occasioned by wartime necessity from its employment as a fighter to its evolution as a fighter bomber One of the principal types in the Luftwaffe's inventory at the beginning of World War II the piston engined Bf 109 was central to the many initial victories that the Germans achieved before coming up against the unbeatable RAF during the Battle of Britain Nevertheless by the second half of 1940 the Bf 109's operability was widened due to operational needs and it was flown as a fighter bomber for precision attacks in Southern England At first ad hoc conversions were made in the field to allow the aircraft to carry a bomb or extra fuel tank Such modifications were soon formalised by Messerschmitt which created the Jabo Bf 109s Drawing from pilots first hand accounts author Malcolm V Lowe explores the number of specialised units including Lehrgeschwader 2 and dedicated fighter bomber sections of standard fighter units such as 10 Staffel of Jagdgeschwader 26 which flew this highly specialised fighter bomber Including technical specifications rare photographs and outstanding artwork this book explores the Jabo versions of the Bf 109E F and G both on the production line and with the addition of Rostzke field conversion kits *Modelling the Messerschmitt Bf 109F and early G series* Brett Green, 2012-02-20 The Messerschmitt Bf 109 is one of the most recognizable fighter aircraft in history and this book focuses on the Messerschmitt Bf 109F and early G models the Friedrich and Gustav the workhorses of the German Luftwaffe during the middle years of World War II Detailing five different builds across the scales and featuring aircraft in camouflage schemes and markings from the Western Desert to the Russian Steppes this book is an excellent source of reference for both the beginner and expert modeller on one of the most effective killing machines of World War II **Bf 109 Aces of North Africa and the Mediterranean** Jerry Scutts, 2012-11-20 Totally outnumbered throughout their short two year sojourn in the Western Desert the crack fighter pilots of the handful of Jagdgeschwader in theatre fought an effective campaign in support of Rommel's Afrika Korps against the British and American forces Relying almost exclusively on the Luftwaffe's staple fighter of World War 2 the Messerschmitt Bf 109 the battle hardened aces used the aircraft's superior performance to achieve incredible scores against the Allies Similarly once pushed out of North Africa these units continued to take the fight to the RAF and USAAF from makeshift bases in northern Italy *Soviet Fighters of the Second World War* Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re-equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft in terms of design camouflage and markings From the I 15bis biplane of the
