

Speedometer

This speedometer shows indicated vehicle speed in miles per hour and kilometers per hour.

Odometer

The amount of figures in the speedometer face, odometer indicates the accumulated mileage in miles.

Tempo-Resistant Odometer

Forced oil gas problems, interfering with vehicle instrument to show accumulated mileage. For your protection the odometer on this vehicle is designed with tempo-resistant features to indicate tampering. It also has a tempo-resistant odometer indicator. It is built so that the odometer has been tampered with or corrected. The mileage shown may not be correct.

When a new odometer is installed and cannot be set to the same mileage registered on the prior odometer, the law requires the owner to make a note on the driver's door frame to show the previous odometer reading and the date of replacement. The replacement odometer must then be set to zero. To determine the actual vehicle mileage, add the mileage shown on the label to the current odometer reading. If the replacement odometer can be set up to the same mileage as the prior odometer, no door frame label is needed.

Trips Odometer

This optional trip odometer may be reset to zero by turning stem to the right. This instrument may be used to more accurately record trip mileage to customers.

Fuel Gauge

This fuel gauge will register the APPROXIMATE fuel level in the tank, when the ignition is in the RUN position.

When the gauge registers EMPTY, some fuel is still available as a reserve. When the gauge registers FULL, some fuel can still be added to the tank.

The following conditions may be considered normal:

- Fuel station pumps may shut off before fuel gauge indicates FULL.
- Amount of fuel required for fill-up may not exactly correspond to gauge reading.
- Needle may not move away from FULL until some time after fill-up.
- Needle may move during turns, stops and accelerations.
- When the ignition switch is turned to the OFF position, the needle will not necessarily return all the way to the EMPTY mark.

Oil Choke Indicator Light

This light will come on to provide a "bulb check" when the ignition is turned on, but should go out after the engine is started. If light fails to come on with the ignition turned on, it could indicate a burned-out bulb, or a blown instrument lamp fuse or a defective electric choke heater circuit. Have the system repaired if light does not come on during check.
