Thanatourism and Cinematic Representations of Risk Rodanthi Tzanelli, 2016-04-14 In today s world the need to eliminate natural and human made disasters has been at the forefront of national and international socio political agendas The management of risks such as terrorism labour strikes protests and environmental degradation has become pivotal for countries that depend on their economy s tourist sector Indeed there is fear that that the end of tourism might be nigh due to inadequate institutional foresight Yet in designing relevant policies to tackle this arts such as that of filmmaking have yet to receive due consideration This book adopts an unorthodox approach to debates about the end of tourism Through twenty first century cinematic

narratives of symbolically interconnected risks it considers how art envisages the future of humanity's well-being. These risks include migration as an infectious disease, alien incursions as racialized labour, mobilities, cyborg rebellion as the fear of post-colonial otherness and zombie anthropophagy as the replacement of rooted identities by nomadic lifestyles. Such filmic scenarios articulate the futuristic survival of community as the triumph of the technological human over otherness and provide a means to debate societal risks that weave identity politics into unequal mobilities. This book will appeal to researchers and students interested in mobilities theory, tourism and travel theory, film studies and aesthetics, globalisation studies, race, labour and migration.

Cool Nations Katja Valaskivi, 2016-04-14 Nation branding is the most recent feature of imagined nation making in the history of nations. Facing global competition, national decision makers aim to distinguish their countries from others by means of branding. Quite a few nations have considered the term 'cool' suitable for describing some essence of their country's brand. *Cool Nations: Media and the Social Imaginary of the Branded Country* traces the mediated ways in which the transnational idea of cool has circulated from popular culture, fashion and marketing into describing nations. The book explores the commodification of the nation, the shift to a promotional political culture and the role of media in contributing to the circulation of the idea of the Cool Nation. The social imaginary of nation branding takes its theory and practices from marketing, unlike earlier imaginations based on ideas of democracy or citizenship. *Cool Nations* argues that cool is one of the vehicles through which the commodification of nations takes place.

Addiction, Modernity, and the City Christopher B. R. Smith, 2016 *Consumer Society and the Post-modern City* David B. Clarke, 2004-03-01 The fact that we inhabit a consumer society has incredibly far-reaching implications. Working through the often controversial ideas of the consumer society's most influential theorists, Jean Baudrillard and Zygmunt Bauman, this book assesses the ways in which consumerism is reshaping the nature and meaning of the city. It examines the nature of consumption and its increasing centrality to post-modern society by considering the development of consumerism as a central facet of social life, demonstrating that social inequalities are increasingly structured around consumption, uncovering the hidden consequences of consumerism, pondering the meaning of lifestyle, revealing how the nature of reality is changing in an age of globalization. Employing a sustained and engaging theoretical analysis, the book ranges across a variety of sometimes unexpected topics. It represents an impassioned plea for everyone interested in the social life of cities to take the notion of the consumer society and the arguments of its major theorists seriously.

Postmodernity and the Fragmentation of Welfare John Carter, 2012-10-12 Postmodern ideas have been vastly influential in the social sciences and beyond. However, their impact on the study of social policy has been minimal. *Postmodernity and the Fragmentation of Welfare* analyses the potential for a postmodern or cultural turn in welfare as it treats postmodernity as an evolving canon from the seminal works of Baudrillard, Foucault and Lyotard through to recent theories of the risk society. Already disorientated by globalisation, new technologies and the years of new right ascendancy, welfare faces a significant challenge in the postmodern. It suggests that rather than

universality and state provision the new social policy will be consumerised and fragmented a welfare state of ambivalence With contributions from authors coming from a variety of fields offering very different perspectives on postmodernity and welfare Postmodernity and the Fragmentation of Welfare also keeps social policy's intellectual inheritance in view By exploring ways in which theorisations of postmodernity might improve understanding of welfare issues in the 1990s and assessing the relevance of theories of diversity and difference to mainstream and critical social policy traditions this book will be an essential text for all students of social policy social administration social work and sociology **Managing**

Philosophical and Cultural Theories of Music Eduardo de la Fuente,Peter Murphy,2010-09-14 Music is a ubiquitous and hard to grasp cultural form It is semiotically and aesthetically open ended yet even a non musical person is able to follow the basics of rhythmic structure and flow Its presence in social and cultural life is further complicated by its multiple forms of existence as both live and technologically mediated as self referential language and as accompaniment to text dance and other cultural expressions This collection brings together philosophers sociologists musicologists and students of culture who theorize the multiple roles of music through cultural practices as diverse as opera and classical music jazz and pop avant garde and DIY musical cultures music festivals and isolated listening through the iPod rock in urban heritage and the piano in contemporary Asian societies

Heterotopia and Heritage Preservation Smaranda Spanu,2019-05-02 This book approaches the field of built heritage and its practices by employing the concept of heterotopia established by the French philosopher Michel Foucault The fundamental understandings of heritage its evolution and practices all reveal intrinsic heterotopic features the mirror function its utopic drive and its enclave like nature The book draws on previous interpretations of heterotopia and argues for a reading of heritage as heterotopia considering various heritage mechanisms heritage selection conservation and protection practices and heritage as mnemonic device in this regard Reworking the six heterotopic principles an analysis grid is designed and applied to various built heritage spaces vernacular religious architecture urban 19th century ensembles Guided

through this theoretical itinerary the reader will rediscover the heterotopic lens as a minor yet promising Foucauldian device that allows for a better understanding of heritage and its everyday practices

Introducing Sociology Using the Stuff of Everyday Life Josee Johnston, Kate Cairns, Shyon Baumann, 2017-01-06 The challenges of teaching a successful introductory sociology course today demand materials from a publisher very different from the norm. Texts that are organized the way the discipline structures itself intellectually no longer connect with the majority of student learners. This is not an issue of pandering to students or otherwise seeking the lowest common denominator. On the contrary, it is a question of again making the practice of sociological thinking meaningful, rigorous, and relevant to today's world of undergraduates. This comparatively concise, highly visual, and affordable book offers a refreshingly new way forward to reach students using one of the most powerful tools in a sociologist's teaching arsenal: the familiar stuff in students' everyday lives throughout the world—the jeans they wear to class, the coffee they drink each morning, or the phones their professors tell them to put away during lectures. A focus on consumer culture, seeing the strange in the familiar, is not only interesting for students; it is also the authors' pedagogically superior to more traditional approaches. By engaging students through their stuff, this book moves beyond teaching about sociology to helping instructors teach the practice of sociological thinking. It moves beyond describing what sociology is so that students can practice what sociological thinking can do. This pedagogy also posits a relationship between teacher and learner that is bi-directional. Many students feel a sense of authority in various areas of consumer culture, and they often enjoy sharing their knowledge with fellow students and with their instructor. Opening up the sociology classroom to discussion of these topics validates students' expertise on their own life worlds. Teachers in turn gain insight from the goods, services, and cultural expectations that shape students' lives. While innovative, the book has been carefully crafted to make it as useful and flexible as possible for instructors aiming to build core sociological foundations in a single semester. A map on pages ii–iii identifies core sociological concepts covered so that a traditional syllabus, as well as individual lectures, can easily be maintained. Theory, method, and active learning exercises in every chapter constantly encourage the sociological imagination, as well as the doing of sociology.

Consuming Health Saras Henderson, Alan R. Petersen, 2002 *Consuming Health* explores the diverse meanings and applications of the term consumer in the field of health care and the implications for policy making, health care delivery, and experiences of health care.

Encyclopedia of the City Roger W. Caves, 2004-03-01 The *Encyclopedia of the City* focuses on the key topics encountered by undergraduates and scholars in urban studies and allied fields. Contributors include major theoreticians and practitioners and on other individuals, groups, and organizations which study the city or practice in a field that directly or indirectly affects the city. The *Encyclopedia* necessarily adopts an interdisciplinary and multidisciplinary perspective. A solid but also provocative starting point for wider exploration of the city, this is a first-class work of reference that will be an essential resource for independent study as well as a useful aid in teaching.

Alcohol, Drinking, Drunkenness Sarah L. Holloway, Dr Mark Jayne, Professor Gill Valentine, 2012-11-28 While disciplines such as anthropology sociology politics social policy and the health and medical sciences have a tradition of exploring the centrality of alcohol drinking and drunkenness to people s lives geographers have only previously addressed these topics as a peripheral concern Over the past few years however this view has begun to change accelerated by an

upsurge in interest in alcohol consumption relating to political and popular debate in countries throughout the world This book represents the first systematic overview of geographies of alcohol drinking and drunkenness It asks what role alcohol drinking and drunkenness plays in people s lives and how space and place are key constituents of alcohol consumption It also examines the economic political social cultural and spatial practices and processes that are bound up with alcohol drinking and drunkenness Designed as a reference text each chapter blends theoretical material with empirical case studies in order to analyse drinking in public and private space in the city and the countryside as well as focusing on gender generations ethnicity and emotional and embodied geographies
