New Body Politics Therí A. Pickens, 2014-02-05 In the increasingly multi racial and multi ethnic American landscape of the present understanding and bridging dynamic cross cultural conversations about social and political concerns becomes a complicated humanistic project How do everyday embodied experiences transform from being anecdotal to having social and political significance What can the experience of corporeality offer social and political discourse And how does that discourse change when those bodies belong to Arab Americans and African Americans Ther A Pickens discusses a range of literary cultural and archival material where narratives emphasize embodied experience to examine how these experiences constitute Arab Americans and African Americans as social and political subjects Pickens

argues that Arab American and African American narratives rely on the body's fragility rather than its exceptional strength or emotion to create urgent social and political critiques. The creators of these narratives find potential in mundane experiences such as breathing, touch, illness, pain, and death. Each chapter in this book focuses on one of these everyday embodied experiences and examines how authors mobilize that fragility to create social and political commentary. Pickens discusses how the authors' focus on quotidian experiences complicates their critiques of the nation, state, domestic and international politics, exile, cultural mores, and the medical establishment. *New Body Politics* participates in a vibrant interdisciplinary conversation about cross-ethnic studies, American literature, and Arab American literature. Using intercultural analysis, Pickens explores issues of the body and representation that will be relevant to fields as varied as Political Science, African American Studies, Arab American Studies, and Disability Studies. [100 Words Almost Everyone Mixes Up or Mangles](#) Editors of the American Heritage Dictionary, 2010-09-15 Eliminate mistakes and improve your vocabulary with this engaging guide to the world's most misused words. Do you know your delegate from your relegate, your cachet from your cache? At one time or another, we've all suffered the embarrassment of having our remarks corrected by a family member, colleague, or stranger. *100 Words Almost Everyone Mixes Up or Mangles* presents fifty pairs of words that people have trouble getting right and keeping straight, words that tend to get corrected when we're least expecting it. These words include near-synonyms, words with subtle but important distinctions in meaning like baleful vs. baneful and effectual vs. efficacious. Other pairings bring together notorious sound-alikes like faze/bother vs. phase/stage, pour/put in fluid vs. pore/read closely, and waive/forgo vs. wave/say hello. The book also addresses some classic spelling blunders and nonwords like beyond the pail, full/reign, unjust, and inobtrusive. Each word has a definition and a pronunciation, and most have etymologies explaining the word's origin. The mix-ups themselves are described in fun-to-read notes that provide clear solutions to help readers avoid making needless uncomfortable gaffes. *100 Words Almost Everyone Mixes Up or Mangles* gives readers the chance to improve their command of words that are often heard but just as often misused. *How to Win Friends and Influence People in the Digital Age* Dale Carnegie Training, 2011-09-29 Since its initial publication, *How to Win Friends and Influence People* has sold a total of 15 million copies. The book continues to sell briskly today, but Carnegie never anticipated the ways in which the digital age would provide new tools and challenges for winning friends and influencing people. The advent of social networking sites, the dominance of email, and the ways in which the Internet has supplanted face-to-face interactions have made Carnegie's precepts all the more immediate and vital. Brent Cole, working in tandem with Dale Carnegie Associates Inc., has reimagined the original book for the digital age, updating and reframing Carnegie's insights about communication, self-expression, and leadership. *Play Among Books* Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI, Alice_ch3n81, develop a playful scenario in which they propose coding as the new literacy of

information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science
