IT IS BLACK & WHITE Jarda Cervenka, 2009-05-22 Pictures in this collection are

personal photographs glimpses of people in foreign countries portraits of my acquaintances friends family and there are few landscapes which fascinated me Some photos have a parable others are just fl ashes of memory In some one can find a message some are only peeks at the bizarre My main and only selection criteria was whether I found the snap shot interesting The title of one German book on photography is Belichtung ist Alles lighting is everything But if I were looking for a lofty title it might be Story is Almost Everything In literary story the imaginative metaphors the beautiful language the witty observations and character development are considered important attributes of quality of creative writing but it is solely the narrative of the story which is remembered which enriches our world of imagination A few years ago a Pulitzer Prize was awarded for a photograph of a starved skeletal African child crouching on a parched ground while being watched by a large vulture just few paces away You will not find such a unforgettable tale in this amateur photographer s collection but I hope a few of the shots in following pages might amuse and in others one might sense a fable So you could peek over the shoulder of author s past into the past where he is at home I would like to thank Tree my daughter for finding the time to edit this text with her usual care Gratitude goes to my schoolmate Mirek Veska who taught me to print black and white half a century ago and thus initiated me to the way of recording what interested me onto a strip of celluloid and then on paper with silver emulsion Only now I realize how it would have been unreliable to record the world only into the vanishing neurons of my hippocampus You may enter to plunge into the pictures without worrying it is only the white and black magic

*Everything Must Go* Dorian Lynskey, 2025-01-28 A rich captivating and darkly humorous look into the evolution of apocalyptic thought exploring how film and literature interact with developments in science politics and culture and what factors drive our perennial obsession with the end of the world As Dorian Lynskey writes People have been contemplating the end of the world for millennia In this immersive and compelling cultural history Lynskey reveals how religious prophecies of the apocalypse were secularized in the early 19th century by Lord Byron and Mary Shelley in a time of dramatic social upheaval and temporary climate change inciting a long tradition of visions of the end without gods With a discerning eye and acerbic wit Lynskey examines how various doomsday tropes and predictions in literature art music and film have arisen from contemporary anxieties whether they be comets pandemics world wars the Cuban Missile Crisis Y2K or the climate emergency Far from being grim Lynskey guides readers through a rich array of fascinating stories and surprising facts allowing us to keep company with celebrated works of art and the people who made them from H G Wells Jack London W B Yeats and J G Ballard to *The Twilight Zone* *Dr Strangelove* *Mad Max* and *The Terminator* Prescient and original *Everything Must Go* is a brilliant sweeping work of history that provides many astute insights for our times and speaks to our urgent concerns for the future

**The Stuff of Science Fiction** Gary Westfahl, 2022-09-27 While students and general readers

typically cannot relate to esoteric definitions of science fiction they readily understand the genre as a literature that characteristically deals with subjects such as new inventions space robot and aliens This book looks at science fiction in precisely this manner with twenty one chapters that each deal with a subject that is repeatedly addressed in science fiction of recent centuries Based on a packet of original essays that the author assembled for his classes the book could serve as a supplemental textbook in science fiction classes but also contains material of interest to science fiction scholars and others devoted to the genre In some cases chapters offer thorough surveys of numerous works involving certain subjects such as imagined vehicles journeys beneath the Earth and undersea adventures discovering intriguing patterns in the ways that various writers developed their ideas When comprehensive coverage of ubiquitous topics such as robots aliens and the planet Mars is impossible chapters focus on major themes referencing selected texts A conclusion discusses other science fiction subjects that were omitted for various reasons and a bibliography lists additional resources for the study of science fiction in general and the topics of each chapter

**Dystopian Fiction East and West** Erika Gottlieb,2001-07-04 Gottlieb juxtaposes the Western dystopian genre with Eastern and Central European versions introducing a selection of works from Russia Poland Hungary and Czechoslovakia She demonstrates that authors who write about and under totalitarian dictatorship find the worst of all possible worlds not in a hypothetical future but in the historical reality of the writer s present or recent past Against such a background the writer assumes the role of witness protesting against a nightmare world that is but should not be She introduces the works of Victor Serge Vassily Grossmam Alexander Zinoviev Tibor Dery Arthur Koestler Vaclav Havel and Istvan Klima as well as a host of others all well known in their own countries presenting them within a framework established through an original and comprehensive exploration of the patterns underlying the more familiar Western works of dystopian fiction

**A Carnival of Revolution** Padraic Kenney,2003-08-31 This is the first history of the revolutions that toppled communism in Europe to look behind the scenes at the grassroots movements that made those revolutions happen It looks for answers not in the salons of power brokers and famed intellectuals not in decrepit economies but in the

whirlwind of activity that stirred so crucially unstoppably on the street Melding his experience in Solidarity era Poland with the sensibility of a historian Padraic Kenney takes us into the hearts and minds of those revolutionaries across much of Central Europe who have since faded namelessly back into everyday life This is a riveting story of musicians artists and guerrilla theater collectives subverting traditions and state power a story of youthful social movements emerging in the 1980s in Poland East Germany Czechoslovakia Hungary and parts of Yugoslavia and the Soviet Union Kenney argues that these movements were active well before glasnost Some protested military or environmental policy Others sought to revive national traditions or to help those at the margins of society Many crossed forbidden borders to meet their counterparts in neighboring countries They all conquered fear and apathy to bring people out into the streets The result was a revolution unlike any other before nonviolent exuberant even light hearted but also with a relentless political focus a revolution that leapt from country to country in the exciting events of 1988 and 1989 A Carnival of Revolution resounds with the atmosphere of those turbulent years the daring of new movements the unpredictability of street demonstrations and the hopes and regrets of the young participants A vivid photo essay complements engaging prose to fully capture the drama Based on over two hundred interviews in twelve countries and drawing on samizdat and other writings in six languages this is among the most insightful and compelling accounts ever published of the historical milestone that ushered in our age

**Fights of Fancy** George Edgar Slusser, Eric S. Rabkin, 1993 This collection of fifteen original essays offers new perspectives on armed conflict as a central aspect of science fiction and fantasy writing Looking past the superficial conventions associated with ray guns and aliens swords and sorcerers the contributors show how writers in the genre today are not so much imagining war more fully as they are completely re imagining it Science fiction and fantasy writing is no longer mired in epic or chivalric models but is responding to new and more complex real world motivations for armed aggression advances in weaponry shifts in the theaters of war and changes in battlefield conditions Most of the papers were presented at the annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature the field s most prestigious international gathering The trend throughout the book is away from critical interest in stories of spatial or territorial conquest and toward works that deal with topics related to wars of temporal logistics and the internationalization of the combat zone including urban street violence gender conflicts and resistance to runaway technology The essays range from studies of the semantics and linguistics of warfare in science fiction to a critique of Osip Senkovsky s *Fantastic Journeys of Baron Brambeus* from writer Joe Haldeman s assessment of the impact of his Vietnam experiences on his fiction to inquiries into a shared author reader agenda in novels concerning potential mass destruction including Stephen King s *Dead Zone* and M J Engh s *Arslan* The collection also charts new directions in writing such as the anti apocalyptic science fiction of Samuel R Delany and embraces new modes of presentation particularly computer animation and the bande dessinée or illustrated narrative as exemplified by French novelist Phillippe Druillet s *La Nuit* Musician Bob Marley film actor directors Sylvester Stallone and Bruce Lee and the

cyberpunk film classics Terminator and the Road Warrior series are among other topics discussed Together the essays reinforce the editors contention that the true function of these fantasies and science fictions is neither nostalgia nor fancy but analysis The contributors treat the texts they examine as a means not of playing war games but of understanding the role of war in the present and the future     *From Lowbrow to Nobrow* Peter Swirski, 2005 *From Lowbrow to Nobrow* vindicates popular fiction as an art form that expresses and reflects the aesthetic and social values of its readers
