International Law And Armed Conflict, Exploring the Faultlines Michael N. Schmitt, Jelena Pejic, 2007 International law and armed conflict exist in a symbiotic relationship In some cases law shapes conflict proactively by imposing normative limits in advance of the appearance of proscribed conduct Much more commonly armed conflict either reveals lacunae in the law or demonstrates how law designed for yesterday's wars falls short when applied to contemporary conflict When that happens international law reacts by allowing provisions to fall into desuetude embracing new interpretations of existing prescriptions or generating new norms through practice or codification In the 21st Century both international security and armed conflict are the subject of arguably unprecedented sea changes As a result claims that both the *jus ad bellum* and *jus in bello* are unwieldy and ill-fitting in the context of modern hostilities have surfaced prominently Whether one agrees with such dire assessments what has become clear is that armed conflict is increasingly exposing faultlines in the law governing the resort to force The intent of this collection of essays in honour of Professor Yoram Dinstein on the occasion of his 70th birthday is to explore such faultlines first by identifying them and then by assessing their consequences In a sense then the essays contributed by the top minds in the field will serve to assist academics and practitioners to anticipate pressure on the law governing armed

conflict and to the extent possible react accordingly Paralleling Professor Dinstein's classic works *War Aggression and Self Defence* and *The Conduct of Hostilities Under the Law of International Armed Conflict* the book addresses both *ius ad bellum* and *ius in bello* topics **Professional Journal of the United States Army**, 1998 The Interwar World Andrew Denning, Heidi J.S. Tworek, 2023-08-29 The *Interwar World* collects an international group of over 50 contributors to discuss, analyze and interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume's contributors challenge the era's accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history

Schmitt of Durham University draws together those of his articles published over the past two decades that have explored particular fault lines in the law of armed conflict As such they examine the complex interplay between warfare and law seeking to identify where the law and warfare appear to diverge and where such apparent divergence can be accommodated through contextual interpretation of the law Each essay examines a particular issue in either the jus ad bellum the law governing resort to force or jus in bello international humanitarian law that has proven contentious in terms of applying extant norms to the evolving face of armed conflict Among the topics addressed are counter terrorism cyber operations asymmetrical warfare assassination environmental warfare and the participation of civilians in hostilities

The 2014 Israel-Gaza Conflict. Self-Defence or Atrocities in Gaza? Elise Verdonck, 2014-11-19 Essay from the year 2014 in the subject Politics Region Near East Near Orient University of Auckland course International Peace Security language English abstract International law historically originates from the need to stabilise relations between people and states To this day one of its most classic functions remains ensuring the peaceful coexistence between states Global history is featured by conflicts between states and even today there

is no shortage of disputes Besides principles of demarcation of territories and jurisdictions between states the international law developed a wide range of techniques to resolve conflicts Two of the major sub branches of international law in this context are the *ius ad bellum* and the *ius in bello* The former is concerned with the law that governs the use of force whereas the latter deals with the conduct of the armed conflict itself The legal abolishment of war was introduced by the United Nations hereafter UN Nonetheless according to the Charter of the United Nations of 24 October 1945 hereafter UN Charter self defence can serve as a justification for the use of force when certain conditions are met article 51 Since the Second World War the face of armed conflicts changed inter state conflicts have receded significantly in favour of new wars in which non state actors play the leading role Non state actors are individuals or organisations that have a significant political influence but are not allied to any particular state Since the 9 11 attacks the legality of self defence against private violence i e violence of non state actors has become a major question in the international *ius ad bellum* debate While during the Cold War the state paradigm dominated and states generally held on to a certain form of state involvement in case of a terrorist attack today it seems that the international community no longer has principle objections to the exercise of self defence against non state actors even if the initial attack cannot be attributed to a state As a response to the proliferation and rise of non state actors attempts to stretch the limits of the definition of self defence to include attacks by non state actors can be witnessed The Israel Gaza conflict one of the most complicated ongoing international conflicts with non state actors has as a part of state practice also contributed in the evolving standard of the right of self defence
