Rockhound: A Geography of Collecting Michael Gordon, 2017-05-15 In this

book *Rockhound A Geography of Collecting* you will be shown Ontario's incredible history of mineral extraction and as you will see rockhounds follow in the signature that every industry left. The full *Rockhound* series tells you how and where to find crystals, minerals, gold, diamonds, and all manner of rock and mineral treasure for the collector. This book is an absolute gem and an essential guide to Ontario geology as it relates to mineral collecting. **Canada's Army** J.L. Granatstein, 2021-09-13

In this revised and updated third edition, one of Canada's leading historians covers the history of the Canadian military to the present day. **Border and Rule** Harsha Walia, 2021-02-09

In *Border and Rule*, one of North America's foremost thinkers and immigrant rights organizers delivers an unflinching examination of migration as a pillar of global governance and gendered racial class formation. Harsha Walia disrupts easy explanations for the migrant and refugee crises, instead showing them to be the inevitable outcomes of the conquest capitalist globalization and climate change that are generating mass dispossession worldwide. *Border and Rule* explores a number of seemingly disparate global geographies with shared logics of border rule that displace, immobilize, criminalize, exploit, and expel migrants and refugees. With her keen ability to connect the dots, Walia demonstrates how borders divide the international working class and consolidate imperial capitalist and racist nationalist rule. Ambitious in scope and internationalist in orientation, *Border and Rule* breaks through American exceptionalist and liberal responses to the migration crisis and cogently maps the lucrative connections between state violence, capitalism, and right wing nationalism around the world. Illuminating the brutal mechanics of state formation, Walia exposes US border policy as a product of violent territorial expansion, settler colonialism, enslavement, and gendered racial ideology. Further, she compellingly details how Fortress Europe and White Australia are using immigration diplomacy and externalized borders to maintain a colonial present, how temporary labor migration in the Arab Gulf states and Canada is central to citizenship regulation and labor control, and how racial violence is escalating deadly nationalism in the US, Israel, India, the Philippines, Brazil, and across Europe, while producing a disaster of statelessness for millions elsewhere. A must read in these difficult times of war, inequality, climate change, and global health crisis, *Border and Rule* is a clarion call for revolution. The book includes a foreword from renowned scholar Robin D G Kelley and an afterword from acclaimed activist academic Nick Estes. *Brunner & Suddarth's Canadian Textbook of Medical-Surgical Nursing* Mohamed El Hussein, Joseph Osuji, 2019-09-23

Brunner and Suddarth's Canadian Textbook of Medical Surgical Nursing is a student friendly text with an easy to read and comprehend Nursing Care Plan focus and a distinct Canadian focus. [Molybdenum-99 for Medical Imaging](#) National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on State of Molybdenum-99 Production and Utilization and Progress Toward Eliminating Use of Highly Enriched Uranium, 2016-11-28

The decay product of the medical isotope molybdenum-99 (^{99}Mo) is technetium-99m ($^{99\text{m}}\text{Tc}$) and associated medical isotopes iodine-131 (^{131}I) and xenon-133 (^{133}Xe) are used worldwide for medical diagnostic imaging or therapy. The United States consumes about half of the world's supply of ^{99}Mo but there has been no

domestic i.e. U.S. based production of this isotope since the late 1980s. The United States imports Mo-99 for domestic use from Australia, Canada, Europe, and South Africa. Mo-99 and Tc-99m cannot be stockpiled for use because of their short half-lives. Consequently, they must be routinely produced and delivered to medical imaging centers. Almost all Mo-99 for medical use is produced by irradiating highly enriched uranium (HEU) targets in research reactors, several of which are over 50 years old and are approaching the end of their operating lives. Unanticipated and extended shutdowns of some of these old reactors have resulted in severe Mo-99 supply shortages in the United States and other countries. Some of these shortages have disrupted the delivery of medical care. Molybdenum-99 for Medical Imaging examines the production and utilization of Mo-99 and associated medical isotopes and provides recommendations for medical use.

Local Communities and the Mining Industry Nicolas D. Brunet, Sheri Longboat, 2023-04-27. This book explores the challenges and opportunities at the intersection of the global mining sector and local communities by focusing on a number of international cases drawn from various locations in Canada, the Philippines, and Scandinavia. Mining's contribution to economic development varies greatly across countries. In some, it has been a major engine of development, but in others, disputes have erupted over land use, property rights, environmental damage, and revenue sharing. Corporate social responsibility programs are increasingly relied upon to manage company-community relations, yet conflicts persist in many settings with significant costs for companies and communities. Exploring the many factors and drivers that characterize relationships among different actors within the sector, the volume contributes towards the development of practical wisdom, collective understanding, common sense, and prudence required for the mining sector and community partners to realize the economic potential and social and environmental responsibilities of non-renewable resource development. The book examines case studies from Canada, Scandinavia, and the Philippines, three regions amongst the world's top countries of mining operations. Drawing on their extensive experience in these regions, the contributors explore distinctive mining sectors in the Global North and South, the variation surrounding different types of extractive industries, and at different scales, and the legal processes in place to protect local communities. Key themes include corporate social responsibility, impact assessment, foreign ownership, Indigenous Peoples' gender, local insurgency, and mining disasters, as well as climate change. The book identifies areas of future research and pathways to achieving stronger, respectful, and mutually beneficial relationships at the nexus of global mineral extraction and local communities. This book will be of great interest to students and scholars of the extractive industries, natural resource management, sustainable business, and corporate social responsibility. Indigenous studies and sustainable planning and development.
