Adirondack Explorations Paul Schaefer, 1997-07-01 Verplanck Colvin worked for twenty eight years as the superintendent of the topographical survey of the Adirondack Mountains This collection of essays compiled by Paul Schaefer examines Calvin's many perspectives on the Adirondacks His writings demonstrate his vast knowledge and appreciation of the wilderness

Colvin has a poetic style that captures the true beauty of the outdoors **Rooted in Rock** Jim Gould, 2001-06-01 In the past twenty years the Adirondacks have inspired a resident population of writers who have gained regional and national prominence using the Adirondack region as their primary setting and subject matter or at least as a significant point of departure Rooted in Rock is the first collection of its kind in more than twenty years since Paul Jamieson's Adirondack Reader What makes the volume unique though is the number of contributors who not only make the Adirondacks their subject but who make their homes in these mountains The works in this volume include contemporary essays literary nonfiction poetry short fiction and excerpted fiction and are a mix of new and previously published writings by forty three authors established as well as emerging including Bill McKibben Sue Halpern Russell Banks Alex Schoumatoff Chase Twichell Curt Stager Amy Godine and Jim Gould to name a few The Great Experiment in Conservation William F.

Porter, Jon D. Erickson, Ross S. Whaley, 2025-09-15 The Adirondack region of New York State is in many respects America's cauldron of conservation It was there more than a century ago that wanton exploitation of forests first aroused concern about human impact on the environment It was there that Americans first began to set aside lands proclaimed as forever wild The establishment of the Adirondack Park created an immense landscape of 6 million acres composed of a mixture of public and private lands in nearly equal proportion This unprecedented blend of human communities within wild lands makes the Adirondack Park perhaps one of the greatest case studies in conservation and development in U S history Representing a remarkable achievement in environmental scholarship and drawn from decades of research The Great Experiment in Conservation captures the wisdom born of the last thirty years of the park's evolution The editors bring together leading scholars activists and practitioners those who know the Park's origin and the realities of living in a protected area to narrate this history Organized into three sections contributors explore the ecological cultural and economic aspects of the region drawing lessons from successes and failures as they struggle to find the right balance of private interests and public controls With keen insight and deep passion the authors reveal the Adirondack Park's rich natural and cultural history in shaping conservation policy providing vital contributions to the future study of land preservation Contributors include Herman Daly Bill McKibben Barbara McMartin Philip G Terrie Amy Vedder and Bill Weber **New York State Conservationist**, 1996
