to advance policies and agendas that are in fact detrimental to both science and education The author a physics professor examines two related trends in education the practice of data driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology Many of the reforms being foisted on educators have more in common with pseudo science than real science. The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general How is it possible for schools with all students learning at grade level to be rated as failing teachers to be rated as ineffective after all their students meet their learning outcomes rising grade school math standards to result in more college students needing remedial math politicians to disparage scientists and their results but argue that more students should study science These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized optimized and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students Atlas Shrugged Ayn Rand, 2005-04-21 Peopled by larger than life heroes and villains charged with towering questions of good and evil Atlas Shrugged is Ayn Rand's magnum opus a philosophical revolution told in the form of an action thriller nominated as one of America's best loved novels by PBS s The Great American Read Who is John Galt When he says that he will stop the motor of the world is he a destroyer or a liberator Why does he have to fight his battles not against his enemies but against those who need him most Why does he fight his hardest battle against the woman he loves You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book You will discover why a productive genius becomes a worthless playboy why a great steel industrialist is working for his own destruction why a composer gives up his career on the night of his triumph why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill Atlas Shrugged a modern classic and Rand's most extensive statement of Objectivism her groundbreaking philosophy offers the reader the spectacle of human greatness depicted with all the poetry and power of one of the twentieth century s leading artists The Twilight of the Middle Class Andrew Hoberek, 2009-01-10 In The Twilight of the Middle Class Andrew Hoberek challenges the commonly held notion that post World War II American fiction eschewed the economic for the psychological or the spiritual Reading works by Ayn Rand Ralph Ellison Saul Bellow Phillip Roth Flannery O Connor Thomas Pynchon Don DeLillo and others he shows how both the form and content of postwar fiction responded to the transformation of the American middle class from small property owners to white collar employees In the process he produces compelling new accounts of identity politics and postmodernism that will be of interest to anyone who reads or teaches contemporary fiction Hoberek argues that despite the financial gains and job security enjoyed by the postwar middle

class the transition to white collar employment paved the way for its current precarious state in a country marked by increasingly deep class divisions Postwar fiction provided the middle class with various imaginative substitutes for its former property owning independence substitutes that since then have not only allowed but abetted this class s downward mobility. To read this fiction in the light of the middle class experience is thus not only to restore the severed connections between literary and economic history in the second half of the twentieth century but to explore the roots of the contemporary crisis of the middle class

Nirenberg, 2024-05-09 Ranging from math to literature to philosophy Uncountable explains how numbers triumphed as the basis of knowledge and

compromise our sense of humanity Our knowledge of mathematics has structured much of what we think we know about ourselves as individuals and communities shaping our psychologies sociologies and economies In pursuit of a more predictable and more controllable cosmos we have extended mathematical insights and methods to more and more aspects of the world Today those powers are greater than ever as computation is applied to virtually every aspect of human activity Yet in the process are we losing sight of the human When we apply mathematics so broadly what do we gain and what do we lose and at what risk to humanity These are the questions that David and Ricardo L Nirenberg ask in Uncountable a provocative account of how numerical relations became the cornerstone of human claims to knowledge truth and certainty There is a limit to these number based claims they argue which they set out to explore The Nirenbergs father and son bring together their backgrounds in math history literature religion and philosophy interweaving scientific experiments with readings of poems setting crises in mathematics alongside world wars and putting medieval Muslim and Buddhist philosophers in conversation with Einstein Schr dinger and other giants of modern physics The result is a powerful lesson in what counts as knowledge and its deepest implications for how we live our lives Elsewhere in America David Trend, 2016-04-28 Americans think of their country as a welcoming place where everyone has equal opportunity Yet historical baggage and anxious times can restrain these possibilities Newcomers often find that civic belonging comes with strings attached riddled with limitations or legally punitive rites of passage For those already here new challenges to civic belonging emerge on the basis of belief behavior or heritage This book uses the term elsewhere in describing conditions that exile so many citizens to some other place through prejudice competition or discordant belief Yet in another way elsewhere evokes an undefined not vet ripe with potential In the face of America's daunting challenges can elsewhere point to optimism hope and common purpose Through 12 detailed chapters the book applies critical theory in the humanities and social sciences to examine recurring crises of social inclusion in the U S After two centuries of incremental progress in securing human dignity today the U S finds itself torn by new conflicts over reproductive rights immigration health care religious extremism sexual orientation mental illness and fear of terrorists Is there a way of explaining this recurring tendency of Americans to turn against each other Elsewhere in America engages these questions charting the ever changing faces of difference manifest in contested landscapes of sex and race to such areas as disability and mental health their spectral and intersectional character recent discourses on performativity normativity and queer theory and the grounds on which categories are manifest in ideation and movement politics metapolitics cosmopolitanism dismodernism Beyond Liquidity Brad Pasanek, Simone Polillo, 2013-08-21 Liquidity or rather lack of it lies at the heart of the ongoing global financial crisis In this collection of essays the metaphor of money as liquidity and the model of crisis it entails is deliberated by a range of scholars from economics history anthropology literature and sociology This volume offers a rhetorical explanation of the social cultural and historical contexts in which metaphors of money are produced circulate and fail These essays first presented at After the

Crash Beyond Liquidity a conference on money and metaphors held at the University of Virginia USA in October of 2009 were drafted in the wake of global uncertainty TARP bailouts the Great Recession programs of stimulus and austerity and recurrent threats of sovereign default in the EU They question the language of liquidity and flows that is characteristic of everyday business exposing what metaphors of money hide and explaining why the idea of liquidity has proved so durable This book was originally published as a special issue of the Journal of Cultural Economy **Writing Research Critically** John Schostak, Jill Schostak, 2015-12-14 This is not a standard guide to writing a dissertation thesis project report journal article or book Rather this book will help researchers who are dissatisfied with the typical recipe approaches to standardised forms of writing up and want to explore how academic writing can be used to greater effect Writing Research Critically shows that writing up is not just about presenting findings as if the facts would speak for themselves As the authors show there are certain vital skills that any writer needs to develop within their academic writing such as the ability to develop critical understanding and a personal academic voice question assumptions and the status quo frame the background and transgress the frame read between the lines when reviewing the literature strengthen interpretations and conctruct persuasive arguments challenge and develop theory and explanations develop ideas that create possibilities for realistic action Packed with examples from a range of writing projects papers dissertations theses reports journal articles and books this book provides a practical and refreshing way to approach and present research Through case studies the authors offer a step by step guide from the early stages of planning a writing project whether an undergraduate paper or a professional publication to the polishing processes that make the difference between a merely descriptive account to an argument that intends to be critical and persuasive Written in a clear accessible style this book will inspire a wide range of researchers from undergraduates to postgraduates early career researchers and experienced professionals working across a wide range of fields and demonstrate how research can have more impact in the real world Avn Rand. **Running in Good Faith?** Alan D. Krinsky, 2021-05-04 Could a religiously observant Jew in good conscience run as a libertarian candidate promoting a libertarian platform Or would doing so betray fundamental Jewish values Running in Good Faith Observant Judaism and Libertarian Politics considers the seemingly irreconcilable values and political commitments of Judaism and libertarianism The latter prizes individualism self ownership private property and freedom whereas the former emphasizes community charity and service of God But are these differences so sharp This book seeks to determine if this is an essential clash or merely an apparent one and to stimulate a broad discussion of Judaism values politics and political philosophy in order to call into question what people think they know about both Judaism and libertarianism Time, Life & Memory Laurens Landeweerd, 2020-12-03 This book revitalizes the relevance of the ideas of Henri Bergson 1859 1941 for current developments in exact sciences It explores the relevance of Bergson's thought for contemporary philosophical reflections on three of the most important scientific research areas of today namely physics the life sciences and the neurosciences It does

so on the basis of the three interrelated topics of time life and memory Henri Bergson 1859 1941 was one of the most widely read philosophers of his era The European public was seeking for answers to questions of the soul and the nature of life and fitting within a historical niche between intellectual rationalism and intuitive spiritualism his writings drew much attention This work focuses on the relevance of his philosophy for developments in exact sciences today The discussion of physics in relation to the abstract and the concrete the life sciences in relation to concepts of life in relation to new and emerging biotechnology and the neurosciences in relation to the dual nature of human identity focuses on one main topic time Time isolated from experience as the measure of the events in the universe in modern physics time as the measure of emergent systems in evolution as the backdrop of the theory of evolution in biology time in relation to memory and imagination in neuropsychological accounts of memory The author thus discusses the ideas of Henri Bergson as a basis to unveil time as a living process rather than as an instrument for the measure of events This view forms the basis of a novel approach to the philosophy of technology An exciting book for academics interested in the interplay between hard sciences and philosophy
