Environmental Audit Committee, 2008-08-04 This year's budget made some significant changes to annual road tax vehicle excise duty or VED The main changes included introduction of six new VED bands from 2009 10 bringing the total number of bands to 13 applying this new regime of 13 bands to existing cars on the road first registered on or after 1 March 2001 and introduction of a new rate of VED for new cars in the first year in which they are bought The Environmental Audit Committee's aims in this report were to examine the projected environmental impacts of these changes to review how fair these changes are and to make recommendations to the Treasury as to how it should proceed The Committee felt that there was nothing intrinsically wrong in the rebanding of cars registered since 2001 but that there was a lack of data about the financial impacts of these change on lower income groups The new first year rates were welcomed However concerns remain that the differentials between VED bands are still not large enough to drive market transformation The Treasury should have taken much greater care to explain the changes in VED in the Budget If the point of green taxes is to change behaviour they need to be properly publicised In general the Treasury needs to develop a proper communications strategy Drum ,2005 **The 15th International Conference Interdisciplinarity in Engineering** Liviu Moldovan, Adrian Gligor, 2022-02-02 This book contains research papers that were accepted for presentation at the 15th International Conference on Interdisciplinarity in Engineering INTER ENG 2021 which was held on October 7 8 2021 in the city of T rgu Mure Romania The general scope of the conference Innovative aspects of Industry 4 0 concepts aimed at consolidating the digital future of manufacturing in companies is proposing a new approach related to the development of a new generation of smart factories grounded on the manufacturing and assembly process digitalization It is related to advance manufacturing technology lean manufacturing sustainable manufacturing additive manufacturing and manufacturing tools and equipment It is a leading international professional and scientific forum of great interest for engineers and scientists who can read in this book research works contributions and recent developments as well as current practices in advanced fields of engineering INTER-ENG 2020 Liviu Moldovan, Adrian Gligor, 2021-05-31 These proceedings contain research papers that were accepted for presentation at the 14th International Conference Inter Eng 2020 Interdisciplinarity in Engineering which was held on 8 9 October 2020 in T rgu Mure Romania It is a leading international professional and scientific forum for engineers and scientists to present research works contributions and recent developments as well as current practices in engineering which is falling into a tradition of important scientific events occurring at Faculty of Engineering and Information Technology in the George Emil Palade University of Medicine Pharmacy Science and Technology of T rgu Mures Romania The Inter Eng conference started from the observation that in the 21st century the era of high technology without new approaches in research we cannot speak of a harmonious society The theme of the conference proposing a new approach related to Industry 4 0 was the development of a new generation of smart factories based on the manufacturing and assembly process digitalization related
