Arguing About Science Arguing About Philosophy:

Arguing about Science Alexander Bird, James Ladyman, 2013 Arguing About Science is an outstanding engaging introduction to the essential topics in philosophy of science edited by two leading experts in the field This exciting and innovative anthology contains a selection of classic and contemporary readings that examine a broad range of issues from classic problems such as scientific reasoning causation and scientific realism to more recent topics such as science and race forensic science and the scientific status of medicine The editors bring together some of the most influential contributions of famous philosophers in the field including John Stuart Mill and Karl Popper as well as more recent extracts from philosophers and scientists such as Ian Hacking Stephen Jay Gould Bas van Fraassen Nancy Cartwright and John Worrall The anthology is organised into nine clear sections science non science and pseudo science race gender and science scientific reasoning scientific explanation laws and causation science and medicine probability and forensic science risk uncertainty and science policy scientific realism and anti realism The articles chosen are clear interesting and free from unnecessary jargon The editors provide lucid introductions to each section in which they provide an overview of the debate as well as suggestions for further reading

How Philosophers Argue Fernando Leal, Hubert Marraud, 2022-02-21 This volume presents a double argumentative analysis of the debate between Bertrand Russell and Frederick Copleston on the existence of God It includes an introduction justifying the choice of text and describing the historical and philosophical background of the debate It also provides a transcript of the debate based in part on the original recording The argumentative analyses occupy Parts I and II of the book In Part I the argumentative process is analysed by means of the ideal model of critical discussion the workhorse of pragma dialectics Part I shows how the two parties go through the four stages of a critical discussion It highlights the questions raised over and beyond the presiding question of whether God exists and examines almost a hundred questions that are raised Many are left in the air whereas a few others give rise to sundry sub discussions or meta dialogues In Part II the theoretical framework of argument dialectic is put to work argument structures are identified by means of punctuation marks argumentative connectors and operators allowing to see the argumentative exchange as the collaborative construction of a macro argument Such a macro argument is both a joint product of the arguers and a complex structure representing the dialectical relationships between the individual arguments combined in it Finally the complementarity of the two approaches is addressed Thus the book can be described as an exercise in adversarial collaboration

From Argument Schemes to Argumentative Relations in the Wild Frans H. van Eemeren, Bart Garssen, 2019-10-23 This volume comprises a selection of contributions to the theorizing about argumentation that have been presented at the 9th conference of the International Society for the Study of Argumentation ISSA held in Amsterdam in July 2018 The chapters included provide a general theoretical perspective on central topics in argumentation theory such as argument schemes and the fallacies Some contributions concentrate on the treatment of the concept of conductive argument Other contributions are dedicated to

specific issues such as the justification of questions the occurrence of mining relations the role of exclamatives argumentative abduction eudaimonistic argumentation and a typology of logical ways to counter an argument In a number of cases the theoretical problems addressed are related to a specific type of context such as the burden of proof in philosophical argumentation the charge of committing a genetic fallacy in strategic manoeuvring in philosophy the necessity of community argument and connection adequacy for arguments with institutional warrants The volume offers a great deal of diversity in its breadth of coverage of argumentation theory and wide geographic representation from North and South America to Europe and China **Oxford Studies in Epistemology Volume 4** Tamar Szabó Gendler, John Hawthorne, 2013-04-25 This work is a major biennial volume offering a regular snapshot of state of the art work in this important field of epistemology

Science Meets Philosophy Hans Christian Garman Johnsen, 2023-04-26 The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues The book explores what these disagreements are about and discusses whether they can be overcome Taking a historical perspective the book traces the divides in science back to three main philosophical traditions realism idealism and scepticism It maps how these have inspired three main current positions in science logical empiricism phenomenology and sociology of scientific knowledge The book is intended for a general audience concerned with today's debates on scientific knowledge and society It will be useful for students and researchers studying philosophy of science sociology of scientific knowledge realism phenomenology positivism logical empiricism analytical philosophy and sustainable scientific knowledge

Transcendental Arguments and Science P. Bieri, Lorenz Krüger, R.-P. Horstmann, 2012-12-06 The goal of the present volume is to discuss the notion of a conceptual framework or conceptual scheme which has been dominating much work in the analysis and justification of knowledge in recent years More specifically this volume is designed to clarify the contrast between two competing approaches in the area of problems indicated by this notion On the one hand we have the conviction underlying much present day work in the philosophy of science that the best we can hope for in the justification of empirical knowledge is to reconstruct the conceptual means actually employed by science and to develop suitable models for analyzing conceptual change involved in the progress of science This view involves the assumption that we should stop taking foundational questions of epistemology seriously and discard once and for all the quest for uncontroversial truth The resulting program of justifying epistemic claims by subsequently describing patterns of inferentially connected concepts as they are at work in actual science is closely connected with the idea of naturalizing epistemology with conceptual relativism and with a pragmatic interpretation of knowledge On the other hand recent epistemology tends to claim that no subsequent reconstruction of actually employed conceptual frameworks is sufficient for providing epistemic justification for our beliefs about the world This second claim tries to resist the naturalistic and pragmatic approach to epistemology and insists on

taking the epistemological sceptic seriously [The Literary Structure of Scientific Argument](#) Peter Dear,2015-08-12 In this volume seven historians of science examine the historical creation and meaning of a range of scientific textual forms from the seventeenth to the late nineteenth centuries They consider examples from the fields of chemistry medicine physics zoology physiology and mathematics exposing the rich possibilities for a new historically rooted approach to our scientific cultural heritage Peter Dear presents the case for taking texts seriously asking historians of science to confront issues and techniques moving to the forefront in a number of disciplines and asking literary scholars and literary minded intellectual historians not to put science quietly to one side or treat it as a mere source of cultural metaphors but to understand it in terms of historically specific textual construction The Literary Structure of Scientific Argument will interest historians philosophers and sociologists as well as literary scholars concerned with science *The Oxford Handbook of Nineteenth-Century Women Philosophers in the German Tradition* Kristin Gjesdal,Dalia Nassar,2024 This Oxford Handbook celebrates the work of trailblazing women in the history of modern philosophy Through thirty one original chapters it engages with the work of women philosophers spanning the long nineteenth century in the German tradition and covers women s contribution to major philosophical movements including romanticism and idealism socialism and Marxism Nietzscheanism feminism phenomenology and neo Kantianism It opens with a section on figures offering essays focused on fifteen thinkers in this tradition before moving on to sections of essays on movement and topics Across the volume s chapters essays examine women s contributions to key philosophical areas such as epistemology and metaphysics aesthetics ethics social and political philosophy ecology education and the philosophy of nature **Scientific Realism and Laws of Nature: A Metaphysics of Causal Powers** Michel Ghins,2024-04-04 This book addresses central issues in the philosophy and metaphysics of science namely the nature of scientific theories their partial truth and the necessity of scientific laws within a moderate realist and empiricist perspective Accordingly good arguments in favour of the existence of unobservable entities postulated by our best theories such as electrons must be inductively grounded on perceptual experience and not their explanatory power as most defenders of scientific realism claim Similarly belief in the reality of dispositions such as causal powers which ground the natural necessity of scientific laws must be based on experience Hence this book offers a synthetic presentation of an original metaphysics of science namely a metaphysics of properties both categorical and dispositional while at the same time opposing strong versions of necessitarianism according to which laws are true in all possible worlds The main theses and arguments are clearly presented in a non technical way Thus on top of being of interest to the specialists of the topics discussed it is also useful as a textbook in courses for third year and more advanced university students [Philosophy of Mathematics: Oxford Bibliographies Online Research Guide](#) Oxford University Press,2010-06-01 This ebook is a selective guide designed to help scholars and students of social work find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books chapters and journal articles to online

archives electronic data sets and blogs Written by a leading international authority on the subject the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related This ebook is a static version of an article from Oxford Bibliographies Online Philosophy a dynamic continuously updated online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study Philosophy Oxford Bibliographies Online covers most subject disciplines within the social science and humanities for more information visit www.oxfordbibliographies.com

The Routledge Handbook of Properties A.R.J. Fisher, Anna-Sofia Maurin, 2023-12-22 Philosophical questions regarding both the existence and nature of properties are ubiquitous in ordinary life the sciences and philosophical theorising In philosophy it is one of the oldest topics discussed in various intellectual traditions East and West reaching back to Plato and Aristotle Today in the analytic tradition properties continue to be a core area of study and research The Routledge Handbook of Properties is an outstanding reference source to this perennial topic and is the first major volume of its kind It contains forty specially commissioned chapters written by an international team of expert contributors and is divided into nine clear parts Methodology and Metaontology Distinctions Realism about Universals Nominalism Trope Theory Properties in Causation Time and Modality Properties in Science Properties in Language and Mind Properties in the Normative Realm the Social World and Aesthetics The Routledge Handbook of Properties is essential reading for anyone studying and researching metaphysics metametaphysics and ontology and will also be of interest to those in closely related areas such as philosophy of science philosophy of language philosophy of mind ethics and aesthetics

Narration as Argument Paula Olmos, 2017-05-09 This book presents reflections on the relationship between narratives and argumentative discourse It focuses on their functional and structural similarities or dissimilarities and offers diverse perspectives and conceptual tools for analyzing the narratives potential power for justification explanation and persuasion Divided into two sections the first Part under the title Narratives as Sources of Knowledge and Argument includes five chapters addressing rather general theoretical and characteristically philosophical issues related to the argumentative analysis and understanding of narratives We may perceive here how scholars in Argumentation Theory have recently approached certain topics that have a close connection with mainstream discussions in epistemology and the cognitive sciences about the justificatory potential of narratives The second Part entitled Argumentative Narratives in Context brings us six more chapters that concentrate on either particular functions played by argumentatively oriented narratives or particular practices that may benefit from the use of special kinds of narratives Here the focus is either on the detailed analysis of contextualized examples of narratives with argumentative qualities or on the careful understanding of the particular demands of certain well defined situated activities as diverse as scientific theorizing or war policing that may be satisfied by certain uses of narrative discourse

Doing Educational Research , 2015-01-01 In the second edition of Doing Educational Research we explore a variety of

critical issues and methodologies Authors include some of the most influential voices selected from across the spectrum of career disciplines The scholars provide detailed insights into dimensions of the research process that engage both students and experienced researchers with key concepts and recent innovations in the art of doing research The contributors adopt a stance that is practical as it introduces beginning scholars to social inquiry and innovative as it transforms the boundaries of conversations about educational research Doing Educational Research appears at a critical moment in which educational researchers are pushed to align with a pervasive scientism that embraces tenets of crypto positivism The book addresses logics of inquiry underpinning cutting edge approaches to educational research that extend far beyond limited visions that are presented through the lenses of positivism The chapters explore a variety of methodologies including action research bricolage ethnography hermeneutics historiography media based research psychoanalysis and conversation analysis in a matrix of social theory authentic inquiry critical pedagogy and differences in epistemology ontology and axiology A diverse array of complex topics are presented in accessible forms and will compel both scholars and students

Introduction to the Philosophy of Science Merrilee H. Salmon, Clark Glymour, 1999-01-01 Originally published Englewood Cliffs N J Prentice Hall c1992

Philosophers Who Believe Kelly James Clark, 1997-10-29 Eleven leading philosophers including Basil Mitchell Mortimer Adler Alvin Plantinga Nicholas Wolterstorff and Richard Swinburne describe why they have embraced Christian belief and offer fascinating insights into their individual spiritual journeys Edited by Kelly James Clark

Perspectives on an Evolving Creation Keith B. Miller, 2003-09-25 According to the authors of this book who explore evolutionary theory from a clear Christian perspective the common view of conflict between evolutionary theory and Christian faith is mistaken Written by contributors representing the natural sciences philosophy theology and the history of science this thought provoking work is informed by both solid scientific knowledge and keen theological insight The three sections of the book address 1 relevant biblical historical and scientific background 2 the scientific evidence for an evolving creation and 3 theological issues commonly raised in connection with evolution including the nature of God s creative activity the meaning of the miraculous and the uniqueness of humankind Woven through the volume are short meditations designed to direct readers toward worshipping the God of providence Contributors Laurie J Braaten Warren S Brown Jr David Campbell Robin Collins Edward B Davis Terry M Gray Jeffrey K Greenberg Deborah B Haarsma Loren Haarsma James P Hurd Conrad Hyers David N Livingstone Keith B Miller John C Munday Jr George L Murphy Mark A Noll Robert John Russell Howard J Van Till David L Wilcox Jennifer Wiseman

The Palgrave Encyclopedia of the Possible Vlad Petre Glăveanu, 2023-01-25 The Palgrave Encyclopedia of the Possible represents a comprehensive resource for researchers and practitioners interested in an emerging multidisciplinary area within psychology and the social sciences the study of how we engage with and cultivate the possible within self society and culture Far from being opposed either to the actual or the real the possible engages with concrete facts and experiences with the result of transforming them This encyclopedia examines the notion of the possible

and the concepts associated with it from standpoints within psychology philosophy sociology neuroscience and logic as well as multidisciplinary fields of research including anticipation studies future studies complexity theory and creativity research Presenting multiple perspectives on the possible the authors consider the distinct social cultural and psychological processes e g imagination counterfactual thinking wonder play inspiration and many others that define our engagement with new possibilities in domains as diverse as the arts design and business

Critical Thinking and Logic: A Philosophical Workbook - 2nd edition Todd M. Furman,2023-07-13 An inexpensive but comprehensive introduction now in its second edition Examples and homework problems touch on philosophical issues much more so than standard texts providing instructors an opportunity to ease into philosophical discussions as desired and piquing student interest Homework assignments are on tear out pages for ease of use While Critical Thinking and Logic A Philosophical Workbook covers standard issues of critical thinking such as argument types and fallacies it also provides a solid foundation for an advanced course in formal logic The final chapter includes a complete translation of Descartes s Meditations allowing students to put their newly acquired skills to work on a classic work of philosophy

Evolution by the Numbers James Wynn,2012-01-05 In Evolution by the Numbers The Origins of Mathematical Argument in Biology James Wynn examines the confluence of science mathematics and rhetoric in the development of theories of evolution and heredity in the nineteenth century Evolution by the Numbers shows how mathematical warrants become accepted sources for argument in the biological sciences and explores the importance of rhetorical strategies in persuading biologists to accept mathematical arguments

Science: Key Concepts in Philosophy Steven French,2007-10-09 A great text for students wishing to examine the questions raised in the philosophy of science An ideal first guide to this challenging subject
