smart and Ecological City is a collection of chapters written by an interdisciplinary group of scholars from game studies media studies play studies architecture landscape architecture and urban planning It situates the historical evolution of play and games in the urban landscape and outlines the scope of the various ways games and play contribute to the city's economy cultural life and environmental concerns In connecting games and play more concretely to urban discourses and design strategies this book urges scholars to consider their growing contribution to three overarching sets of discourses that dominate urban planning and policy today the creative and cultural economies of cities the smart and playable city and ecological cities This interdisciplinary work will be of great interest to students and scholars of game studies play studies landscape architecture and allied design fields urban geography and art history Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com/books/e/9781003007760>

Economic Crises and Global Politics in the 20th Century Alexander

Nützenadel, Cornelius Torp, 2016-04-08 This book analyses the history of economic crises from the angle of international politics and its transformation throughout the 20th century While political and economic debates in the wake of the present financial crisis are revolving around the question of how to create effective forms of global governance historians have discovered a long tradition of international economic regulation that can be traced back to the late 19th century In the global economy sovereign defaults banking crises and currency crashes have been recurrent phenomena At the same time alongside the growing globalization of commodity and capital markets nation states have introduced new forms of regulation both on the national and international level The experience of economic crises has been an important driver behind numerous initiatives to foster global politics The purpose of the book is to reconnect economic history with the perspectives of political economy and the history of international relations It forms a dialogue between the disciplines that have been increasingly separated throughout the past decades With first rate economic historians and political economists writing for a wider audience it simultaneously makes public debates and methods of recent cutting edge research in economic history within a wider academic community This book was originally published as a special issue of the European Review of History

After Suburbia Roger Keil, Fulong Wu, 2022-08-31 After Suburbia presents a cross section of state of the art scholarship in critical global suburban research and provides an in depth study of the planet s urban peripheries to grasp the forms of urbanization in the twenty first century Based on cutting edge conceptual thought and steeped in richly detailed empirical work conducted over the past decade After Suburbia draws on research from Asia Africa Australia Europe and the Americas to showcase comprehensive global scholarship on the urban periphery Contributors explicitly reject the traditional centre periphery dichotomy and the prioritization of epistemologies that favour the Global North especially North American cases over other experiences In doing so the book strongly advances the notion of a post suburban reality in which traditional dynamics of urban extension outward from the centre are replaced by a set of complex contradictory developments After Suburbia examines multiple centralities and diverse peripheries which mesh to produce a surprisingly contradictory and diverse metropolitan landscape

The Crises of Capitalism Saral Sarkar, 2014-03-18 For nearly 300 years capitalism propelled the world s most successful economies to new heights of development But a spate of global environmental disasters and severe economic crises compels thinkers to question whether the system continues to function Leveraging historical perspective extensive research and case studies The Crises of Capitalism builds a compelling argument that challenges the most fundamental assumptions of prevailing economic theory Saral Sarkar exposes capitalism s flaws through the lens of ecosocialism a philosophy that asserts that natural resources drive production and development Keynes Schumpeter Marx and Engles had no reason to believe that there would ever be a shortage of oil minerals water or food and that technological innovation could surmount any obstacle But oil extraction has peaked food is harder to come by and the cost to maintain what natural resources remain has increased exponentially Capitalism requires constant innovation to create growth but as

Sarkar establishes even computers wouldn't exist without copper, gold, and zinc. The Crises of Capitalism exists at the intersection of environmental awareness and economic theory. Sarkar challenges predominant explanations for catastrophic events like the 2008 global economic crisis, revises the classic paradigm of growth, and points to evidence of systemic economic failure. In this provocative, revolutionary criticism, Sarkar suggests that like other long-abandoned economic theories, capitalism has reached its limits. This is an important book, and it is on the front edge of the thinking that has to come to bear on the real crisis the world is facing: of the impossible idea of growth forever and the economic model that is driving the planet into irreversible crises. Doug Tompkins

Holistic Innovation Jin Chen, 2023-03-12 This book is a new exploration of the paradigm of innovation with Chinese characteristics in the context of a new era. Based on the evolution of innovation paradigm theories at domestic and international level, the book initiates a dialogue between Eastern and Western innovation theories. The book proposes holistic innovation, which is defined as an open, collaborative, and total innovation under the guidance of strategy in order to make effective allocation of resources. This book further discusses and summarizes the application of holistic innovation in the upgrading of global value chains, China's high-value-added manufacturing, the urban Internet rural development, and other related corporate and industrial cases, regional development, and national strategies.

E, 1992 **Social Transformations and Revolutions** Johann P. Arnason, 2016-07-10 Prompted by the 25th anniversary of the Soviet collapse, this volume reflects on revolutions and transformations around the collapse of the Soviet Bloc, the political transformations after 9/11, the important changes following the global economic crisis, and the revolutionary transformations of India and China. The authors stress that the United States military actions after the 9/11 terrorist attacks have had a major transformative impact on the global arena. More recently, the economic crisis that began in 2007/8 caused a series of breakdowns and provoked demands for social and political transformation so far unfulfilled. The repercussions of the Arab Spring and transformations linked to the rise of BRICS are altering the patterns of international and global relations. All these processes have unfolded within the framework of global capitalism, whose reproduction on an expanding scale involved multiple economic, political, ecological, and civilizational transformations.
