Recipes for vegan athletes Protein recipes for training, performance and recovery, 2024-04-01 A vegan diet is one that excludes all animal products including meat fish poultry dairy products eggs and honey Most vegans also avoid wearing animal derived materials such as fur leather silk and wool

and using household products and cosmetics containing animal derived ingredients The Vegan Society defines veganism as a way of living which seeks to exclude as far as is possible and practicable all forms of exploitation of and cruelty to animals for food clothing or any other purpose You may have heard the term plant based which is sometimes used interchangeably with vegan but sometimes with a vegetarian pescatarian includes fish or flexitarian diet that still includes small amounts of animal products In fact there is no universally agreed definition of the term which in my view renders it rather meaningless So I have used the term vegan throughout this book

Plant based Diet Vegan vs plant based diet Plant based nutrition for sport The incredible health benefits Creating a healthy plant based eating habit Plant based meal plan for weight loss Breakfast Lunch Dinner recipes Snacks and salad recipes Smoothies recipes Don't forget to exercise And much more This particular concern of bodybuilders led many health experts and nutritionists to work extensively on the vegan diet and create high protein recipes and develop a dietary approach that can specifically meet the needs of the people who are working for muscle gain Where most people can simply rely on vegetables fruits grains etc to meet their energy needs athletes should look into the diet very carefully and manage the high protein to carb ratio while maintaining the intake of micronutrients and trace minerals In a nutshell a vegan bodybuilding diet is entirely different from a basic plant based diet as it is targeted to meet the need of building muscles Take advantage of this deal and let your customers fall in LOVE with this book
