Note: When comparing scores over time, the assessment used for program monitoring is used, not the individual assessment scores. To ensure comparability to the child's previous level of functioning, program adaptive and non-adaptive scores are calculated using the same assessment instrument. Therefore, scores are calculated using the same instrument for all indicators. When comparing scores over time, the assessment used for program monitoring is used, not the individual assessment scores.

* For infants younger than 24 months, the Communication Subt, Functional Play/Imaginative, and Motor Subt scores are not calculated by the test.
