For the Love of All Creatures William Greenway, 2015 Fresh biblical take on a transcending divine grace that embraces all of God's creatures This broad ranging groundbreaking book by William Greenway unfolds a biblical spirituality centering on love for all creation and all creatures Greenway rereads the creation and flood narratives in Genesis from an overtly creature loving perspective that not only inspires care for creation but also reveals sophisticated understandings of faith grace and evil vital for twenty first century spirituality Comparing the ancient Israelite cosmology of Genesis both with the ancient Babylonian cosmology of the Enuma Elish and with the modern Darwinian cosmology of Thomas Hobbes's Leviathan Greenway shows how the Bible in Genesis extends far beyond those other cosmologies in its discernment of the transcending gracious love of God Standing at the intersection of animal rights green biblical studies and philosophical theology Greenway's *For the Love of All Creatures* will interest and inform a wide range of readers *The Story of Creation* Samuel Miner Campbell, 1877

Ryan, 2014-01-10 The idea of the complete annihilation of all life is a powerful and culturally universal concept As human societies around the globe have produced creation myths so too have they created narratives concerning the apocalyptic destruction of their worlds This book explores the idea of the apocalypse and its reception within culture and society bringing together 17 essays that explore both the influence and innovation of apocalyptic ideas from classical Greek and Roman writings to the foreign policies of today's United States *What's Going On?* Lawrence Grossberg, 2025-10-24 Exploring the backstory of contemporary political polarization What's Going On recognizes that simple stories of blame and uncontested stories of polarization prove themselves to be bad stories that produce bad politics This book argues that stories have increasingly become matters of affect rather than meaning instead of asking what stories mean we are likely to ask how

they make people feel These stories are cultural tendencies that define the possibilities and limits of political action and behavior and the book tells its own story about how the stories of America's crises have defined our political culture as they struggle over questions of ideology identity and social belonging It lays out a theoretical position that recognizes the need for complicated stories and rigorous thought pointing a way forward out of the chaos seeking to repair the world and offer better stories and more humane political possibilities This work is a vital resource for students and instructors in sociology political science cultural studies media studies and communication in such courses as contemporary social theory contemporary political theory media politics and society and social movements and resistance The book will be an important guide for activists organizers and community field workers and for anyone else who wishes to have a better understanding of the contemporary political moment and how to mobilize toward building a better future New England at 400 Eric D.

Lehman, 2019-12-17 At the 400th anniversary of the pilgrims arrival 1620 2020 it's time to look back commemorate and reflect on what New England has meant to its people and to the world New England at 400 From Plymouth Rock to Present Day describes how every generation of immigrants and natives Puritans and patriots has defined this land anew It is a story of transformation but also continuity since New England embodies both a collective philosophy and a shared past Each chapter covers a decade of important incidents and events that defined or shaped the regional character land and culture

Harmon, 2019-05-23 This study is the story of the local Civil Rights Movement and race relations in Atlanta Georgia from 1946 to 1981 Most examinations of the Civil Rights Movement have been written from a national perspective These studies have presented local African American protest movements as part of a national campaign for civil rights that lasted approximately from 1955 the Montgomery Bus Boycott to 1968 the assassination of Dr Martin Luther King Jr In this context demonstrations in Montgomery Greensboro Albany Birmingham Selma and Memphis have been viewed as prototypical African American protest movements and milestones in this national campaign for civil rights First published in 1996 Routledge is an imprint of Taylor Francis an informal company **Secrets Can be Murder**

Jane Velez-Mitchell, 2008-06-10 A respected television news journalist dissects the nation's most fascinating recent trials and court cases unearthing the disturbing secrets of criminals and victims and revealing how little separates a so-called normal life from that of a sociopath Seeing New Worlds Laura Dassow Walls, 1995-11-01 Thoreau was a poet a naturalist a major American writer Was he also a scientist He was Laura Dassow Walls suggests Her book the first to consider Thoreau as a serious and committed scientist will change the way we understand his accomplishment and the place of science in American culture Walls reveals that the scientific texts of Thoreau's day deeply influenced his best work from *Walden* to the *Journal* to the late natural history essays Here we see how just when literature and science were splitting into the two cultures we know now Thoreau attempted to heal the growing rift Walls shows how his commitment to Alexander von Humboldt's scientific

approach resulted in not only his marriage of poetry and science but also his distinctively patterned nature studies In the first critical study of his *The Dispersion of Seeds* since its publication in 1993 she exposes evidence that Thoreau was using Darwinian modes of reasoning years before the appearance of *Origin of Species* This book offers a powerful argument against the critical tradition that opposes a dry mechanistic science to a warm organic Romanticism Instead Thoreau's experience reveals the complex interaction between Romanticism and the dynamic law seeking science of its day Drawing on recent work in the theory and philosophy of science as well as literary history and theory *Seeing New Worlds* bridges today's two cultures in hopes of stimulating a fuller consideration of representations of nature
