Arms Control and Proliferation Challenges to the Reset Policy Stephen Blank, 2011 Introduction Russia's American obsession Regional security in Eurasia in Russian thinking Russia's force modernization and positions on the new nuclear agenda Russian perceptions of the new treaty Proliferation Threats to Russia Policy recommendations Arms Control and Proliferation Challenges to the Reset Policy [Enlarged Edition] U. S. Army War College, Stephen J. Blank, Strategic Studies Institute, 2013-06-03 *Arms Control and Proliferation Challenges to the Reset Policy* Stephen Blank, 2011-11-01 This monograph was presented at the Strategic Studies Institute SSI Carnegie Council conference connected with the Council's U S Global Engagement Program In this case the engagement in question is with Russia and this monograph specifically addressed the issues of how those aspects of the reset policy with Moscow that concern arms control and proliferation are proceeding It duly addresses the question of whether further reductions in strategic offensive weapons are likely anytime soon i e is it possible to go beyond the parameters in the recently signed and so called New Strategic Arms Reduction Treaty START treaty with respect to reductions Other critical issues involve the issues of missile defenses that Moscow vehemently opposes and the question of tactical or nonstrategic nuclear weapons which the North Atlantic Treaty Organization NATO wishes to have Russia reduce Therefore this analysis delves deeply into Russia's strategic posture with regard to the questions of why it needs and prioritizes nuclear weapons and what it thinks about the necessity for retaining large numbers of them relatively speaking to meet the security challenges posed not only by the United States and NATO but also China Based on this analysis which takes into account the asymmetries in force structures and in strategic orientations of the two or three main actors the author argues that the United States NATO and Russia will find it difficult to move forward on these issues quickly and achieve large scale nuclear reductions or strategic harmony in the foreseeable future At the same time a key component of the reset policy is to obtain Russian assistance in stopping if not reversing Iranian and North Korean proliferation Here it appears that the reset policy has reached the limit of its utility for Russia maintains a highly ambivalent and ambiguous policy with respect to Iran As a result we are possibly reaching a political dead end regarding Iran Meanwhile the Six Party Talks on North Korea have reached an impasse This monograph analyzes Russia's posture on these issues and suggests alternative courses of action for the United States to undertake with regard to Russia in order to advance U S goals particularly with respect to the Korean issue The approaches suggested by the author regarding the impasse over Korea place this issue in a broader regional setting and take into account the fact that this issue is fully implicated in and involves the fast changing dynamics of the overall international situation in Northeast Asia e g the Rise of China and Russo Chinese partnership there It suggests far reaching and innovative measures for the United States to take that would possibly break the logjam over Korea but also would enable the United States to uphold a viable strategic equilibrium in Northeast Asia under conditions of dramatic change there Strategic Studies Institute Arms for Uncertainty Stephen J.

Cimbala,2016-04-08 Nuclear weapons are here to stay They have survived into the twenty first century as instruments of influence for the US Russia and other major military powers But unlike the Cold War era future nuclear forces will be developed and deployed within a digital driven world of enhanced conventional weapons As such established nuclear powers will have smaller numbers of nuclear weapons for the purpose of deterrence working in parallel with smarter conventional weapons and elite military personnel The challenge is to agree proportional reductions in nuclear inventories or abstinence requiring an effective nonproliferation regime to contain aspiring or threshold nuclear weapons states This is the most comprehensive view of nuclear weapons policy and strategy currently available The author s division of the nuclear issue into the three ages is a never seen before analytical construct With President Obama reelected the reduction and even elimination of nuclear weapons will now rise to the top of the agenda once more Moreover given the likelihood of reductions in US defense spending the subject of the triad which is covered in Chapter One will no doubt be an important subject of debate as will the issue of missile defense covered in Chapter 10 This book provides an excellent analysis of the spread of nuclear weapons in Asia and the Middle East and the potential dangers of a North Korean or Iranian breakout subjects that dominate current policy debates

The New Nuclear Disorder Stephen J. Cimbala,2016-02-17 In the twenty first century the United States confronts an international system of great complexity and shifting security challenges Among these challenges are those posed by nuclear weapons Instead of becoming obsolete or being marginalized by the end of the Cold War and the demise of the Soviet Union nuclear weapons have become more important to present and future international stability and peace but the relationship is paradoxical On one hand the spread of nuclear weapons to additional states with unsettled grievances or hegemonic ambitions threatens to destabilize local balances of power and set off regional arms races In addition the possible acquisition by terrorists of nuclear weapons or fissile materials creates a threat that may be beyond deterrence according to hitherto accepted concepts On the other hand nuclear weapons in the hands of other states can contribute to stable deterrence and help to prevent nuclear proliferation to international miscreants Certain cases loom large in the short run that highlight this book s relevance including the possible acquisition and deployment of nuclear weapons by Iran and the continuing tensions created by North Korea s nuclear arsenal The Obama pivot of national security and defense emphasis to Asia reflects not only the growing economic importance of that region but also the growing number of security dilemmas in a region that is already awash in nuclear forces The management of nuclear crises and even the possible need to terminate nuclear wars before they expand beyond a single region are among the possible challenges facing future U S and allied policy makers and military leaders

Nuclear Deterrence in a Multipolar World Stephen J Cimbala,2017-07-05 The view that America and Russia have burned their candles on security cooperation with respect to nuclear weapons is simply mistaken This timely study identifies twelve themes or issue areas that must be addressed by the United States and Russia if they are to provide shared successful leadership in the management of nuclear world order Designed as supplementary

reading in upper division and graduate courses in national security policy defense and nuclear arms control it is also suitable for courses taught at military staff and command colleges and or war colleges

Arms Control and Proliferation Challenges to the Reset Policy U S Army War College,2014-09-04 In this book the engagement in question is with Russia and this monograph specifically addressed the issues of how those aspects of the reset policy with Moscow that concern arms control and proliferation are proceeding It duly addresses the question of whether further reductions in strategic offensive weapons are likely anytime soon i e is it possible to go beyond the parameters in the recently signed and so called New Strategic Arms Reduction Treaty START treaty with respect to reductions Other critical issues involve the issues of missile defenses that Moscow vehemently opposes and the question of tactical or nonstrategic nuclear weapons which the North Atlantic Treaty Organization NATO wishes to have Russia reduce Therefore this book delves deeply into Russia s strategic posture with regard to the questions of why it needs and prioritizes nuclear weapons and what it thinks about the necessity for retaining large numbers of them relatively speaking to meet the security challenges posed not only by the United States and NATO but also China Based on this analysis which takes into account the asymmetries in force structures and in strategic orientations of the two or three main actors the author argues that the United States NATO and Russia will find it difficult to move forward on these issues quickly and achieve large scale nuclear reductions or strategic harmony in the foreseeable future At the same time a key component of the reset policy is to obtain Russian assistance in stopping if not reversing Iranian and North Korean proliferation Here it appears that the reset policy has reached the limit of its utility for Russia maintains a highly ambivalent and ambiguous policy with respect to Iran As a result we are possibly reaching a political dead end regarding Iran Meanwhile the Six Party Talks on North Korea have reached an impasse This book also analyzes Russia s posture on these issues and suggests alternative courses of action for the United States to undertake with regard to Russia in order to advance U S goals particularly with respect to the Korean issue The approaches suggested by the author regarding the impasse over Korea place this issue in a broader regional setting and take into account the fact that this issue is fully implicated in and involves the fast changing dynamics of the overall international situation in Northeast Asia e g the Rise of China and Russo Chinese partnership there It suggests far reaching and innovative measures for the United States to take that would possibly break the logjam over Korea but also would enable the United States to uphold a viable strategic equilibrium in Northeast Asia under conditions of dramatic change there

The Asia-Pacific Century Adam B. Lowther,2013-08-28 When Secretary of State Hillary Clinton published America s Pacific Century in Foreign Policy magazine in November 2011 the administration was clearly indicating to domestic and international audiences that the United States is beginning a pivot toward the Asia Pacific Clinton s article served as a spark for renewed interest in the nation s Asi

The United States, Russia and Nuclear Peace Stephen J. Cimbala,2020-02-03 This book analyzes the United States and Russia s nuclear arms control and deterrence relationships and how these countries must lead current and prospective efforts to

support future nuclear arms control and nonproliferation The second nuclear age following the end of the Cold War and the demise of the Soviet Union poses new challenges with respect to nuclear strategic stability deterrence and nonproliferation The spread of nuclear weapons in Asia and the potential for new nuclear weapons states in the Middle East create new possible axes of conflict potentially stressful to the existing world order Other uncertainties include the interest of major powers in developing a wider spectrum of nuclear weapons and delivery systems possibly for use in limited nuclear wars and the competitive technologies for antimissile defenses being developed and deployed by the United States and Russia Other technology challenges including the implications of cyberwar for nuclear deterrence and crisis management are also considered Political changes also matter The early post Cold War hopes for the emergence of a global pacific security community excluding the possibility of major war have been dashed by political conflict between Russia and NATO by the roiled nature of American domestic politics with respect to international security and by a more assertive and militarily competent China Additionally the study includes suggestions for both analysis and policy in order to prevent the renewed U S Russian nuclear arms race and competition in new technologies This volume would be ideal for graduate students researchers scholars and anyone who is interested in nuclear policy international studies and Russian politics Defending the Arsenal Adam B. Lowther, Stephen J. Cimbala, 2016-09-19 One important area of interest within military and policy circles focuses on an effort to revitalize the nuclear triad amidst a number of competing strategic interests The difficulties arising from US engagement in Iraq and Afghanistan are leading many scholars and policy makers to question whether a reinvigorated nuclear triad has any role in deterring modern adversaries This volume takes an unashamed pro nuclear modernization position and argues for designing and fielding new nuclear warheads and delivery systems submarine ICBM and bomber while also arguing against signing the Comprehensive Test Ban Treaty or agreeing to further reductions in the nuclear arsenal It also argues that nuclear deterrence remains as relevant today perhaps more than it was during the Cold War With so many authors advocating for Global Zero and highlighting perceived dangers from a nuclear arsenal this work stands in stark contrast to the chorus of anti arsenal works Because of the work s structure and effort to answer questions of current relevance it should appeal to a broad audience including service staffs PME students COCOM staffs Pentagon personnel Capitol Hill staffers policy makers academics graduate students and interested readers **The Reset Button Has Been Pushed** United States. Handbook of Nuclear Proliferation Harsh V Pant, 2012-02-27 The chapters of this proposed volume are intended to shed light on the diverse themes surrounding this very important issue area in international security Each of the six major sections addresses an aspect of nuclear proliferation that will be critical in determining the future trajectory of global politics in the years to come The first section examines the major thematic issues underlying the contemporary discourse on nuclear proliferation How do we understand this period in proliferation What accounts for a taboo on the use of nuclear weapons so

far and will it survive What is the present state of nuclear deterrence models built during the Cold War What is the relationship between the pursuit of civilian nuclear energy and the risks of proliferation Why are we witnessing a move away from non proliferation to counter proliferation The second section gives an overview of the evolving nuclear policies of the five established nuclear powers the USA Russia the United Kingdom France and the People s Republic of China Section three looks at the three de facto nuclear states India Pakistan and Israel The fourth section examines the three problem areas in the proliferation matrix today Iran North Korea and the potent mix of non state actors and nuclear weapons The fifth section sheds light on an important issue often ignored during discussions of nuclear proliferation cases where states have made a deliberate policy choice of either renouncing their nuclear weapons programme or have decided to remain a threshold state The cases of South Africa Egypt and Japan will be the focus of this section The final section will examine the present state of the global nuclear non proliferation regime which most observers agree is currently facing a crisis of credibility The three pillars of this regime the Nuclear Non Proliferation Treaty NPT the Comprehensive Test Ban Treaty CTBT and the Fissile Material Cut Off Treaty FMCT will be examined This is followed by an analysis of the present trends and prospects for US Russia nuclear arms control The impact of missile defenses and the US India civilian nuclear energy co operation pact will be examined so as to ascertain whether they have weakened or strengthened the global non proliferation regime The chapters in this volume aim to document the increasing complexity of the global nuclear proliferation dynamic and the inability of the international community to come to terms with a rapidly changing strategic milieu The future in all likelihood will be very different from the past and the chapters in this volume will try to develop a framework that may help gain a better understanding of the forces that will shape the nuclear proliferation debate in the years to come
