Why Does the World Exist? Jim Holt, 2013 Why is there a world rather than nothing at all remains the most curious and most enduring of all metaphysical mysteries Moving away from the narrower paths of Christopher Hitchens Roger Penrose and Stephen Hawking the celebrated essayist Jim Holt now enters this fascinating debate with his broad lively and deeply informed narrative that traces all our efforts to grasp the origins of the universe With sly humour and a highly original personal approach Holt takes on the role of cosmological detective Suggesting that we might have been too narrow in limiting our suspects to God and the Big Bang he tracks down among others an eccentric Oxford philosopher a Nobel Laureate physicist a French Buddhist monk and John Updike just before he died to pursue this cosmic puzzle from every angle As he pieces together a solution while offering useful insights into time consciousness and eternity he sheds fascinating new light on the meaning of existence

The Lonely Mind of God Sherman O'Brien, 2021-01-26 Current students of philosophy or armchair philosophers Want the answer to the Primordial Existential Question Why is there something rather than nothing While history has produced no shortage of attempted answers clearly none is the answer Now comes the unique perspective of acosmism to provide a complete and plausible answer After a lifetime of reflection acosmist Sherman O'Brien offers this analysis of the issues and a thoughtful reasoned answer to philosophy's most vexing question The acosmic answer requires no faith whatsoever either in supernatural or unexplained causes in fact it discourages it Acosmism rejects both traditional religion and philosophically neglectful science As a metaphysical system it is based on an epistemological insight with implications for immortality determinism ethics and ultimate purpose Reasoned wholly from the ground up its conclusion is the very meaning of existence The solution to the Omniscience Riddle becomes the key to understanding how the question is best stated and understood This book represents one person's effort to make sense of what is true and what only seems to be so Why is there something rather than nothing What is your potential role in the entirety of experience This foray into acosmism offers a path to the

genuine understanding of both existence and reality Note the main text constitutes roughly two thirds of the total pages the remainder being mostly endnotes

The Difference Nothing Makes Brian D. Robinette, 2023-02-15 This book explores the doctrinal social and spiritual significance of a central yet insufficiently understood tenet in Christian theology creation from nothing In this original study Brian D Robinette offers an extended meditation on the idea of creation out of nothing as it applies not only to the problem of God but also to questions of Christology soteriology and ecology His basic argument is that creatio ex nihilo is not a speculative doctrine referring to cosmic origins but rather a foundational insight into the very nature of the God world relation one whose implications extend throughout the full spectrum of Christian imagination and practice In this sense it serves a grammatical role it gives orientation and scope to all Christian speech about the God world relation In part 1 Robinette takes up several objections to creatio ex nihilo and defends the doctrine as providing crucial insights into the gifted character of creation Chapter 2 underscores the contemplative dimensions of a theological inquiry that proceeds by way of unknowing Part 2 draws from the field of mimetic theory in order to explore the creative and destructive potential of human desire Part 3 draws upon the Christian contemplative tradition to show how the dark night of faith is a spiritually patient and discerning way to engage the sense of divine absence that many experience in our post religious post secular age The final chapter highlights creatio ex nihilo as an expression of divine love God's love for finitude for manifestation for relationship Throughout Robinette engages with biblical patristic and contemporary theological and philosophical sources including among others Ren Girard Karl Rahner and Sergius Bulgakov

Creation and Contingency in Early Patristic Thought Joseph Torchia, OP, 2019-04-10 Creation and Contingency in Early Patristic Thought The Beginning of All Things explores the interface between philosophy and theology in the development of the seminal Christian doctrine of creation ex nihilo While its main focus lies in an analysis of first to third century patristic accounts of creation it is likewise attuned to their parallelism with Middle Platonic commentaries on Plato's theory of cosmological origins in the Timaeus Just as Christian thinkers sounded out the theological implications of Gn 1 1 2 the successors to Plato's Academy debated the significance of his teaching Tim 28b that the world came to be The fact that both Genesis and the Timaeus address the beginning of all things served as a means of bridging the conceptual gap between the Greek philosophical tradition and a Christian perspective rooted in scriptural teaching Plato's Timaeus and the doxographies it inspired thus provided early Fathers of the Church with the dialectical resources for explicating their distinctive understanding of creation as a bringing into being from nothing
