Aggarwal, Kristi Govella, 2012-10-11 The connections between trade and security are hardly new Analysts and practitioners have clearly recognized this interrelationship since the mercantilist arguments of the 16th and 17th centuries Despite wishful economic liberal thinking that might prefer to separate the political from the economic it is widely recognized that trade and security are fundamentally interconnected in the foreign policy of states Over time as new forms of trade policy have come into being and the international security environment has evolved the nexus of these two spheres has grown more complex and scholars have struggled to understand their interconnection This edited volume addresses linkages between trade and security by examining the influence of security factors in driving trade policy measures and the corresponding implications of different types of trade arrangements for international security Ultimately the project shows that several elements traditional economic factors traditional security factors and human security factors can affect the development of trade agreements and unilateral policies and that trade policies may have both a direct and an indirect effect on traditional and human security The project focuses on Asia a region where economics is increasingly important but many security issues still linger unresolved as a primary setting to test trade linkage theories It also provides a comparative perspective through examination of how the EU and US have used their trade policies to achieve non economic goals and how these policies have influenced their security environment Case studies in this project cover key trade institutions and agreements including the World Trade Organization the Association of Southeast

The Social Sources of Financial Power Leonard Seabrooke, 2018-07-05 A state's financial power is built on the effect its credit property and tax policies have on ordinary people this is the key message of Leonard Seabrooke's comparative historical investigation which turns the spotlight away from elite financial actors and toward institutions that matter for the majority of citizens Seabrooke suggests that everyday contests between social groups and the state over how the economy should work determine the legitimacy of a state's financial and fiscal system Ideally he believes such contests compel a state to intervene on behalf of people below the median income level leading the state to broaden and deepen its domestic pool of capital while increasing its influence on international finance But to do so Seabrooke asserts a state must first challenge powerful interests that benefit from the concentration of financial wealth Seabrooke's novel constructivist approach is informed by economic sociology and the work of Max Weber This book demonstrates how domestic legitimacy influences the character of international financial orders It will interest all readers concerned with how best to transform state intervention in the economy for the good of the majority

International Political Economy Benjamin J. Cohen, 2021-07-13 The field of international political economy gained prominence in the early 1970s when the Arab oil embargo and other crises ended the postwar era of virtually unhindered economic growth in the United

States and Europe and today is an essential part of both political science and economics This book offers the first comprehensive examination of this important field s development the contrasting worldviews of its American and British schools and the different ways scholars have sought to meet the challenges posed by an ever more complex and interdependent world economy Benjamin Cohen explains the critical role played by the early intellectual entrepreneurs a generation of pioneering scholars determined to bridge the gap between international economics and international politics Among them were brilliant thinkers like Robert Keohane Susan Strange and others whose legacies endure to the present day Cohen shows how their personalities and the historical contexts in which they worked influenced how the field evolved He examines the distinctly different insights of the American and British schools and addresses issues that have been central to the field s development including systemic transformation system governance and the place of the sovereign state in formal analysis The definitive intellectual history of international political economy this book is the ideal volume for IPE scholars and those interested in learning more about the field

enriches the debate With its methodological and epistemological explorations this book is an indispensable resource for scholars and students of international relations and security studies as well as researchers focusing on specific world areas Embark on a captivating journey through the multifaceted landscape of global affairs Interregionalism and the European Union Mario Telò, Louise Fawcett, Frederik Ponjaert, 2016-03-09 Is the EU isolated within the emergent multipolar world Concentrating on interregional relations and focussing on the European Union's EU evolving international role with regards to regional cooperation this innovative book collects a set of fresh empirical analyses of interregional ties binding the EU with its Eastern and Southern neighbourhood as well as with Asia Africa and the Americas The 25 leading authors from 5 continents have contributed original and diverse chapters and the book advances a novel theoretical post revisionist approach beyond both the Eurocentrism of Europe First perspectives as well as the Euroscepticism of those advocating to simply move Beyond Europe After a Foreword by A Acharya the book's five sections reflect the main drivers of EU interregional policies The European Union as a Sophisticated Laboratory of Regional and Interregional Cooperation with chapters by M Telò, L Fawcett and T Risse De Facto Drivers of Regionalism F Ponjaert M Shu A Vallado and C Jakobeit De Jure Drivers of Regionalism S Lavenex G Finizio C Jakobeit R Coman C Cocq S Teo L Shah Cognitive Drivers of Regionalism J Riland E Fitriani S Stavridis S Kingah P Bacon and Instrumental Drivers of Regionalism B Delcourt C Olsson G Moller A Malamud P Seabra and L Fioramonti J Kostopoulos *Civil Society Regionalization in Southern Africa* Andréas Godsäter, 2016-05-12 This book investigates civil society regionalization in Southern Africa The point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s However whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important gaps remain in particular the relatively scant emphasis given to civil society This particularly relates to regions in the global South including Southern Africa The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa both empirically and from a theoretical perspective through analysing the cases of trade and HIV AIDS The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and to a less extent making identities regional Furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization Lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa
