analysis of the security and defence policies of all 27 EU member states and Turkey drawing on the concept of strategic culture in order to examine the chances and obstacles for closer security and defence cooperation across the continent Along the lines of a consistent analytical framework international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots **Joint Force Quarterly** ,2006 **The Yin-Yang Military**

Jacqueline Heeren-Bogers,René Moelker,Esmeralda Kleinreesink,Jan Van der Meulen,Joseph Soeters,Robert Beeres,2020-09-07 This book examines change processes and the challenge of ambidexterity in military organizations It discusses how military organizations can better adapt to the complex and at times chaotic environments they operate in by developing organizational ambidexterity The authors identify various multiple tasks and functions of military organizations that require multi dimensional and often contradictory operational technological cultural and social skills In analogy to the often opposed functions performed by the right and left hand of the body modern military organizations are no longer one dimensional fighting machines but characterized by a duality of tasks such as fighting and peacekeeping which often make part and parcel of one and the same mission The military is both a hot and a cold organization a crisis management organization and a bureaucracy As such the book argues that these dualities are not necessarily opposed but can serve as complementary forces like the yin and yang to better the overall performance of these organizations As a consequence ambidextrous organizations excel at complex tasking and are adaptable to new challenges Divided into four parts 1 structures and networks 2 cultural issues 3 tasks and roles 4 nations and allies it appeals to scholars of military studies and organization studies as well as professionals working for governmental or military organizations *ESDP and Missile Defense: European Perspectives for a More Balanced Transatlantic Partnership* , What Should Armies Do? John L.

Clarke,2016-02-17 Clarke examines the role of North American and European armed forces in support of civil authorities in domestic contingencies He seeks to answer the question of what roles are and are not appropriate for contemporary armed forces in carrying out task and functions within national borders The book takes as its starting point two key elements in the North American and European security debate the decline of both the external threats to most North American and European states and that of budgetary resources available for defense These twin declines are coupled with a desire on the part of civil leaders to engage the military in more domestic tasks and the desire of senior military leaders to preserve force structure resulting in a dynamic in which civil leaders will ask their militaries to do more and military leaders will be more inclined to say yes As such this book focuses on the enormous increase in the provision of non military services and support asked of North American and European military establishments Looking at the historical context for how North America s and Europe s armed forces have been employed in the past this book establishes guidelines for their employment in the future

Legitimizing Violence: Military Operations Within Brazilian Borders David P. Succi Junior,2025-08-25 The book challenges the main theoretical assumption on the military police distinction grounding works on contemporary military

missions and security policies and provides tools to overcome the analytical hindrances posed by the traditional framework. It is argued that the question to be asked to understand the deployment of the armed forces within national borders refers less to the identification of an essential police and military activity and more to how the process of proposing and accepting the use of force takes place. That is how a particular use of the state's instruments of lethality is legitimized. Legitimation is conceptualized as a communicative process in which a set of actors through discursive practices mobilize and articulate ideational resources within a particular social arrangement, reinterpreting and articulating them to make sense of a particular situation and justify a course of action producing an apparent consensus. The book presents an analytical framework to address processes of violence legitimation designed to provide a tridimensional view of the interplay between actors, ideas and social arrangement, dissecting how the line of the acceptable use of force is shaped and stabilized. It is applied to Brazil specifically to three major military domestic operations: Operation Rio 1994-1995, Operation Arcanjo 2010-2012, and Operation Rio de Janeiro 2017-2018. Brazil has a history of internal military deployment and the selected operations are relevant in terms of troops number, duration and publicity. The book proceeds through the analysis of parliamentary sessions, media coverage and public discourses uttered by presidents, ministers and military leaders. It is of interest to different readerships contributing to the debate on legitimacy and IR critical approaches to International Security, Military Studies and Civil Military Relations. It also provides an empirical contribution to scholars focused on Brazil, Latin America and armed forces in the Global South. Finally, the research underpinning the book won the prize of best 2023 PhD dissertation in Political Science and International Relations in Brazil granted by the Brazilian Ministry of Education.

[Building Terrorism Resistant Communities](#) S. Ekici, A. Ekici, D.A. McEntire, 2009-08-12. Intends to explore methods to involve the community in the fight against terrorism in an effort to enhance its protection from terrorist attacks and to establish a network between the participants for future collaborations. This guide can help policy makers gain an understanding of how counter terrorism requires community support and involvement.

ESDP and Missile Defense Martin Agüera, 2001. Security cooperation with Europe has been the bedrock of American strategy for more than 50 years. Today that relationship is undergoing both stress and refinement as Europe moves toward a more unified political and security identity and as the United States responds to a changing global security environment. While many issues have the potential to complicate U.S. European security cooperation, few are more pressing than the U.S. pursuit of missile defense and Europe's construction of European Security and Defense Policy (ESDP). The author explains the relationship between missile defense and ESDP. He shows that rather than serving as wedges between the United States and Europe, both of these can help construct a better security relationship. In fact, transatlantic cooperation and understanding of these issues is necessary for either of them to succeed. SSI site.
