*Beyond the Pleasure Principle* Sigmund Freud, 2015-02-18 Controversial 1920 publication expands Freud's theoretical approach to include the death drive. The philosopher's concept of the ongoing struggle between harmony (Eros) and destruction (Thanatos) influenced his subsequent work. [\(Re\)Writing War in Contemporary Literature and Culture](#) Cristina Pividori, David Owen, 2024-07-09 *Re Writing War in Contemporary Literature and Culture Beyond Post Memory* is an exploration of war narratives through the lens of postmemory offering a critical re-evaluation of how contemporary literature and cultural products reshape our understanding of past conflicts. This volume presents a rich tapestry of perspectives drawing from an array of conflicts and incorporating insights from international experts across various disciplines including contemporary literature, film studies, visual arts, and cultural studies. It critically builds upon and extends Marianne Hirsch's concept of postmemory engaging with complex themes like the ethical dimensions of war, writing the authenticity of representations, and the creative power of art in reimagining traumatic events. This study not only challenges traditional boundaries in war literature and memory studies but also resonates with contemporary concerns about societal engagement with violent pasts making it a significant addition to scholarly discourse and essential reading for those interested in the intersection of history, memory, and literature. [The Poetics and Ethics of \(Un-\)Grievability in Contemporary Anglophone Fiction](#) Susana Onega, Jean-Michel Ganteau, 2022-12-27 The working hypothesis of the book is that since the 1990s an increasing number of Anglophone fictions are responding to the new ethical and political demands arising out of the facts of war, exclusion, climate change, contagion, posthumanism, and other central issues of our post-trauma age by adapting the conventions of traditional forms of expressing grievability such as elegy, testimony, or pseudo-autobiography. Situating themselves in the wake of Judith Butler's work on ungrievability, the essays collected in this volume seek to cast new light on these issues by delving into the socio-cultural constructions of grievability and other types of vulnerabilities, invisibilities, and inaudibilities linked with the neglect and/or abuse of non-normative individuals and submerged groups that have been framed as disposable, exploitable, and/or unmournable by such determinant factors as sex, gender, ethnic origin, health, etc. thereby refining and displacing the category of subalternity associated with the poetics of postmodernism. [Anacarnation and Returning to the Lived Body with Richard Kearney](#) Brian Treanor, James L. Taylor, 2022-10-26 This edited collection responds to Richard Kearney's recent work on touch, excarnation, and embodiment as well as his broader work in carnal hermeneutics which sets the stage for his return to and retrieval of the senses of the lived body. Here fourteen scholars engage the breadth and depth of Kearney's work to illuminate our experience of the body. The chapters collected within take up a wide variety of subjects from nature and non-human animals to our experience of the sacred and the demonic and from art's account of touching to the political implications of various types of embodiment. Featuring also an inspired new reflection from Kearney himself in which he lays out his vision for anacarnation, this volume is an important statement about

the centrality of touch and embodiment in our experience and a reminder that despite the excarnating tendencies of contemporary life the lived body remains a touchstone for wisdom in our increasingly complicated and fragile world Written for scholars and students interested in touch embodiment phenomenology and hermeneutics this diverse and challenging collection contributes to a growing field of scholarship that recognizes and attempts to correct the excarnating trends in philosophy and in culture at large

The Legacy of Erich Fromm Daniel Burston,1991 This is the first full scale intellectual biography in English of Erich Fromm perhaps the most widely read psychoanalyst after Freud whose contributions to clinical and social psychology and the history of the psychoanalytic movement have long been underrated Though considered a pedant a popularizer *Escape from Freedom* *The Sane Society* and *The Art of Loving* among others were best sellers and an outsider in many psychoanalytic circles Fromm played a historic role in the development of the discipline As a member of Freud s loyal opposition with strong leanings toward the dissident fringe he helped effect the transfer of productive ideas from the periphery to the mainstream of the psychoanalytic movement Daniel Burston s meticulous elucidation of these ideas unravels the numerous strands philosophical literary and social that formed a part of Freud s own work and of Fromm s sympathetic but not uncritical reaction to Freudian orthodoxy Despite his grounding in the tradition of Freud contemporaries and former associates persistently misunderstood Fromm s work Insofar as he attempted to decipher the ideological subtexts to Freudian theory analytically oriented theorists doing clinical or social research avoided his ideas His Marxist leanings and his radically historical approach to human behavior made it all but impossible for mainstream academic psychologists to grasp his meaning much less to grant it any validity At the same time his humanistic and ethical concerns struck many psychologists as grossly unscientific Practical and intellectual constraints have conspired to ensure that Fromm s impact has been peripheral at best Burston s eloquent evenhanded reassessment of Fromm s life and work cuts through the ideological and political underbrush to reveal his pivotal role as a theorist and a critic of modern psychoanalysis It leads readers back to Freud whose theoretical and clinical contributions Fromm refracted and extended and on to controversies that remain a vital part of contemporary intellectual life

**Self-Fulfillment** Alan Gewirth,2009-11-02 Cultures around the world have regarded self fulfillment as the ultimate goal of human striving and as the fundamental test of the goodness of a human life The ideal has also been criticized however as egotistical or as so value neutral that it fails to

distinguish between for example self fulfilled sinners and self fulfilled saints Alan Gewirth presents here a systematic and highly original study of self fulfillment that seeks to overcome these and other arguments and to justify the high place that the ideal has been accorded He does so by developing an ethical theory that ultimately grounds the value of self fulfillment in the idea of the dignity of human beings Gewirth begins by distinguishing two models of self fulfillment aspiration fulfillment and capacity fulfillment and shows how each of these contributes to the intrinsic value of human life He then distinguishes between three types of morality universalist particularist and personalist and shows how each contributes to the values embodied in self fulfillment Building on these ideas he develops a Dialectical conception of reason that shows how human rights are central to self fulfillment Gewirth also argues that self fulfillment has a social as well as an individual dimension that the nature of society and the obstacles that disadvantaged groups face affect strongly the character of the self fulfillment that persons can achieve Bold in scope and rigorous in execution Self Fulfillment is a powerful new contribution to moral social and political philosophy

**Engagements With The World** Ron Leifer MD MA, 2013-05 After fifty years of futile research on mind and behavior trying to find their causes in the brain without success psychiatrists and psychologists are turning their attention to the emotions also looking for their causes in the brain also without success The problem is that there is no generally accepted theory or paradigm for understanding the emotions William James suggested that such a paradigm must meet two criteria 1 it must explain each individual emotion i.e. anxiety anger depression etc and 2 it must relate all the emotions to each other This book presents such a paradigm It is based on the accepted biological principle that all organisms from the lowest to the highest function in two biological motives which I call bipolar reactivity All organisms seek pleasure and or that which sustains and promotes life and all organisms seek to avoid pain and or that which threatens or disables life Interestingly this biological principle corresponds to a basic principle of Buddhist psychology that the pain we cause to ourselves and to each other is caused by the Three Poisons desire aversion and ego Desire and aversion link humans to the great chain of being and ego distinguishes humans from all other beings and recognizes our unique

capacity for symbolic reactivity I have used this paradigm for fifty years in my practice of psychotherapy and have found it very useful for understanding my patients mental and emotional pain and helping them to understand and heal themselves

*Antigone, Interrupted* Bonnie Honig, 2013-05-02 Sophocles Antigone is a touchstone in democratic feminist and legal theory and possibly the most commented upon play in the history of philosophy and political theory Bonnie Honig's rereading of it therefore involves intervening in a host of literatures and unsettling many of their governing assumptions Exploring the power of Antigone in a variety of political cultural and theoretical settings Honig identifies the Antigone effect which moves those who enlist Antigone for their politics from activism into lamentation She argues that Antigone's own lamentations can be seen not just as signs of dissidence but rather as markers of a rival world view with its own sovereignty and vitality Honig argues that the play does not offer simply a model for resistance politics or equal dignity in death but a more positive politics of counter sovereignty and solidarity which emphasizes equality in life

*Taming Time, Timing Death* Rane Willerslev, Dorthe Refslund Christensen, 2016-04-01 Departing from a persisting current in Western thought which conceives of time in the abstract and often reflects upon death as occupying a space at life's margins this book begins from position that it is in fact through the material and perishable world that we experience time As such it is with death and our encounters with it that form the basis of human conceptions of time Presenting rich interdisciplinary empirical studies of death rituals and practices across the globe from the US and Europe Asia The Middle East Australasia and Africa Taming Time Timing Death explores the manner in which social technologies and rituals have been and are implemented to avoid delay or embrace death or communicate with the dead thus informing and manifesting humans understanding of time It will therefore be of interest to scholars and students of anthropology philosophy sociology and social theory human geography and religion
