**The Emotional Mind** Stephen T. Asma,Rami Gabriel,2019-04-15 Tracing the leading role of emotions in the evolution of the mind

a philosopher and a psychologist pair up to reveal how thought and culture owe less to our faculty for reason than to our capacity to feel Many accounts of the human mind concentrate on the brain's computational power Yet in evolutionary terms rational cognition emerged only the day before yesterday For nearly 200 million years before humans developed a capacity to reason the emotional centers of the brain were hard at work If we want to properly understand the evolution of the mind we must explore this more primal capability that we share with other animals the power to feel Emotions saturate every thought and perception with the weight of feelings The Emotional Mind reveals that many of the distinctive behaviors and social structures of our species are best discerned through the lens of emotions Even the roots of so much that makes us uniquely human art mythology religion can be traced to feelings of caring longing fear loneliness awe rage lust playfulness and more From prehistoric cave art to the songs of Hank Williams Stephen T Asma and Rami Gabriel explore how the evolution of the emotional mind stimulated our species cultural expression in all its rich variety Bringing together insights and data from philosophy biology anthropology neuroscience and psychology The Emotional Mind offers a new paradigm for understanding what it is that makes us so unique

**Emotions as Bio-cultural Processes** Birgitt Röttger-Rössler, Hans Jürgen Markowitsch, 2009-06-12 Emotions have emerged as a topic of interest across the disciplines yet studies and findings on emotions tend to fall into two camps body versus brain nature versus nurture Emotions as Bio cultural Processes offers a unique collaboration across the biological social divide from psychology and neuroscience to cultural anthropology and sociology as 15 noted researchers develop a common language theoretical basis and methodology for examining this most sociocognitive aspect of our lives Starting with our evolutionary past and continuing into our modern world of social classes and norms these multidisciplinary perspectives reveal the complex interplay of biological social cultural and personal factors at work in emotions with particular emphasis on the nuances involved in pride and shame A sampling of the topics 1 The roles of the brain in emotional processing 2 Emotional development milestones in childhood 3 Social feeling rules and the experience of loss 4 Emotions as commodities The management of feelings and the self help industry 5 Honor and dishonor societal and gender manifestations of pride and shame 6 Emotion regulation and youth culture 7 Pride and shame in the classroom A volume of such wide and integrative scope as Emotions as Bio cultural Processes should attract a large cohort of readers on both sides of the debate among them emotion researchers social and developmental psychologists sociologists social anthropologists and others who analyze the links between humans that on the one hand differentiate us as individuals but on the other hand tie us to our socio cultural worlds
