Addict To Academic Recovery From 30 Years Of Drug Addiction:

Addict to Academic John E. Smethers, 2013-01-01 I went to a party when I was twelve and didn't get back until I was 45. My early years weren't as dynamic or event oriented as my later years but in the opening chapters of this book I describe what I believe predisposed me to a life centered around drugs and alcohol. I also discuss my relationship with my parents and how they enabled me to continue on a self-destructive path. From junior high through high school the story is all about my progression from weekend drinking forays to early stages of alcoholism and all the chaos of that age period. My five county jail sentences and one prison sentence is characteristic more or less for most drug addicts. For more than thirty years getting stoned was the very most important thing in my life even more important than a succession of girlfriends, three wives and a beautiful daughter that I somehow managed to raise. I've had an interesting life. I tell about moving counterfeit money, drug smuggling and drug dealing, writing my own medical prescriptions and how I defrauded the public in service stations selling tires, shocks and other automotive accessories. And of course I explain my journey through the prison system. At 45 years old after being released from the California Department of Corrections I started a clean and sober life that allowed me to pursue an education culminating with a Ph.D. The latter chapters of *Addict to Academic* take the reader through my education process much like the earlier chapters take the reader through my addiction process. An open and honest account of one man's remarkable personal journey from a life of crime and addiction to that of respected author and academic. A well-written, moving and informative read. STM CheckPoint Press. *Relapse and Recovery in Drug Abuse*, 1986. This monograph is based upon papers and discussion from the RAUS Review Conference on Relapse and Recovery in Drug Abuse which took place on September 19 and 20, 1985 in Rockville, Maryland. The review was sponsored by the Office of Science and the Division of Clinical Research, National Institute on Drug Abuse. **The Handbook of Recovery Capital** David Best, Emily Hennessy, 2025-04-17 This book brings together all the key evidence on recovery capital measurement and its application. It offers a clear and accessible overview of the development of the strengths-based approach in addressing behavioural health issues and quantifying and measuring recovery capital along with the evidence base for this approach. The book sets out the proven benefits of this approach to measuring and bolstering addiction recovery, demonstrating the impact of the approach in improving the quality of services available to people at different stages of their recovery journey, making it the go-to book on this topic for researchers, policy makers, practitioners and people in recovery. Substance and Behavioral Addictions Steve Sussman, 2017-02-06 This book presents the etiology, assessment, prevention and cessation of eleven focal addictions within an appetitive motivation framework of addiction. It is intended for upper level undergraduates and graduate students, practitioners and researchers who want an introduction to cutting edge research and practice in the addictions field. *Psychotherapy, Psychological Treatments and the Addictions* Griffith Edwards, Christopher Dare, 1996-03-07 A stimulating and authoritative review of psychotherapeutic treatments of addictive behaviour. *Textbook of Addiction*
