Avaliar ou Precificar um bem requer conhecimentos técnicos e científicos para tal fim pois a pericia uma prova documental cujos conhecimentos acerca dos fatos e características do imóvel avaliado exigem esclarecimentos técnicos fundamentados em normas e procedimentos a fim de produzir elementos probatórios que justifiquem o valor apurado As propriedades rurais podem ser definidas como aquelas terras não urbanas que geralmente são destinadas ao uso agrícola pecuário florestal ou at mesmo extrativista com todas as suas benfeitorias e recursos naturais Na avaliação de imóveis rurais deve-se avaliar a terra as benfeitorias as obras e trabalhos de melhorias os equipamentos os recursos naturais os seus frutos e direitos O Perito Avaliador Imobiliário deve possuir um vasto conhecimento de práticas de mercado no que diz respeito compra e venda e também na precificação de imóveis para fins de aluguel ou arrendamento levantamento de custos para futuros empreendimentos incorpora es desmembramentos e entre outras práticas do mercado imobiliário Por fim para a avaliação de propriedades rurais o avaliador dever possuir não somente os conhecimentos gerais da Engenharia de Avaliação mas também nos específicos sobre agropecuária e engenharia florestal ou então se apoiar nos conhecimentos de assistentes técnicos como Engenheiros

Florestais Engenheiros Agrônomos Agrimensores Biólogos entre outros profissionais que venham contribuir cientificamente e tecnicamente com o trabalho de avaliação. O avaliador de propriedades rurais deve ter conhecimento de agricultura aplicável à propriedade sob avaliação bem como familiaridade com as perspectivas agrícolas nacionais e internacionais e com os programas governamentais de apoio ao desenvolvimento rural por exemplo. Deve o Perito usar de toda a sua experiência agregada técnica e a ciência da avaliação para que possa ser o mais claro e exato possível. No caso de perícia judicial segundo Rodrigues 1985 A perícia judicial uma medida de instrução necessitando de investigações complexas confiadas pelo juiz em virtude de seu poder soberano de apreciar a um especialista a fim de que ele informe sobre as questões puramente técnicas excedentes de sua competência e seus conhecimentos. Não deve ser confundida com a perícia extrajudicial seja ela a perícia amigável resultante de acordo das partes interessadas seja a perícia oficiosa esta fora e anterior ao litígio ou ainda nascida do litígio e em curso de processo independente da decisão do juiz na qual as partes pretendem colher elementos para melhor conhecimento da questão. Esta obra o resultado de vasta pesquisa e aplicação feita em campo pelo próprio autor trata-se do segundo livro publicado pelo mesmo na área de avaliação imobiliária sendo que o primeiro era voltado para imóveis urbanos. Portanto este livro tem novamente a singela porém pretensiosa intenção de colaborar com o perito leitor através de apontamentos importantes sobre a boa prática da pesquisa e perícia imobiliária para imóveis rurais.

Nelson,Richard Harpf,C. Kettle,2012-12-06 It is now more than twenty years since a proposal was first mooted to hold an international tunnelling symposium in Britain. At the time of the first symposium held in London in 1976 the Channel Tunnel project had just been shelved. Last weekend a charity walk was held in the finished tunnel which will be open for business later in the year. Tunnels have figured prominently and at times spectacularly in the development of national and international links and it is hoped that such links gather pace in the future. It is particularly

pleasing that Alastair Biggart of Storebrelt has agreed to deliver the twenty sixth Sir Julius Wernher Memorial Lecture of the Institution of Mining and Metallurgy entitled The changing face of tunnelling at the start of this event Although almost every edition of the technical journals on tunnelling reports another 1 billion scheme somewhere in the world it would be unfair of me to suggest that tunnelling is restricted to these prestigious schemes for major transport links Much of the work that makes modern life possible receives hardly a mention outside the technical press and one suspects that society at large applies the out of sight out of mind attitude even more readily to underground construction than it does to other forms of engineering Clearly there is a continuing need to improve the capacity and performance of our infrastructure while having a careful regard for the environment
