

## Exercise 3: Key Innovations in Microsoft Office Access and InfoPath

Microsoft Office Access has been redesigned to take advantage of the new 2007 Microsoft Office system user interface. Access also now provides a number of built-in database template applications for organizations to start using without major modifications. Microsoft Office InfoPath provides the ability to import forms previously created in Microsoft Office Word or Excel. These imported forms can then be enhanced to provide additional intelligence or integration with other 2007 Office system services. This exercise illustrates the new features of Microsoft Office Access and InfoPath.

### Task 3-1: Overview of the New Application Library in Office Access

Office Access consists of a number of prebuilt template applications that can be modified to address many organizations' needs. This task shows the new application library in Office Access, as well as an overview of the new object-oriented interface.
