

JLO Twin Cylinder Engines

Disassembly and Assembly Procedure

Models LR-340/2 (2F-340-1), LR-399/2 (2F-400-1) and LR-440/2 (2F-440-2)

Disassembly

A. Recoil Starter

Remove four screws holding recoil to fan housing and the spacers and washers. Remove recoil assembly, complete. For detailed service instructions refer to Recoil Starter, Disassembly and Assembly.

B. Lower Fan Pulley and Carrier Assembly

Remove three hexhead screws on carrier. Remove dust seal, carrier, lower pulley halves and V-belt.

C. Upper Fan Belt Pulley Assembly

To keep impeller from turning, insert a punch through the fan housing and into the impeller body. With a 17 mm. wrench, remove fan nut. Pull out the loosened assembly—nut, washer, spacers, and upper pulley halves.

D. Flywheel Magneto

Make sure spark plugs are tight. Working against engine compression, with a 27 mm. wrench, remove crankshaft nut by striking wrench a few sharp blows with a hammer. To pull flywheel, attach special puller to flywheel flange, using three of the recoil starter screws previously removed. Screw into the three holes on flange and tighten. Turn puller until bolt touches tip of crankshaft. With a 24 mm. socket wrench, turn puller bolt clockwise and extract flywheel. Note that key may come loose and adhere to the flywheel magnets.

E. Intake Manifold

Remove the four nuts holding manifold and the two lower coil cover screws. Take off manifold and coil cover. Remove screw holding spark plug wires to side of fan housing.

F. Fan Housing: Armature Plate

Disconnect solid blue and blue-yellow coil wires. With a metric Allen Head wrench, remove the 4 socket cap screw holding fan housing to crankcase. To loosen, place unit with fan housing protruding over end of workbench and, holding housing with one hand, hit light but sharp blows around edge of housing. Pull housing straight out past the crankshaft careful not to cut the oil seal on the keyway. From front of fan housing, drive out shaft and fan. The fan housing bearings may now be removed by punching out from the side opposite that from which they are normally inserted. Remove bearing spacer.

The armature plate is attached to the fan housing by two slotted screws and can be removed at this time. Scratch-mark its original position before removing to facilitate engine timing.

G. Spark Plugs

Remove with a socket wrench.

H. Cylinder Heads

With 17 mm. wrench remove head nuts and lift head and gasket from cylinder block. Mark cylinder head and corresponding cylinder in order to assure proper reassembly. The number closest to the P.T.O. end is always considered the #1 cylinder. Repeat operation for second cylinder.
